Havell's India Ltd.
Annual Report

Dear Shareholders,

Havells has taken a giant leap of faith in this year demonstrating both its commitment to growth and its ambition to expand its footprical globally, by deciding to acquire SLI Sylvania business worldwide. While Havells continues to grow and increase its strength in India by intensifying its market reach, by setting up world class manufacturing plants, by addition of new product groups, by innovating and developing new technologies, we were always preparing ourselves in all our operations and human resource capabilities for an acquisition which can give us the access to global markets with the critical size which can help us leap-frog to the next level.

At Havells, the ability to foresee and consequently capitalize on change, has enabled us to constantly expand the sphere of leadership. Our recent acquisition of Sylvania, only re-emphasize these attributes. SLI Sylvania is one of the world's largest manufacturers of artificial light sources with a strong presence in Europe and Latin America while expanding rapidly in fast growth markets in Asia. The company has a portfolio of strong brand names which it uses to cater to different geographies, product groups and market segments. Sylvania is used for light sources worldwide except for USA, Canada, Mexico, Australia and New Zealand, where it goes with SLI brand. The other brands include premium architechtural lighting & fixtures brands like Concord:marlin, Lumiance, Claude, Linolite, and Zenith. Offering a full line of lamps and fixtures for professional and consumer lighting, Sylvania focuses its resources and technical know-how on innovative and customer orientated lighting solutions.

Sylvania is one of the most globally recognized brands in the industry and has been there for over a century. The synergy between SLI Sylvania and Havells offers tremendous opportunities for the newly created company and its customers and potential customers. Havells Sylvania now possesses a global manufacturing and distribution platform, which supports a rapidly expanding international position, especially in high-growth developing markets.

We will learn the culture of all the different countries, where Sylvania conducts business, and add the Havells vision and philosophy to take our combined entity to bigger successes. We have to constantly adapt our organizational structures and processes to the changing environment. I strongly believe that the attributes that will make us stand out and will produce consistent results over the next decade will be our diversity, our technology, our strategic focus, our geographic reach, and above all, the culture and philosophy of our company. In case of Havells the culture is founded on integrity, honesty and mutual trust.

Havell's India Limited in the meantime continues to grow at its unabated pace, with revenue growth of 54% and profit after tax growth of 62%, with a strong performance in all product segments. As we continue to be very confident on the future business prospects, we have been investing in expanding infrastructure of manufacturing, distribution and human capital. While we had a capital expenditure of Rs.100 crore last year, we have plans for close to Rs.200 crores this year as we expand capacities in Switchgear, Cables, Fans, and Lighting, besides setting up plants for three new product categories, namely, Electric Motors, Power Capacitors, and "Havells" Modular Plate Switches. These projects will be going on-line in the current year and shall serve as a growth catalyst from the next year.

Havells recognizes the responsibility of every corporate citizen towards the welfare of the society and continues to try and contribute its bit for social and environmental causes on a regular basis. The Company is closely associated with QRG Foundation, a trust which provides healthcare services through mobile healthcare van for the slum areas of Delhi region. The company also participates in the mid day meal programme of Governments of India and Rajasthan and provides a meal every day to over 10,000 students of primary schools around its cable plant in Alwar region. We have plans to increase this number five-fold in the current year.

The basic philosophy in the Company is to achieve business excellence and to increase the long-term shareholder value, as we believe that will automatically take care of the needs and interests of all its other stakeholders as well, i.e. employees, suppliers, and customers. Sylvania acquisition is again a step in this direction as it adds immediately to the shareholder value by being Earnings per Share (EPS) accretive.

Today, with the Sylvania acquisition, Havells is one of the India's largest electrical companies; a Top 5 global lighting player with a growing presence in 40 countries and a global sales of US\$ One billion. But tomorrow is more promising, with a new set of synergies, a wide range of products for the world market and a clear target to achieve World leadership in other product segments. To further strengthen the size of Havells-Sylvania is within the realms of possibility, driven by passion and led by a vision that extends beyond tomorrow...

Yours sincerely,
