MANAGEMENT DISCUSSIONS AND ANALYSIS**1. Industry Structure & Developments**

India has been making rapid strides in the field of Bulk Drugs and majority of these drugs required in India are manufactured in India. India also happens to be a major exporter of bulk drugs all over the globe, particularly to Europe and US markets.

Your Company is in the business of manufacturing of bulk drug called "Rifampicin" produced by fermentation process. Indian fermentation industry is also quite sizeable. However it is small when compared to the drug industries manufacturing drugs by synthetic route.

2. Opportunity, Threats, Outlook, Risk and Concerns

The Indian fermentation industry does not have a level playing field as compared to China. The power cost, labour cost and raw material cost are much lower in China therefore the Company finds itself in very difficult situation.

3. Segment-wise or Product-wise Performance

Your Company is producing active pharmaceutical ingredients like Rifampicin and Lovastatin which belong to the same segment of industry.

4. Internal Control Systems and their adequacy.

The company has adequate internal control procedures commensurate with its size and nature of business. The internal control procedures and systems ensure efficient use and protection of resources and compliance with the policies, procedures and statutes.

5. Material Developments in Human Resources and Industrial Relations

Fermentation industry is a high technology Industry. Continuous efforts are being made in training the employees through In-house training programs to suit the Company's requirements. Industrial Relations have been generally cordial and healthy.
