### MICROECONOMIC OVERVIEW

India remains one of the fastest growing economies in the world. According to the Central Statistical Office's (CSO) revised estimates, India's GDP growth remained steady at 7.1% in FY17 with the third quarter registering a growth rate of 7% y-o-y despite the effects of demonetisation. Certain macroeconomic indicators suggest that the economy is steadily recovering from the impact of demonetisation, announced on 8th November, 2016, with the RBI forecasting GDP growth at 7.4% in FY18.

Consumer Inflation likely to be moderate and remain below 5% in the FY 2017. The central Government remains on the path of fiscal deficit to around 3% of GDP in FY18. Government continues to make efforts to revive investment cycle and is spending on building physical infrastructure. Government has been able to revive many stalled projects in the public sector; however, private sector investments remain weak given low capacity utilization and leveraged balance sheets.

We are on the verge of one of the most important reform measures in the country – the transition to the Goods and Services Tax (GST) from 1st July, 2017. The GST will unify India into a single market thereby simplifying the compliance process, broadening the tax base and improving productivity. While there remains a possibility of disruption in the short run, given the scale of change, recent experience with the demonetization exercise suggests that the disruption to economy from GST implementation, if any, is likely to be small and short lived. The long-term potential from GST is

immense.
