The Companies Bill, 1997, sought to lay down the operative provisions to regulate the buy back of shares/securities by companies. The said bill has not yet become the law. It is expected that, in due course of time, the law will be amended to allow such buy back.

It is proposed to buy back shares or other securities giving right to subscribe for shares of the Company, from the existing security holders on a proportionate basis and/or from the open market and/or from the lots smaller than market lots of the securities (odd lots) subject to necessary enactment in this regard.

The resolution, if approved, will be operative and given effect to from the applicable date as may be prescribed in this regard.

The approval of the shareholders for such buy back of shares was obtained at the Extra Ordinary General Meeting of the Company, held on 24th February, 1995. The resolution as set out in this Notice is being proposed again as the law in this regard has so far not been amended and the special resolution passed on 24th February, 1995 may not be valid after 23rd May, 1996. Based on the provisions of the Companies Bill, 1997, resolution to be passed at the ensuing Annual General Meeting is valid till 22nd December, 1999.

#### OPERATIONS:

The year 1997-98 is a watershed year in the history of your Company. It is the year your Company embarked on an extensive restructuring of its activities so that its foundations are strengthened to meet the challenges of the future in the new liberalized environment. We are confident that the steps undertaken by the Company's management will see it emerge as the most cost-effective producer of polybutene in India with footholds in the domestic and export markets.

The various initiatives taken in this regard are:

- 1) Strategic alliance with Indian Petrochemicals Corporation Limited (IPCL)
- 2) Restructuring the Company's activities through.
  - Modification of Organisation structure.
  - Focusing on human resource development through training of existing employees and hiring experienced, skilled work force to improve efficiency and productivity.
  - Embarking on a cost-cutting program involving all departments and all levels of the Company.
  - Changing product mix to focus on products with value addition.
  - Strengthening R & D efforts to work towards new product development and value addition.

The source of GPL's activities is C4 Raffinate feed stock, which is supplied by Indian Petrochemicals Corporation Limited (IPCL). Over-capacity in the polybutene industry coupled with the high sales tax structure of Gujarat State led to a situation where GPL's cost structure was too high for it to compete effectively in the market place. As a result of this, GPL was unable to secure an order from the largest buyers of polybutene in the Indian Market. This substantially affected the Company's viability and necessitated a total revamp of the set-up.

There was an urgent need to restructure the Company to improve its cost structure, and hence GPL signed

## Gujarat Petrosynthese Limited

a Memorandum of Understanding with IPCL towards a conversion-marketing tie-up. This tie-up involves GPL procuring C4 Raffinate feed-stock from IPCL to convert it into polybutene on their behalf. As a result of this tie-up, polybutene made by GPL will be marketed by IPCL through its distributorship network all over India at competitive prices. The export market is also opened to GPL through IPCL's export network. We remain indebted to IPCL for their continued support and assistance.

Furthermore, your Company has made substantial changes in the organisation structure and staffing of key posts. The success of any company lies ultimately in the people who work in it- their skills, their efficiency and productivity. Therefore, your company has embarked on a consistent effort to hire new people with experience and skills, as well as to provide more on-the-job training to existing employees.

In addition, your Company has also put in place a tremendous cost-cutting across all levels of the organisation and all departments. And emphasis has been placed on reducing wastage of materials, time, labour and money. New systems of control and operations are being developed. We have also focussed our product mix on those products that bring in value to the Company.

In order to ensure continued growth, your Company has revamped its R & D program and started to work on new products that could develop into major profit centres for the Company. This area will continue to receive more focus in the future.
