PERFORMANCE OF THE COMPANY

The Company's overall turnover at Rs. 85834.43 lakhs, recorded a growth of 21.6% over 1999. The performance of the Company has been commendable especially in view of the fact that major part of 2000 witnessed a slowdown in most segments of the Indian economy. This resulted in an adverse economic environment and market conditions became tight and difficult.

The Operating Profit before Depreciation, Amortisation, Exceptional Income and Taxation at Rs.17068.94 lakhs for the year ended 31st December, 2000 represents a growth of 17.3% over the previous year while Profit before Taxation grew by 9.7%, reflecting not only the extremely competitive market situation but other influencing factors. These include an additional charge for depreciation / amortisation on account of patents and trademarks and other intellectual property rights, the commencement of the amortisation charge of miscellaneous expenses representing the cost of implementation of two ERP packages involving re-engineering of business processes and systems, and the cost of deferred revenue expenses spent on renovation / interior decoration at our new office premises at DLF, Gurgaon.

Profit after Taxation shows an increase of 14.8% over 1999. This healthy double digit growth in profits has been achieved by a continuing process of value re-engineering, innovations, effective management of costs and expenses, the increasing importance being given to the improvement in product quality, increased productivity and strict control over costs and overheads despite increase in costs of inputs. The tax benefit obtained from the acquisition of the brands VIVA and MALTOVA during the year and the favourable agricultural commodity prices which prevailed during the first half of the year also helped the Company in posting favourable results for the year.
