The total dividend, if approved by the shareholders at the Annual General Meeting, would absorb Rs. 12333334/- out of profits for the year. Dividend distribution tax payable amounting to Rs. 2096050/- has been appropriated out of profits.

### PROSPECTS IN THE COMING YEAR

All the units including Ship Breaking, Sponge Iron and Trading have recorded significant increase in terms of production and sales turnover. Prior to diversification of the activities into trading and manufacture of sponge iron the thrust area of the company was ship breaking. During the few couple of years because of not so encouraging business environment and difficulty in getting the ships at reasonable price for breaking. However, during the financial year 2008-09, ship breaking industry at Alang Ship Breaking Yard seen a complete turn around and it is booming like never before. To join the flow of the market the company also resumed its ship breaking activities at ship breaking yard at Alang and has done good business during the year under report. Moreover,

fluctuating and volatile prices of old Ships, Iron and Steel products having been reasonably stabilized and the inventory levels of the company and its market position, all the segments of the company, viz. Ship Breaking, Sponge Iron and Trading, are expected to see manifold increase in terms of Gross Revenues and Net profit Margins in the coming year.

With the changed circumstances, the company is hopeful that in the coming period the company will continue its ship breaking activities and take it to the level of extended growth and will contribute more to the overall growth of the business of the company. The trading activity of the company is doing well and is contributing considerably to the profitability of the company. The sponge iron division of the company is also doing well after overcoming the initial teething problem. The financing and investment division of the company is also doing well. Your directors see a very positive and bright future prospects ahead for the company looking to the prevailing upward trend in the Iron and Steel sector in India and internationally.

### MANAGEMENT DISCUSSION AND ANALYSIS

#### a) Overview :

The company is now a diversified company with ship breaking, manufacture of sponge iron, trading & investment and money lending activities.

#### b) Segmental Review :

##### i) Shipbreaking

The ship breaking industry seen a complete turn around during the year under report and company could also resume its ship breaking activities and has done good business. However, due to heavy fluctuations in prices of old ships, dollar rupee exchange rates and consequent effects on sales prices of the ship breaking products, the company's net profit margins have not been up to the expected levels. Now, the market has got stabilized and company's ship breaking unit is expected to grow more in the coming period. The numbers of ships beached for breaking at Alang Ship Breaking Yard has seen a manifold increase and the trend is expected to continue in the current financial year also.

##### ii) Steel & Power

The iron and steel industry is doing well and with the expected boost in the economy the requirement of steel is slated to increase. Barring some effects on net profit margin due to heavy price fluctuations during the year which have now stabilized, the unit has delivered good results and has moved further towards its sustained path of growth. Sponge iron is one of the basic raw materials for the iron and steel industry and therefore the Directors are confident that the sponge iron division of the company should continue to do better in the coming years.

##### iii) Trading

The trading activity of the company is mainly in the iron and steel sector and considering the present market for the iron and steel, the same segment is also expected to grow in the coming years.

**iv) Investment**

The Company has been very cautious in investment in the shares and securities in the stock market with a view to earn short term and long term capital gain. Though it has received a jolt on account of the staying of the pay-out of one of the transaction entered by the company in the Bombay Stock Exchange which is now settled, the company is confident that the company will be able to continue to earn reasonable return of the investment in the coming years also.

**v) Money Lending**

Money lending is not main business of the company. As and when surplus funds are available with the company, the company lent the same with a view to earn interest.

The segmental results for the year are summarized as under.

(Rs.in Lakhs)

Particulars	Financing	Ship-breaking	Trading	Steel & Power	Total
a) External Sales	241.78	721.13	8015.89	8786.19	17764.99
b) Inter segment Sales	306.23	0	0		306.23
c) Total Revenue	548.01	721.13	8015.89	8786.19	18071.22
d) Total Revenue of each segment as a % of total	3.03%	3.99%	44.36%	48.62%	100%
e) Segment Results [Profit/(Loss)]	457.29	14.70	178.24	212.72	862.94
f) Segment results as a % of total	52.99%	1.70%	20.65%	24.65%	100%
g) Segment Assets	2564.83	989.40	1588.31	4128.08	9270.62
h) Segment Assets as a % of total assets	27.67%	10.67%	17.13%	44.53%	100%

**c) Review of operation :**

As outline in previous report, the company has resumed its ship breaking activities during the year under report and the ship breaking division has also done good business. The trading and steel and power division has performed also well. Any surplus funds available with the company were given on interest and the company could earn considerable amount of interest. The short term and long term capital gain/ (Loss) arising out of investment activities are less compared to the previous year. Though the over all turnover of the company has increased, the profitability has not increased in tandem with the same. While the turnover has increased by around 20%, the profit before tax has decreased due to several market factors as already elaborated in earlier paras.

**d) Financial Review and analysis :**

**Performance :**

- Net Increase in investments	(67.24)	61.67
- Net capital expenditure	158.77	151.83
- Increase in cash and cash equivalents.	0.00	-

**f) Risk Management :**

The Company is exposed to the risk from the market fluctuations of foreign exchange as well as the fluctuation in the price of iron and steel. In the ship breaking division, the raw material is old ship which is purchased from the international market on credit ranging up to 180 days to 360 days. Though the Company is regularly monitoring the foreign exchange movement and suitable remedial measures are taken as and when felt necessary. Though the company is employing such measures, the company is still exposed to the risk of any heavy foreign exchange fluctuation.

Likewise the company's finished products are mainly re - rollable scrap generated from ship breaking and the price of the same is linked to the market rate for iron and steel. Any up and down in the price of the iron and steel will affect the profitability of the company. However based on the past trend a any further major down fall in the price of iron and steel is not expected.

In addition to the above, the company is also exposed to the risk of fluctuation in the stock exchange as the company is investing its surplus funds in the stock market in order to earn capital gain. However the Directors considering their past experience in the line, is confident that the company will not face any major set back in this area.

### **DIRECTOR'S RESPONSIBILITY STATEMENT**
