Management & Discussion Analysis

Ganges Securities Limited ('the Company') a part of K K Birla Group of Sugar Industries, is primarily engaged in investment in securities. The Company has two wholly owned subsidiaries namely Cinnatollah Tea Limited and Uttar Pradesh Trading Company Limited being engaged in Tea plantation and processing business and investment business respectively.

Economic Overview

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies.

Global growth is expected to remain at 3.0 per cent in 2019 and 2020, however, the steady pace of expansion in the global economy masks an increase in downside risks that could potentially exacerbate development challenges in many parts of the world. India's GDP is forecast to expand 7.5% in FY20 and 7.7% in FY21. India will further build its lead as the world's fastest-growing major economy as it picks up pace next year while the global economy is forecast to slow as per the International Monetary Fund.

In fact, the effects of the external shocks such as increase in crude price and conditions worsened as recovery in some advanced economies caused faster investment outflows were contained in part by India's strong macroeconomic fundamentals and policy changes (including amendments to the policy/code related to insolvency and bankruptcy, bank recapitalization, and foreign direct investment).

Industry Structure and Developments

The Government of India has introduced several reforms to liberalise, regulate and enhance the industries. Investments and growth follow a similar pattern, and investments make up a crucial component for overall growth optimization. At the top of the business cycle, investors will naturally be watching for recessionary triggers. But the fundamental indicators of economic health, the labor market and inflation are holding an ideal position heading into 2019. With no obvious financial imbalances emerging, the economy appears remarkably well-balanced and poised to enjoy a good period of full employment and price stability.

India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

At a time when most economies in the world are moving at a sluggish pace, India, by contrast, is seen as a reforming economy with the prospect of strong long-term growth.

Despite uncertainty in the global economies coupled with domestic challenges pertaining to slow progress on certain crucial reforms and the delay in anticipated economic recovery, the Indian market outperformed the emerging markets.

Opportunities and Threats

Your Company being an Investment Company it seeks opportunities in the capital market. The unpredictability in the stock indices in the financial year under report represents both an opportunity and challenge for the Company. There are external risks as well, such as a more profound slowdown of the global economy than anticipated or renewed tensions over trade between the US and China.

Over the years, India has emerged as one of the fastest growing economies in the world and an attractive investment destination driven by economic reforms and a large consumption base. Next few months could offer some good investment opportunities. We continue to believe that the market would still be in watchful mode till May's centre election results. Overall, in the long term, the fundamentals underlying the business drive the stock returns and they are of at most importance to the investors.

Despite the positive outlook, the economy remains vulnerable to domestic and geopolitical risks, especially economic and political changes that can affect relative prices and hurt current and fiscal account deficit. While expectations of inflationary pressures remain benign, concerns have risen on the twin deficit problem i.e current account deficit and fiscal deficit especially as portfolio investments remain subdued while trade deficit stays high. While fiscal expansion remains key to accelerating growth, it may weigh on government coffers if private investment loses steam.

In the developed markets, whilst Non-Black tea category is growing, Black tea category is shrinking (with different markets witnessing varying rates of decline). The vagaries of monsoon being unpredictable together with increase in wages and input cost could vary the profitability of the Company. The increase in cost of production could be matched if there is corresponding increase in sales realization which depends on market forces. Black tea category in India continues to enjoy good growth.

With intent to optimize the deployment of fund and capital across the core business of the Company and its subsidiaries that will enable the Company to create ongoing incremental value and sustainable business growth.

Performance

The Company operates in single segment which is to invest, deal etc in securities. The businesses of the Company are carried out by its wholly-owned subsidiaries. Uttar Pradesh Trading Company Limited is a Non-Banking Financial Company registered with RBI and primarily engaged in investment activities and whereas the other wholly owned subsidiary Cinnatollah Tea Limited is engaged in the Tea Business.

The Company aims to create sustainable vision to grow the business and make long-term strategic investments in various new ventures promoted by the Company and its subsidiaries.

Apart from its operations in investment in securities including through its Wholly Owned Subsidiaries, the Company also continues to be engaged in business of Tea Manufacturing and processing through its subsidiary company i.e Cinnatollah Tea Limited. There has been no change during the year under review in the nature of business pursued by the Company.

The performance has resulted in a profit before tax of Rs. 43.19 lacs and a profit after tax of Rs. 38.34 lacs in the relevant year as against the loss before tax and loss after tax of Rs. 36.49 lacs respectively in the previous year. The EBITDA stood at Rs 28.73 lacs as against Rs. 16.75 lacs in the previous year.

The Disclosure as stipulated under Regulation 34(3) read with Schedule V Clause B of SEBI (Listing Obligations And Disclosure Requirements) Regulations, 2015, are as follows:

- i. The Debtors Turnover Ratio, Inventory Turnover Ratio are Interest Coverage Ratio as on 31st March, 2019 are NIL.
- ii. The Current Ratio as on 31st March, 2019 is 2.25 as compared to 9.10 in the previous financial year.
- iii. The Net Profit Margin for the current financial year is 53.89% compared to 11.75% in the previous financial year. In addition to above, there was change in return on Net Worth to the tune of 3.83% as compared to 0.69% immediately previous financial year because of lower expenses.

During the year under review, the Company's income from investments in the form of dividend and income in the form of Rent was aggregating to Rs 69.91 lacs as against Rs. 58.96 lacs, during the immediately preceding year.

Neither any revenue has been earned in foreign exchange nor was there any outgo of foreign exchange during the year in the Company.

Demand for Indian orthodox teas witnessed an upswing in the international markets, since Sri Lankan tea production remained stagnant and the competitively-priced Indian teas were able to find entry in the Middle East/ Persian Gulf regions.

Outlook

With key economic policies on track, the government is expected to focus on faster policy implementation in the year ahead, with a greater focus on infrastructure development. Government push may encourage muted private investors to participate, thereby fostering private sector expenditure and boosting investments. That being said, we believe that a key step toward healthy economic growth lies in reviving private sector investment, given that these have remained at low levels over the past several quarters.

Recent policy measures by the government to improve the investment climate and boost private consumption and investment is expected to lift economic growth in the next two fiscal years. In India, continued implementation of structural and financial sector reforms with efforts to reduce public debt remain essential to secure the economy's growth prospects. Important steps have been taken to strengthen financial sector balance sheets, including through accelerated resolution of non-performing assets under a simplified bankruptcy framework.

In the run-up to the general elections, the market is filled with anxiety and expectations. So next year we are expecting a year of volatility for the Indian stock market. Investors have always been in favour of a stable government and sustainable economic growth. Elections have a short-term impact on the market, but it is the government policies and economic growth that is more important in the long run. Also, global cues will
