Under the contract for deployment of own trucks, the Company deploys its own trucks/ vehicles with its client round the clock. The Company expects 15-20% growth in both contracts.

During the year under review, the Transport Division witnessed ups & downs because of stiff competition in the market. Income from Transport Operations decreased to Rs. 2040.75 Lacs as compared to Rs. 2698.01 Lacs in the previous year. The decline in income is mainly due to discontinuation of transport operation in non- viable sectors and also discontinuation of some of the bulk transportation contracts. The Company has already restructured its transport activities for optimum utilization of its fleet of commercial vehicles and is hopeful to come out with positive results in the days to come. The Company has also received transportation Contracts from valued customers and confident to increase its turnover in the current year and thus post a increased profit.

Trading :

BOSCH Division is acting as the Main Distributor for Auto Components manufactured by "BOSCH Ltd." for the Automotive Aftermarket and supplies such spares to Authorised Service Centers of Bosch as well as to retail outlets and neutral garages and workshops. BOSCH is the global leader in Automotive Components and "BOSCH" brand products come as OE fitments in all ranges of vehicles worldwide. Research indicates that the total installed capacity of power from renewable today stands at nearly 1350 MW with contribution from wind power of nearly 1000 MW. Company Outlook

The company looks forward to reap the benefit of growing activities in transportation sector by procuring more logistic contracts and also procuring contracts for deployments of its own trucks to cater qualitative and competitive services as per the requirements of its esteemed customers so that the transportation services of the company can be treated at par with its competitors whereby affording further fillip and momentum for the healthy growth of the Company in general and its products in particular.

The Company is also expanding its client network all across Gujarat for trading in automotive parts of Bosch Limited and Mahindra & Mahindra Limited.

The Company is also contemplating to make foray in the reality at the appropriate time.

The Company has applied with the Ministry of Environment & Forest, Government of India for availing Carbon Credit Development Mechanism. The company anticipates that the company can address its environmental concern and issues positively. As regards to the Wind Power Generation, no other renewable energy based electricity producing technology has attained the same level of the maturity as wind power. The company foresees the output generation from this project can go to reduce its cost of production.

Opportunities & Threats and Risk & Concern :

Despite slowdown in the industrial growth, the transportation activity of your company is increasing. Further road transportation is a proven economic and reliable mode of transportation. Timely delivery and safety of goods is the essence of transportation business. The Company stress fully on both the areas. The employees are being periodically trained by the Human Resource Department from time to time to cater business needs of its customers

Cut throat competition among the key market players may bring down the profitability of the trading division. However with the increase in the number of vehicles the Company feels that the Company can make a wonder by penetrating deep inside the market and increasing the distribution network.

The demand for Refractory Bricks is increasing with increase in steel and glass manufacturing units. However the increase in demand of Refractory Bricks may go down in case any recessionary trend is seen in the above two sectors. Keeping in view of the investments made so far in the Bricks Division, the Company does not see any major threat to its business activities.

The reality Boom is going to stay in the future. The Company looks forward to enter into this segment at the appropriate time.

On Wind Power generation front, there are no major technical barriers to large scale penetration of wind power. As per projections made by Ministry of Non-conventional Energy Sources, 10% of the 2,40,000 MW (i.e. 24,000 MW) installed capacity requirement by the year 2012 will come from renewables.
