LIGHTING UP THE FUTURE GROWTH

We, at Fiem Industries have been growing consistently despite the challenging macro economic situation in the recent years reflecting our fundamental strength of resilience and dynamism. It is our inherent quality of constantly evaluating ourselves that further strengthens our position and ensures a steady growth momentum.

Backed by our strong presence in Automotive segment and the excellent relationship that we maintain with our clients, we have successfully leveraged the consistent growth of the two wheeler segment in the recent times. Our wide array of products ranging from lamps and mirrors, plastic moulded parts to sheet metal products are well accepted among our clients due to strict adherence to high quality and cost competitiveness. With our natural aspiration to grow more, we are relentlessly pursuing to broaden our base in the automotive segment strongly supported by our technology capabilities in design, development and testing.

Our venture into LED luminaires and Integrated Passenger Information System (IPIS) reflects our assiduous pursuit for steady growth. LED is more energy efficient and hence more cost competitive over its lifetime compared to CFL and incandescent bulbs. Given its superior attributes over other luminaires and its nascent stage in India, the LED industry is well poised for strong growth because of overwhelming Government initiatives with increase in consumer awareness. With a strong in house R&D capability, we will have a cost advantage, which could propel us ahead of peers in the LED segment.

The IPIS business segment would receive an impetus from Government's focus in modernizing the railway infrastructure including the IT system. Higher application of improved version of station navigation information system which falls within the ambit of IT system will drive our growth. Our continuous effort of strengthening our growth capabilities and planned reinforcement of the growth engine will ensure our steady momentum.

THE WORLD OF FIEM INDUSTRIES

Established in 1989, Fiem Industries Limited (FIEM) is one of the leading manufacturers of Automotive Lighting & Signalling Equipments and Rear View Mirrors in India. After strengthening its position in the automotive segment with product diversification like plastic moulded and sheet metal parts, it has also diversified its product portfolio by entering into LED luminaires for Indoor and Outdoor applications and Integrated Passenger Information System for Railways & Buses. FIEM is also among first companies in India introducing LED lights in two wheelers.

CHAIRMAN MESSAGE

Dear Shareholders,

The nation is going through a phase of economic turnaround after a lull period of last few years. The macro-economic numbers including GDP, inflation rate, IIP data and forex reserves are reflecting the improved economic health of India. This enhances my confidence that we are on the right direction on the course of economic recovery led by a pro reformist government in the center.

Domestically, the automotive sales grew by a moderate rate of 7% in FY15 from the previous year. What is encouraging is the growth recorded in the passenger vehicle and medium and heavy vehicle (M&H) segment after a decline in growth in the previous year. The two wheeler segment where we have a very strong presence continued to perform steadily by recording a healthy 8% growth in FY15.
