Chairman's Message

Dear Stakeholders,

Amidst the prevalent macro economic uncertainties, your company has continued to add certainty in delivering strong performance over the years. We have grown step-by-step to current position of being the leading OEM supplier of automotive lighting and rear view mirrors. During last 5 years of turbulent economic scenario, your company has grown by a CAGR of more than 22%, demonstrating strong resilience and consistency in its overall performance.

During FY 2012-13, Indian Auto Industry has grown by just 2.04% in sales and 1.20% in production. In more specific terms, passenger vehicle segment has grown by 3.27% in sales, thanks to higher demand in utility vehicles; otherwise cars have shown a negative growth of around 4%. Two-wheeler segment has also grown by just 2.43% in sales. It shows the overall slow growth momentum across the Auto Industry. On this backdrop, your company has registered a decent growth of 12.95% in FY 2012-13 by achieving a net turnover of Rs. 598.88 Crores in comparison to Rs. 530.23 Crores in last year. Profit after tax has also increased from Rs. 21.14 Crores in FY 2011-12 to Rs. 27.31 Crores in FY 2012-13 registering an increase of 29.18%.

While we will continue to solidify our position in Auto-component business by judiciously seizing the strategic growth opportunities and expanding our product portfolio, we have gone in for diversification since last year for manufacturing of **LED Luminaries** for indoor and outdoor applications such as Recess Panels, down lights, spot lights, LED Bulbs & LED Tube Lights, Bay Lights, Flood Lights, Solar based Lantern and Street lights etc.

We have our own Government approved R&D Centre, where our Engineers have developed innovative products including **LED Drivers**, which is **USP of our Company** because it make our LED luminaries most competitive, highly reliable with trouble-free-performance.

It is very encouraging to mention that we have been able to do substantial business from the beginning itself. In the current scenario of electric power crises and continuously increasing power tariff, **the need of the hour is LED Lighting** because of its unique advantages like power saving of about 60% in comparison to CFL, Long Life, Eco Friendly, lowest carbon footprint, mercury free, much better performance etc. Therefore, **the future is for LED technology** and there is no dearth for business for LED lighting in the near future. We have taken pro-active steps with rapid expansion of our product range and strive for big business from Railways, Central & State Government, Metro, Overseas Market etc. This business will bring faster growth to the Company, because now **we will be covering three different market segments of Lighting –Automotive, LED In-door and Out-door and Railways**. We have dedicated plans to keep our expansion programme in the LED area and would like to bring a very large range of products in the near future in order to become a very prominent player in this field.

We believe that LED is the future of lighting technology and it will change the landscape of lighting industry. Globally, LED lighting has been widely accepted in place of incandescent and CFL and emerging as the best environment friendly and most efficient lighting source. Indian LED lighting Industry is at nascent stage and we will convert this opportunity into our growth engine by leveraging Fiem's decades old core competency in lighting, in-house manufacturing, quality and testing facilities supported by a strong brand 'FIEM'.

To derive our growth in high trajectory, we have taken on the responsibility of rewriting the rules of the game and redefine the LED Lighting Industry in India by manufacturing almost all components of LED Luminaire in-house by maintaining stringent quality standards besides effective cost control mechanism. In this way, Fiem's product strategy is focused on quality products at reasonable prices where we have clear and beneficial value proposition.

Despite all macro-economic volatilities, we look at the future with optimism, hence we are further strengthening our capabilities on all fronts whether manufacturing, R&D, testing, quality or marketing. In this new phase of development, we remain fully confident of the growth potential of our business and look forward for your continued support and encouragement for the well being and sustainable growth of the company.

Thanking you,

Dr. J.K. Jain
Chairman & Managing Director

LIGHT UP THE WORLD

Foray into LED Lighting

FIEM, with over 4 decade of experience in the Lighting, have decided thoughtfully to enter in the foray of manufacturing of LED Luminaires.

The diversification in the field of LED Luminaires have practically helped us to make best use of our enriched knowledge of Lighting technology and leverage our best in class manufacturing, quality & testing facilities besides the modern infrastructure available with us.

The manufacturing activities which had started during FY 2011-12 are fully geared-up during the FY 2012-13 and with large range of products have yielded good business during the year.

In view of the fact that LED Luminaires consumes very less Electricity in comparison to incandescent and CFL, by use of the LED lighting, substantial power can be saved. The Government understand very well that the 'power saved is power generated'. With this premise, Government is wholeheartedly supporting and encouraging the usage of LED in Lighting application among general consumers besides also largely introducing LED Lighting in their own Departments and Establishments.

The requirement of power for Lighting application alone need nearly 20% in India in comparison to the international average of 12-15%. Therefore in India, the LED Lighting will emerge as a major factor in curtailing the demand of power and will prove an effective solution for the power crises by bringing down the power consumption in Lighting.

Fiem

LIGHT UP THE WORLD

Expertise for Changing Times

Common 60W Incandescent Bulb
uses 60W per Bulb for 800 Lumen
1 bulb lasts 1,200 hrs
20 years = 21 bulb

Common 14W CFL Bulb
uses 14W per Bulb for 800 Lumen
1 bulb lasts 10,000 hrs
20 years = 3 CFL bulb

Fiem 9 W Ambient LED Bulb

uses 9 W per Bulb for 850 Lumen
1 bulb lasts 25,000 hrs
20 years = 1 led bulb

LED Lighting is going to be future of Lighting Industry and will create enormous potential of growth. We have already ventured into LED Lighting to convert this potential into big business opportunity. Our R&D Department is actively working on new development for introducing High Power LED Lighting, LED Lighting, and Intelligent LED Lighting.

We have already launched following LED based Lighting products for indoor and outdoor applications which are receiving encouraging response from through out the length and breadth of the country:

- LED Bulbs & LED Tube Lights
- Flood Lights & Street Lights
- Solar based Lantern and Street lights
- Down lights
- Bollards
- Garden Lights
- Spot lights
- Bay Lights etc.
- Recess Panels

Apart from the above products, we have also developed complete LED display panel/ system for Railways, Metros, Taxies which have a very large potential in the near future.

We are already supplying LED Display System for Bus Manufacturers, State Transport Corporation, School and Educational institutions.

The real strength of our company is that we manufacture all the components of LED Luminaires including LED driver in House. We are fully equipped for all Plastic Parts, Sheet Metal Parts, Optical design etc. and only LED is outsourced by us. This help us to meet our strategy, which is focused on supply of best quality products at right price.
