With the provision of corporate dividend tax of 20% to be borne by the Company, the effective dividend payout may be considered to be 12%.

**3. PERFORMANCE**

The performance of the Company during the year under review was generally satisfactory. In particular, our order book position had improved in line with the overall buoyancy in the Automotive segment. The sales turnover of the Company during the year has increased by 6% from Rs.55.56 crores to Rs.59 crores. Gross profit rose by 27% from Rs.4.55 crores to Rs.5.82 crores and the net profit before tax stood at Rs.1.13 crores as against Rs.0.85 crores of last year. The net profit after tax also rose by about 29% from Rs.0.79 crores to Rs.1.02 crores. Improvement in profitability

was mainly due to better product mix and effective cost control measures.

During the year, ISO : 9002 Certification awarded to our Paithan unit has been successfully renewed by the DNV of the Netherlands for manufacture and marketing of Friction Materials. The performance at this unit has considerably improved. During the year, the Company has made some significant capital investment in the said plant by way of installation of an imported Japanese Extruder.

The performance at the Bhandara plant was not upto expectations mainly on account of stiff competition from unorganised sector. The ISO : 9002 Certification awarded to this unit by M/s.DNV of the Netherlands for manufacture and marketing of Friction Materials has been successfully maintained. The Company has made some significant capital investments in this unit during the year including installation of a Clutch inertia Dynamometer to further strengthen its in-house R & D facility.

The attitude of the workmen at Ghatkopar however,

# HINDUSTAN COMPOSITES LTD.

have been quiet indifferent, thereby preventing the productivity from reaching the budgeted levels. The overall performance of the company was adversely affected and had their cooperation been forthcoming, your company could have closed the year with significantly better results. Added to this, the escalation in cost of fuel and petroleum products also had an adverse impact on profitability.

However, the management has continued its capital investment program despite all odds and have installed a modern Calendar (Sheeter) imported from M/s. PAUL TROESTER MASCHINENFABRIK of Germany at its Ghatkopar Factory for the manufacture of both Asbestos and Asbestos free jointings, to cater to various O.E. and Export markets. With the additional capital investments so made coupled with improved industrial performance, the Company expects to post better results in the coming years.

## 4. EXPORTS

Despite the stiff competitive situation, the Company has achieved an Export turnover of Rs.566 Lacs which is about 9% of total turnover. The Export shall continue to be a thrust area for the Company with improved product mix and by adoption of effective overseas marketing efforts.

## 5. PUBLIC DEPOSITS

There were no deposits at the end of the year and the Company did not accept any deposits from the public during the year.

## 6. AUDITORS' REPORT

The observation made by the Auditors in their Report is self-explanatory and has also been further amplified in the Notes to the Accounts.

## 7. PERSONNEL

The efficiency of the boiler will increase resulting in saving of precious fuel. Usage of Natural Gas will not only be economical but will considerably reduce pollution also.

8.2 Lagging work on L.T. Vats has been undertaken to reduce heat losses.

8.3 Installation of Steam Drum was completed in boiler which has resulted in conservation of fuel.

8.4 Condensate Recovery System has been installed on calenders thereby reducing steam consumption.

8.5 Temperature Controller has been fitted on one of the machines for optimum utilisation of steam.

8.6 Installation of Capacitor Bank on individual high power motors for reduced energy consumption.
