GAIL (India) Limited
India's **Youngest** Maharatna

Tomorrow is Yours
With the eco-friendly fuel - **Natural Gas**

With sustainable economic growth across developing and emerging economies since the last decade and enhanced aspirations for a quality life, global energy demand is escalating at a steady rate. Energy from cleaner sources is the new normal in the post-modern world, where climate policies are being recalibrated by nations to help sustain the Earth's delicate bio-diversity.

India's rapid economic growth and social advancement have also accelerated the need to unlock new energy sources and efficiently utilize existing ones. At GAIL (India) Ltd, we believe that there are enough energy resources available to meet the demand escalation in the foreseeable future, but there will be challenges as well as opportunities.

We have been working responsibly for nearly three decades to help secure India's energy landscape. Our corporate mandate is to accelerate and optimize the effective and economic use of natural gas and fractions for the benefit of the nation in an environmentally sustainable manner. As India's youngest Maharatna public enterprise, we are consistently enhancing our investments to help meet the country's long-term energy requirements.

Energising everyday life

At GAIL (India) Ltd, we believe our contribution is fundamental to help energize everyday life of a fast developing trillion dollar Indian economy. Our journey commenced nearly three decades ago in August, 1984 as a Central Public Sector Undertaking (PSU) under the Ministry of Petroleum & Natural Gas (MoP&NG).

We were initially responsible for one of the largest cross-country Natural Gas Project Pipeline - construction, operation & maintenance of the Hazira - Vijaipur - Jagdishpur (HVJ) pipeline project - in the world. This 1800 Km long pipeline laid the foundation for the development of market for Natural Gas in India.

GAIL, after having started as a Natural Gas transmission company during the late eighties, has grown organically by building large network of Natural Gas Pipelines, LPG Pipelines, Gas Processing Plants and a gas based integrated Petrochemical plant.
