Annual Report 2003-2004

MANAGEMENT DISCUSSIONS AND ANALYSIS REPORT

1) INDUSTRY: -

Your Company is engaged in the business of manufacturing Bright Steel Bars and wires and is in the market to sell domestically and in exports since 1974. The Quality control and manufacturing process consist of in-house treatment and has standard quality name for more than 2 decades. Due to financial constraints, the company is been depending on business of processing steel on job work basis to maintain better economics and has successfully been able to achieve job work production to the tune of 25% totaling the capacity utilization up to 35%. The Company also has indulged in the special heat treatment job in order to establish future market of Hardened & Tempered steel for exports as well as domestic, which will pave the path of revival and re-instating the strength of the company.

2) DOMESTIC MARKET: -

There has been a substantial change of steel requirement in the domestic market for the consumption of Bright Steel Bars and wires. Majority of Bright Steel Bars and wires are used for making the various kinds of components for Automotive industry, Machinery manufacturing industry, Dairy & food processing industry, chemical and fertilizer industry, electronics and electrical appliances industry along with computer industry. Due to global interaction and industrial change in domestic market, various companies have invested especially in automobile industry and electrical appliances industry along with computer industry. The demand of Bright Steel Bars has improved and changed its face in the last 5 years. The standards of specifications from the Indian standards even to various international standards like American, British, German, Japanese etc. and the steel makers who are the basic raw material suppliers to Bright Bar industry has undergone change in the supply conditions as per the international standards.

The gestation period is now over and the demand of international standard specifications for Bright Steel Bars have been stabilized and established. The scope of developing this business in domestic market is going through ISO 9000 audit requirement, has become necessary. Also, the economic conditions with all the industrial scenario, which is going through recessionary trends in the last 5 years that seems the hope of changing to the better side of business accomplishments.

3) INTERNATIONAL MARKET: -

The Company is well established for selling and marketing Stainless Steel Bright Bars internationally in most of the developing countries and has maintained their market share. In the international scenario for Stainless Steel Bright Bars business has been on the greater recessionary trend for more than 6 years due to which the company has to go through the constant survival problems. But, at the same time, due to long term standing in the market, the company has been able to maintain its market outside India for Stainless Bright Bars and capturing orders and executing the same with the various financial arrangements. Short term spurts of improved demand has been affecting the company to regain its position from time to time in the international market, but the consistent improvement has been lacking in the international market since long time. The company has still been able to remain in the market even with these trends as well recessionary trends. As known worldwide, Indian steel has faced a lot of anti-dumping suits for Bright Steel Bars from European Community, U.S.A., Canada, the company has successfully being able to fight such anti-dumping petition and retain reasonable supplies to these countries and struggle to retain its position even at low profitability.

4) INTRODUCING SPECIAL HEAT TREATED BARS IN ALLOYS & SPECIAL STEEL & STAINLESS: -

The Company has in the last 5 years developed various heat treatment processes and successfully supplied commercial lots of heat treated bars to specific standards in the international market in American, German standards. The scope of business is huge and normal, as this product is utilized and acceptable for various applications in the Engineering industries including Petro Chemical, Oil & Natural gas and Automotive industries worldwide. The company is looking for better profitability business and this kind of supplies keeping the edge over the other competitors. Stringent quality standards and method of processing has been introduced to achieve better reliability and traceability for these kind of products which is mandatory for extending marketing. The international players and competitors for such products are from Italy, Spain and Korea, but with such renowned and established competitors, the company has been able to stand in the international market, establishing its product range internationally.

5) GOVERNMENT POLICIES: -

The Government policies in general have been quite encouraging to all industrial units in the country. Though the EXIM policy since more than 8 years has been consistently under review and changes by the Government, the company has time to time faced ups and downs but still have been selling through adopting policies in regards to imports and exports and also have been competitive in the international market. More pragmatic policies are expected from the Government in future and the company is looking for better growth and support from the Government to regain its strength and re-structuring the company to the healthy financial structure and bailing out of BIFR (Sick unit).

6) HUMAN RESOURCES/INDUSTRIAL RELATIONS: -

Since 1998, the company has been registered with BIFR and declared Sick due to wiping of the reserves taking the losses over the period of 4 years of recession. The Company has been approaching BIFR and their operating agent for the re-structuring in order to survive. Various schemes have been in consideration for the approval. In the meantime, the company had maintained more than 100 employees since 1998, reducing from approx. 500 prior to going to BIFR. The company has successfully executed the VRS in the year 2001-02 and have employed the required strength after the execution of VRS and brought the number of employees to the tune of approx. 100 from April 2002. Due to this step, the company is looking forward to re-work its economies meeting the production levels with considerable reduced cost of production. But at the same time the company is very conscious of the need, not only control head count but also to further reduce the manpower the vacant positions of separated employees are being filled up only based on urgent necessity under unavoidable circumstances while re-deployment of the existing staff is done on continuous basis. This step will pave its path to greater achievements in the near future.

7) CAUTIONARY STATEMENT: -

This report to the Shareholders is in compliance with the Corporate Governance Standard incorporated in the Listing Agreement with the Stock Exchanges and as such cannot be construed as holding out any forecasts, projections, expectations, invitations, offers etc. within the meaning of applicable securities, laws and regulations. This report basically seeks to furnish information, as laid down within the different headings provided under the sub-headed Management discussions and Analysis to meet the Listing Agreement requirements.
