### **OPPORTUNITY AND FUTURE OUTLOOK**

Indian economy is expected to grow during current financial year at slower but still healthy rate of 7.5 to 8%. The inflation is running at a high level, due to several factors including high commodity prices, supply side constraints in the economy and rapid increase in consumption. The RBI has been raising interest rates to control the demand. However this has not been successful. The cost of funds is rising and this may slow down the investments by industrial sector resulting in lower growth rate of economy.

The recent uncertainties and developments globally including expected slow down in US and Europe is also a cause of concern. The possibility of adverse effect on Asian economies including on China can further slow down growth in India. However, it may result in reduction in prices of crude oil and commodities. This can help in reduction in inflation in India, which can create possibilities of lowering of interest rates.

Improved infrastructure sector will play an important role in removal of many constraints in growth of all the three segments of the economy viz. agriculture, industry and services in the years to come. Your company is supplying equipment to several projects coming up in hydrocarbon, power, refining and petrochemical, fertilizer and process industry. It is expected that new investments in these sectors will continue to grow and your company will benefit from the same.

The Company is also working actively with reputed Companies like L&T, Samsung, Toyo Engineering, BPCL, HPCL etc. We are confident that your Company will be able to show healthy growth in the current year and have substantial order book position at the end of current financial year. At present, the Company has healthy order position of over Rs. 40 crores.

The Company is also exploring and pursuing orders for site construction activities as well as overseas business.
