1. DIVIDEND:

Your Directors do not recommend any Dividend for the year 2010 – 2011.

2. MANAGEMENT ANALYSIS:

2.1 Industry Structure & Development:

The textile industry occupies a unique place in the economy of the country by virtue of its contribution to Industrial output, employment generation and Foreign exchange earnings. Even though the textile industry has the distinctive advantage in respect of raw material and skilled labour, the industry is suffering from technology obsolescence which in turn affects the quality, productivity and cost effectiveness. The textile and clothing are closely related with textiles providing major input to the clothing industry. International trades were regulated by the Agreement on Textiles and Clothing (ATC) at the multilateral level with various bilateral and regional trade agreements. The ATC called for phasing out of quota restrictions by putting pre-condition to the formation of World Trade Organization (WTO). The textile and clothing sector has become subject to the World Trade Organization (WTO), after removal

of quotas from 1st January 2005. China has been re-imposed with restrictions both from E.U. and the U.S.A. which helps India to further increase its presence in the global apparel industry. The Indian textile industry plays a vital role in the Indian economy by contributing to GDP, generating employment and earning foreign exchange. An estimated 38 million people are directly employed in the textile industry in India and contributes to 4% of GDP and 20% of total export earnings. India currently exports more than one hundred garment product categories and out of this, cotton apparel exports dominate, contributing nearly 76% by value and synthetic constitutes 12%. Indian textile exports is expected to grow from the current levels to US\$ 50 billion by 2010, consequent to quota removal, apparel being US\$25 billion.

2.2 Manufacturing of Note-Books:

The company has set up plant for manufacturing of note books keeping in view the market as the product is highly used in the Consumer market and the company can avail the maximum benefits from this product. The company had commenced its production of note books in December, 2008 and also marketed the same during the said period. The sales had considerably reached to an higher extent in a very short period. Your company expects that the turnover of this product will still rise in the near future.

2.3 Opportunities & Threats:

After dismantling of quotas, India seems to benefit due to raw material, design skills and skilled labour advantages. India is the world's third largest producer of cotton, second largest producer of cotton yarn, third largest exporter of cotton fabric and fourth largest exporter of synthetic fabric. With the establishment of training institutions like National Institute of Fashion Technology (NIFT), many high quality designers, who are able to create modern designs and interact with the buyers, are emerging. This is a distinctive advantage that Indian companies have, and which has not yet been exploited. India already enjoys a significant competitive advantage in terms of labour cost per hour over developed countries like USA, EU, and Hong Kong, Taiwan Singapore etc. India is rich in traditional workers adept at value adding tasks such as embroidery, minor work, and beading and at marketing complex garments. Apart from these, USA and EU imposed quotas on China recently, which would benefit India in consolidating its market share and good political relations with these two countries would further help. In spite of above advantages that India has, there would be pricing pressures in view of dismantling of quotas as new small and medium manufacturers would crop in not only within India but also from other countries where similar quotas were imposed earlier. Also India has geographical disadvantage which takes little longer time to reach its products to the key markets. It seems the price has been, more or less, stabilized and the buyers are looking for quality manufactures, even if it costs little more.

2.4 Risks and Concerns:

The risk factor is that with the opening up of international markets, after removal of quota system, there may be pricing pressure on products due to various suppliers who will start competing for the same orders in the international markets.

Apart from the above the Industry is exposed to foreign currency risk. The Government of India has instituted several policies to promote the growth and these include interest rate subsidies, duty/tax reimbursement schemes etc. Withdrawal/ termination of any of these policies / schemes may adversely impact the profitability of the Company. Also wage costs in India have been significantly lower than the wage costs in the developed countries for skilled professionals in the textile industry, which has been our competitive strength. Wage increase in India may prevent industry from sustaining this competitive advantage and may negatively affect our profit margins.

2.5 Internal Control System and their adequacy:

The Company is committed to maintaining an effective system of internal control for facilitating accurate, reliable and speedy compilation of financial information, safeguarding the assets and interests of the Company and ensuring compliance with all laws and regulations. The Company has an internal control department to monitor, review and update internal controls on an ongoing basis. The Company has put in place a well-defined organization structure, authority levels and internal guidelines for conducting business transactions. The minutes of Audit Committee would be reviewed by the Board for its suggestions/recommendations to further improve the internal control systems.

The Audit Committee periodically reviews audit plans, observations and recommendations of external auditors with reference to significant risk areas and adequacy of internal controls.

2.6 Financial Analysis:
