MANAGEMENT DISCUSSION & ANALYSIS REPORT

The Oil and Gas industry perpetually seems rife with uncertainty and a potential volatility. Between rising and diminishing consumer demand, price fluctuations, and of course, geopolitical issues where one global supplier or another threatens to cut off supplies, every day holds surprises and risks. But 2022 seems to be upping the stakes in terms of risk and uncertainty. The Russian invasion of Ukraine is a reminder of how quickly changes in the geopolitical landscape can impact energy prices. Negotiations over a new nuclear deal with Iran add another complication to the energy outlook.

At the same time, the lingering impact of COVID-19 is still being felt. While cases seem to be moderating in many parts of the world, the supply chain and vaccine mandate issues are ongoing, and China's "zero-COVID" health policies pose a major risk for energy demand growth. Add to this mix the increasing measures across the globe promoting decarbonization efforts and growing activist pressure over climate change.

THE INDUSTRY :

- i) The year 2021 was another record year, as 18.5 GW of start-ups grew global capacity by 55% to 50.7 GW.
- ii) The Offshore Support Vessel (OSV) markets had a positive 2021 and demand rose by 14% on year on year to marginally exceed the levels of Q1 2020. Steady supply contraction continues, but much of the improvement has come due to a fundamental upturn in demand.
- iii) Despite the huge geo-political and economic uncertainty, there is encouraging progress for offshore Oil and Gas and a continuation of offshore winds rapid growth.
- iv) Overall, there is cautious optimism.
- v) As of early 2022, Oil and Gas markets have turned positive, with a seven year high for oil prices.
- vi) After a couple of difficult years, offshore Oil and Gas production growth is expected in 2022. Investments in offshore are also expected to be firm.
- vii) Although Oil Companies continue to preach cost control (which translates into lower rates for service providers, including charter rates for Vessels), the current environment is encouraging greater Capex Commitments to offshore Oil and Gas (\$ 86 bn is expected in 2022).
- viii) As of February 2022, there was a total of 4460 Vessels in OSV fleet. This included 1612 Platform Supply Vessels (PSVs) of more than 1000 dwt, along with 1820 Anchor Handling Tug cum Supply Vessels (AHTSVs) of more than 4000 BHP.
- ix) Although the OSV sector remains a diversified part of the offshore fleet, with an average of 42 Vessels per owner, there have been some tentative signs of consolidation in recent months. This has taken place as smaller owners have exited the upstream offshore Oil and Gas space entirely.
- x) AHTSV fleet size has contracted over recent years, reaching 2440 units as of February 2022 since start 2018. The pace of delivery ticked up in 2021 (25 units last year vs 12 in 2020).
- xi) AHTSV market conditions improved in 2021, as demand grew by 13%, across last year, with utilization reaching 66% at end 2021 up 8 pp y-o-y.
- xii) The outlook for the smaller AHTSV sector is improving. Demand rebounded strongly last year, as field development and maintenance requirements declared by COVID-19, returned to the fore (12% growth across 2021, with 412,000 BHP utilization up 8 pp y-o-y to 66% at end 2021).
- xiii) While challenges remain, small AHTSV market activity is likely to strengthen further, with the improvement seen in 2021 likely to be consolidated and build upon moving forward.
- xiv) The PSV sector saw encouraging signs of improvement in 2021 with demand rebounding 16% across the year (following an 11% fall across).
- xv) Meanwhile, PSV supply side pressure have begun to ease with the fleet size declining by 1% across 2021 and the number of laid up vessels falling 26% last year, at 413 units at end 2021 (though still equating to a significant 26% of the fleet).

OPPORTUNITIES & THREAT :

- The OSV market in Asia Pacific region is growing significantly owing to the increased deepwater exploration and production activities in the region.
- The OSV market is projected to reach USD 26.8 billion by 2026, it is expected to grow at a CAGR of 4.0% from 2021 to 2026.
- The growth of the OSV market is driven by rapid construction of offshore wind farms and deepwater oil field developments.
- The spread of COVID-19 has adversely impacted revenues of offshore vessel providers Globally Vessels have been stacked up due to a decline in demand.
- Contracts and agreements and partnerships are likely to offer lucrative opportunities for the market players during the next 5 years.
- North America is expected to be the second largest market for OSV during the forecast period from 2021 to 2026 owing to the increased offshore Oil and Gas production and offshore wind projects.
- Russia's invasion of Ukraine has prompted the U.S. and EU to impose severe economic sanctions on Russia. This tense geopolitical issue is casting a long shadow over gas supplies and prices, especially in Europe. Reduction in Russian spot sales of gas to Europe in late 2021 contributed to an energy crunch and record natural gas prices in the EU. The fear now is that fighting in Ukraine and the impact of sanctions will disrupt much larger volumes of gas, keeping prices high and undermining EU economic growth this year. If Moscow were to retaliate to U.S. and EU sanctions by cutting off all gas exports to Europe, the results would be even more onerous for European economies.

OUTLOOK :

The outlook is one of hope mixed with a great deal of uncertainty. Following the chaos caused by the pandemic, vaccinations and other mitigation measures have contributed significantly to a recovery trend for the industry. Recent years have shown that the OSV market conditions do not improve in a unified manner, with some regions seeing recovery and increased demand while others continue to battle challenges.

The Global OSV Market size is projected to surpass USD 23.60 billion by 2028 and is expanding growth at a CAGR of 7.3% from 2021 to 2028. The OSV Market was worth USD 13.78 billion in 2020. The worldwide increasing energy demand, exploration and production activities, and discoveries in offshore hydrocarbon assets are expected to boost the market's growth.

The Asia Pacific outlook for 2022 includes the continuation of tenders and contracts being issued as the oil price recovery motivates operators to move ahead with projects that were previously postponed. It is expected that operators making final investment decisions will keep the regional tendering activity at a strong pace in the coming years. As such, the overall field and rig markets are hopeful for a continuation of the positive trend in activity which will overflow into the OSV market.

A factor that has and will continue to cause turbulence in the upstream market is Russia's invasion of Ukraine. The full impact on the OSV industry remains unclear but already several offshore players have announced plans to divest their interests in the regions' projects.

Operational Performance:

The average age of the Company's fleet on a consolidated basis, stands at just over 12 years. The Company has strived to keep the Vessels on long term contracts albeit at lower rates. Unfortunately, under the present market conditions (in F.Y. 2022) this was not possible and 2 of the Company Vessels in India lay idle for at least half the year.

As regards Netherlands subsidiary, the only remaining Vessel in the fleet lay idle (after completion of a contract) for approximately 2 months. Thereafter she has commenced a long term contract in West Africa.

Your Company is keenly aware of the need to ensure that costs are monitored closely and monies are spent prudently in order to be able to obtain the highest value out of all maintenance and repairs, while at the same time conserving precious funds.

Financial Ratios :

Pursuant to the Provisions of Schedule V – Part B, Clause I, Sub-Clause (i) & (j), the details of the significant changes in the financial ratios (i.e. change of 25% or more as compared to the immediately previous financial year) are as follows :

- 1] The change in Inventory Turnover Ratio : Not Applicable.
- 2] The reduction in Interest Coverage Ratio by 92.09%. This is due to reduction in earnings mainly due to idling of vessels during the year.
- 3] The reduction in Net Profit Margin by 230%. This is mainly to the fact that earnings fell due to idling of vessels, while operational costs did not reduce proportionately. Additionally, the loss on restatement of long term loans availed in USD was substantially higher for the year.
- 4] The reduction in Return on Net Worth by 427%. This impact is mainly due to significant reduction in operating income as also the loss on re-instatement of long term loans availed in USD.

RISKS & CONCERNS:

In 2022, the results of a supply shock with a tight oil supply and supply disruptions drove the price of oil well north of \$100 / barrel to near record highs. Volatility is likely to continue for some time.

Potentially in the not so distant future, the world could see an oversupply scenario, if OPEC makes good on its commitment to continue unwinding the supply cuts it made in 2020, and U.S. unconventional production grows as much as some analysts are forecasting. If these events occur (and of course the effects of the war tapers off), organizations may end up with an oversupply of oil, with as much as an extra 6.4 million barrels per day late this year. Add to that a potential new nuclear agreement with Iran and the volume of new oil coming onto the market this year will be even higher; some estimates have Iranian exports growing by up to a million barrels a day within a few months if a new pact is struck. Of course, if a U.S.-Iran deal occurs, it might factor into OPEC's decision to continue unwinding its cuts.

However, as of now, on the flipside, Russia's invasion of Ukraine, and the risks that it will lead to a further curtailment of Russian oil exports – including more drastic measures from Europe is keeping price of oil "buoyed". Outrage over the invasion has led to some self-sanctioning by western buyers; the US has already initiated a ban on Russian oil, and the European Union (EU) is actively contemplating one. The IEA currently predicts as much as 3mm bpd of Russian exports could be taken off the market. On to the demand side, higher energy prices from the Ukraine crisis could have a knock-on effect on international economic growth.

Meanwhile, China appears to be sticking with its "Zero COVID" policy, which includes severe lockdowns and other business-limiting measures. What's more, the country's economic and environmental policies may slow down economic expansion, and therefore decrease its demand for oil. This could have a ripple effect on the global economy, making forecasts of increased global oil demand of 3.3 million barrels per day illusory.

For the time being, a tight oil market is experienced, although many are forecasting a growing oil surplus beginning in the second half of the year.

INTERNAL CONTROL SYSTEMS AND ADEQUACY:

Your Company continues to emphasize the importance of the set-up of suitable systems which would drive the performance of its various "verticals". A regular audit of systems and processes is carried out and findings help your Company improve continuously.

Cost management is an important issue for the Company and the Technical, Procurement and Health & Safety teams are continuously exploring ways and means to be able to manage assets at optimal costs – but never at the expense of safety.

HR AND PEOPLE:

The Employees of the Company continue to be the most important and valuable asset of your Company. The Company continues to hold small and effective training modules for its employees.

Special attention is being paid to this in order that your Company is able to retain good talent.

In line with the Ministry of Corporate Affairs (MCA) Circular No.17/2020 dated April 13, 2020, the Notice calling the AGM has been uploaded on the website of the Company at www.globaloffshore.in. The Notice can also be accessed from the website of the Stock Exchange i.e. BSE Limited at www.bseindia.com. The AGM Notice is also disseminated on the website of CDSL (agency for providing the Remote e-Voting facility and e-voting system during the AGM) i.e. www.evoting@cdslindia.com.

THE INSTRUCTIONS FOR SHAREHOLDERS FOR REMOTE E-VOTING ARE AS UNDER:

- (i) The voting period begins on Monday, 26th September, 2022 from 10.00 a.m. and ends on Wednesday, 28th September, 2022 at 5.00 p.m. During this period shareholders' of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date Wednesday, 21st September, 2022 may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.
- (ii) Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting.
The shareholders should log on to the e-voting website www.evotingindia.com.
- (iii) Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09.12.2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. however, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

- (iv) In terms of SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. Shareholders are advised to update their mobile number and email id in their demat accounts in order to access e-voting facility.
