OPERATIONAL HIGHLIGHTS & FUTURE PROSPECTS

The Gross Profit (PBID) for the year is Rs.452 lacs against Rs. 387 lacs during the previous year. The Net Loss for the year after interest and depreciation but before Deferred Tax Assets and extraordinary items is Rs. 524 Lacs as compared to Rs.625 Lacs in the previous year. After considering Extraordinary items of Rs. Nil in the current year (previous year Rs.1900 lacs and provisions for Deferred Tax Liabilities and Fringe Benefit Tax of Rs.172 lacs (previous year Deferred Tax Assets of Rs.520 lacs), the balance losses work out to Rs.353 lacs during the year, as against balance surplus of Rs.755 lacs in the previous year.

During the year, the company had crushed a higher quantity of 1.57 lac tones of Sugarcane as against 0.93 lacs tones in the previous year, registering a growth of around 68%. The prices of Sugarcane, however, had gone up to Rs.1235 per MT as against Rs.1125 per MT in the previous year. Your Directors however, are glad to inform that the average sale price of sugar in the current year was better at Rs.18495 per MT as against Rs.16314/- per MT in the previous year.

During the year, the company has partly arranged working capital finance from Private Body Corporates against pledge of warehousing receipts issued by Central Warehousing Corporation Ltd. (CWC) with which the company has made strategic arrangement. Your Directors are pleased to inform that inspite of liquidity crunch, the company has made timely payment to cane farmers against supplies which should induce them to increase area of sugarcane cultivation.

Your directors would also like to mention that the country has received normal rains during the season which will ensure a bumper sugarcane crop. This may, though lead to higher sugarcane crushing in the coming year, result in lower sales realisation due to higher production and export benefit.

The huge benefits of Sardar Sarovar Project on River Narmada will be visible in the coming years. It is expected to boost Sugarcane crop in the area, as the Sugarcane farmers will get sufficient water for irrigation through canals, tributaries, ground water etc. Your Directors expect better capacity utilization in future.
