### DIVIDEND

Taking into account the good performance of the Company, Your Directors recommend a dividend of 20% on the Equity Shares of Rs. 10/- each for approval by the Members. Your Directors also seek the ratification of the dividend paid to 4% Redeemable Preference Shareholders on redemption. The total dividend, if approved by the shareholders at the Annual General Meeting, would absorb Rs.139.38 Lacs out of profits for the year. Dividend distribution tax payable amounting to Rs.23.69 Lacs has been appropriated out of profits.

### PROSPECTS IN THE COMING YEAR:

Prior to diversification of the activities into trading and manufacture of sponge iron the thrust area of the company was ship breaking. However now the ship breaking is not core business of the Company. There was difficulty in getting the ships at reasonable price for breaking, hence the company could not carry out any ship breaking activities during the year under report and till date. The vessels, which were earlier refurbished and put into use by paying higher insurance premium is completing or nearing completion of their extended life and these vessels have started arriving for breaking. Further with the sign of US economy and other world economy going into recession mode, the international freight rate has been affected and therefore the chances of vessels put into voyage again is a remote chance as most of these old ships will be fetching more than its original cost now, due to steep increase in the price of iron and steel.

With the changed circumstances, the company is hopeful that in the coming period the company will be able to utilize the ship breaking capacity also. The trading activities of the company are doing well and are contributing considerably to the profitability of the company. The sponge iron division of the company is also doing extremely well after overcoming the initial teething problem. The financing and investment

division of the company is also doing well, except for the stay imposed by the SEBI on the pay-out for a particular transaction which the company has entered in The National Stock Exchange Ltd.

## MANAGEMENT DISCUSSION AND ANALYSIS

### a) Overview:

The company is now a diversified company with ship breaking, manufacture of sponge iron, trading, investment and money lending activities.

### b) Segmental Review:

#### i) Shipbreaking

The ship breaking industry is poised to grow in the coming period. The numbers of ships beached for breaking at Alang Ship Breaking Yard during the first quarter of the current financial year is 38 ships aggregating to 216473 LDT compared to 33 ships aggregating to 150274 LDT in the same quarter of the previous year, an increase of 15% in terms of number of ships and 44% in terms of LDT.

#### ii) Steel & Power

The iron and steel industry is doing well and with the expected boost in the economy the requirement of steel is slated to increase. Sponge iron is one of the basic raw materials for the iron and steel industry and therefore the Directors are confident that the sponge iron division of the company is expected to do better in the coming year.

The implementation of the co-generation power plant is also taken up by the company and expected to add to the profitability of the unit once it is completed

#### iii) Trading

The trading activity of the company is mainly in the iron and steel sector and considering the present market for the iron and steel, the same segment is also expected to grow in the coming years

#### iv) Investment

The Company invests in the shares and securities in the stock market with a view to earn short term and long term capital gain. Though it has received a jolt on account of the staying of the pay-out of one of the transaction entered by the company in The National Stock Exchange Ltd, the company is confident that the company will be able to continue to earn reasonable return of the investment as well as on money lending activities in the coming years also.

#### v) Money Lending

Money lending is not main business of the company. As and when surplus funds are available with the company, the company lent the same with a view to earn interest.

The segmental results for the year are summarised as under.

(Rs. in Lakhs)

Particulars	Financing	Ship-breaking	Trading	Steel & Power	Total
a) External Sales	293.84	0.10	6953.46	7567.22	14814.62
Inter segment Sales	0.00	0.00	0.00	0.00	0.00
Total Revenue	293.84	0.10	6953.46	7567.22	14814.62
b) Total Revenue of each segment as a % of total	1.98%	0.00%	46.94%	51.08%	100%

d) Segment results as a % of total	25.13%	-2.22%	15.90%	61.19%	100%
e) Segment Assets	1220.69	120.60	3830.89	5012.38	10184.56
f) Segment Assets as a % of total assets	11.99%	1.18%	37.61%	49.22%	100%

**c) Review of operation:**

As outlined in previous report, the company could not purchase any ship for breaking during the year under report and the ship breaking division has incurred loss during the year under report. The trading and steel and power division has performed well. As there was no ship breaking activities, the surplus funds available with the company were given on interest and the company could earn considerable amount of interest. The short term and long term capital gain arising out of investment activities are less compared to the previous year. As there was not ship breaking activities, the gross and net turnover of the company has a negative growth. However with higher contribution from other segment, the profitability of the company has shown quantum jump in profit before tax of 119% and profit after tax of 83.78%. The net profit after exceptional item has shown a growth of 145% over the pervius year.

**d) Financial Review and analysis:**

- Net Increase in investments	61.67	(491.03)
- Net capital expenditure	151.83	182.71
- Increase in cash and cash equivalents.	—	77.69

**f) Risk Management**

The Company is exposed to the risk from the market fluctuations of foreign exchange as well as the fluctuation in the price of iron and steel. In the ship breaking division, the raw material is old ship which is purchased from the international market on credit ranging upto 180 days. Though the Company is not hedging or covering the foreign exchange requirement, the company is regularly monitoring the foreign exchange movement and suitable remedial measures are taken as and when felt necessary. Though the company is employing such measures, the company is still exposed to the risk of any heavy foreign exchange fluctuation.

Likewise the company's finished products are iron and steel and the price of the same is linked to the market rate on daily basis. Any up and down in the price of the iron and steel will affect the profitability of the company. However based on the past trend a major down fall in the price of iron and steel is not expected.

In addition to the above, the company is also exposed to the risk of fluctuation in the stock exchange as the company is investing its surplus finds in the stock market in order to earn capital gain. However the Directors considering their past experience in the line, is confident that the company will not face any major set back in this area.
