OPERATIONS:

The production of BOPP film for the year under review

was 5468 tonnes as against 5396 tonnes in the previous year. The production remained at the same level since the plants were operating at optimum capacity.

The production of Cast Film during the year was 302 MT and the company is now able to promote the product so as to increase the production and sales further.

During the second half of the year, the working of the company was adversely affected on account of new capacities coming on stream in the BOPP film industry. However, taking into account conditions under which the company was operating the performance for the year can be considered as satisfactory.

CURRENT YEAR:

The project for substantial expansion of BOPP Film making capacity at the greenfield site near Karjan in Vadodara district has since been completed and commercial production will start shortly.

The production including trial production for the first two months of the year is 1180 tonnes and will increase during the year substantially because of the additional output coming from the new Karjan plant.

Inspite of continued adverse demand supply situation your company is confident of selling its entire production because of its established customer base and strong sales network. Further, the company has successfully re-entered the export market to broad base its over all market.

Considering the available fiscal incentives and for reasons of better management and control of operations, it was thought prudent to shift the operations of the Dadra Unit in the Union Territory of Dadra and Nagar Haveli and centralise with existing plants near Vadodara.

RESEARCH & DEVELOPMENT:

The Company has earned its eminent position in the BOPP industry in India through continued efforts in R & D activities and films which were under test and trial have been commercially launched in the current year.

Other developments in the pipeline are targetted to yield new applications which can increase market of BOPP film and improve the product mix of your company in future.

PROPOSED RIGHTS ISSUE

Your Directors have proposed to make a Rights Equity Issue in the near future to augment long term resources to meet the increased working capital requirements consequent to the implementation of the expansion project.
