2018-19

The Chairman & Managing Director, Shri Yogesh Agrawal & his daughter Ojaswini Avantika with the then Prime Minister of India Hon'ble Shri Atal Bihari Vajpayee showing him gratitude for suggesting the name of the Company as "Genomic Valley".

PM asks scientists to create genomic valley

Our New Delhi Bureau
NEW DELHI 3 JANUARY

PRIME Minister Atal Behari Vajpayee today heralded the advent of the 'bioinformatics wave' in India. Ruining the fact that the country caught up with the Silicon Valley phenomenon rather late, he urged the bio-sciences and IT communities in the country to take the lead in creating the new 'Genomic Valley' of the 21st century.

Mr Vajpayee said bold and unconventional initiatives were needed to seize the big new opportunity arising out of the information generated by the human genome project. Armed with this 'base' information India could be in the vanguard of a new revolution as it had a vast human genetic diversity that would provide the 'knowledge of variation' required to establish an edge, he pointed out.

Inaugurating the 88th Indian Science Congress in here today, he added that such initiatives

needed huge investments which could not come from budgetary allocation alone and it was necessary to promote public-private partnerships. He, however, expressed concern over the demand and exodus of software professionals which was leading to a lack of enthusiasm for careers in other streams of science. Citing the proposal of a group of US-based entrepreneurs to set up global institutes of science and technology in India, he said the government would facilitate such initiatives.

While the private sector was responding to opportunities in the knowledge sector of late, pressing reforms were needed in the administration and governance to remove bureaucratic control and 'facilitate' science to flourish, he added. Reiterating that his government would hike investments in R&D from the 2 per cent of GDP, he underscored the earmarking of Rs 50 crore for the India Millennium Missions to be executed by the Technology Information, Forecasting and Assessment Council (TIFAC) and an additional Rs 50 crore for the New Millennium Technology Leadership Initiatives by CSIR.
