PERFORMANCE REVIEW**Operational Highlights**

The fiscal year 2009-10 was a challenging year for Indian Economy. Impact of significant deceleration in the growth rate in the second half of 2008-09 was felt even during the first half of 2009-10. There was added uncertainty on account of delayed and subnormal south – west monsoon, which had undermined the kharif crop in the Country. Major concern during the second half of 2009-10 had been the emergence of double digit food inflation. It is in this environment that the performance of your Company during 2009-10 can be regarded as reasonably good.

Despite several constraints, the Company achieved overall satisfactory production performance during the year under review. Some of the major plants of the Company were operated at over 100% capacity utilization. Ammonia Plant produced 4,45,505 MTs of Ammonia with capacity utilization of 100%, Formic Acid Plant produced 15,886 MTs of Formic Acid with capacity utilization of 158.86%, Acetic Acid Plant produced 1,40,140 MTs of Acetic Acid with capacity utilization of 140.14%, Weak Nitric Acid Plant (WNA) produced 2,81,049 MTs of WNA registering capacity utilization of 113.56%, CNA-I and CNA-II Plants produced 68,906 MTs of CNA registering average capacity utilization of 104.40% and ANP Plant produced 1,66,547 MTs of Ammonium Nitrophosphate registering capacity utilization of 116.88%. Besides, Urea Plant produced 6,01,681 MTs of Urea with capacity utilization of 94.60%, Aniline Plant produced 33,848 MTs of Aniline with capacity utilization of 96.71% and TDI Plant produced 12,974 MTs of TDI with capacity utilization of 92.67%.

Total 23 new records were established during the year in terms of production, marketing and despatch.

The Company achieved a sale of 10.30 Lac MTs of Fertilizers. In addition, the Company also handled and sold 1.13 Lac MTs of Imported Urea as a part of its trading activity. Highest ever dispatches of Fertilizers directly to retail outlets in Gujarat by road was achieved, resulting into a significant saving in freight cost. The Company handled 6,67,589 MTs of Industrial Products during financial year 2009-10 vis-a-vis 5,29,528 MTs of Industrial Products handled during financial year 2008-09, showing an increase of around 26%.

A catastrophic failure of Waste Heat Boiler (WHB) E-703, in Ammonia Plant on 9th February, 2010 resulted into disruption of Ammonia production. A partial shutdown of Ammonia Plant had to be taken for the repairs of WHB E-703. Repaired WHB E-703 has been put-back into operation and all the plants have been recommissioned effective 6th June, 2010. The production of Ammonia, Urea and ANP has been restored. All the plants of the Company are now operating smoothly.

We are seriously concerned about the failure / breakdown of the plants. An Upkeep Plan for countering failure susceptibility due to ageing of plants and supporting facilities has been approved. All critical equipments / instruments which have potential failure or are risk prone are being replaced in a phased manner. It is also planned to revamp / replace the ageing plants which have lived their life.

As reported last year, the Company is implementing various projects under its 'Growth Plan'. The Company has tied-up term loans of Rs.2,001 Crores from Banks, etc., for its new projects. In addition, as per the policy of Government of India, the Company is implementing Ammonia Plant Feed Stock Conversion Project at a cost of Rs.1,215.74 Crores. Approval from Department of Fertilizers, Government of India for this project has been received with zero date commencing from 14th December, 2009. The Company has already awarded LSTK contract for this project to M/s Larsen & Toubro Ltd., Mumbai and has also tied-up term loans of Rs. 1,154.53 crores from banks for this project. With a view to utilizing the spare capacity of existing Gasifier Train, the Company is exploring a new Formic Acid Plant of 50,000 MTPA. The Company is also contemplating setting-up projects in Joint Venture with Gujarat State Fertilizers & Chemicals Ltd., and Gujarat Alkalies & Chemicals Ltd., at Dahej in Gujarat.

This will lead to an increase in agricultural productivity and consequently better returns for the
