

# 53RD ANNUAL REPORT 2010-2011

HUNDREDS OF PRODUCTS...

*One Can!*

## HINDUSTAN TIN WORKS LIMITED

## **HTW'S CORPORATE SOCIAL RESPONSIBILITY (CSR)**

### **1. HUMBLE CONTRIBUTION TO PRIME MINISTER NATIONAL RELIEF FUND TOWARDS LEH VICTIMS.**

### **2. WATER HARVESTING: RAJASTHAN**

- A Water Harvesting Project (Check Dam) was sponsored at Neemadi wala, Gurjaron Ki Dhani, Luharabass, Rajasthan. The project will benefit around 1000 rural people, 1920 cattle, 11 wells/bore wells and 320 bighas agriculture land.

### **3. COMMUNITY LIFT IRRIGATION SYSTEM**

- PHDRDF has recently implemented Community Based Lift Irrigation System (LIS) Project - first ever in Rajasthan, in the villages of Neem Ka Thana block of Sikar district. Ten lines have been established to serve an area of about 100 hectares of farming land. The project aims at equal distribution of harnessed water among the farmer- thus improve livelihood of small & marginal families in the area.

### **4. CANVIRONMENT WEEK**

- The underlying theme of our initiative of CanvIRONMENT Week was also to uplift the lives of the rag pickers, who are identified as the cog in the recycling wheel. During the year, we also worked with an NGO and organized their health check up programs, provided them the health insurance scheme, refurbished their children's school etc.

### **5. OTHERS**

Contributed:

- For helping the needy and poor people who need care and affection.
- For retarded children education.

# The week of the can

**P**romoting the sustainability and environmentally friendliness of metal packaging is increasingly important to the canmaking industry. Indian canmaker Hindustan Tin Works (HTW), through its Canvirement Week campaign, has been providing a lead in this goal while at the same time helping the needy in India, and raising awareness of the importance of recycling.

Following the success of the first Canvirement Week in November 2010, it is being repeated this year from November 10-17 and will become an annual fixture in the international canmaking calendar.

The response from the industry to 2010's event was certainly positive - as well as numerous companies and organisations showing their support for the campaign, it had been recognised with several awards in recent months.

These have included a surprise award at the Interpack show held in Germany in May - presented as it held an opening ceremony for Canvirement 2011 / The Environment Initiative of the Year 2010 at the Alcobev Indspirit conference organised by Ambrosia and the International Packaging Association's Innovation Award at the General Assembly of the IPA at Rimini in Italy in June.

The scheme also won the Empac Challenge, organised by European metal packaging association Empac which was designed to challenge entrants to devise a method of promoting cans. The organisation described the campaign as, "so innovative that it will raise real awareness about metal packaging and its key advantages across the globe." Continuing in the spirit of the campaign, the 10,000 euro (US\$14,000) prize will be used to provide a further boost to the Canvirement campaign in 2011.

"We will use the prize during Canvirement 2011 to uplift the lives of rag pickers in India and to promote sustainability of cans," said Atit Bhatia, senior vice president at HTW and president of Canvirement Week. "Either by providing some with rural health insurance schemes, or education to the children of rag pickers by either refurbishing a rag picker children's school or sponsoring education for the children - and also to raise awareness of environment-friendly cans."

The campaign is the brainchild of Bhatia, who hopes that this year, with some participants already established around the world and more time to attract interest, will see the event take place on a bigger scale.

Now an annual fixture in the canmaking industry calendar, this year's Canvirement Week aims to further promote the sustainability of cans. Daniel Searle reports

Banging the gong for Canvirement Week: Jakob Guyer, managing director of Soudronic, rings in the campaign for 2011 at Interpack in company with Sanjay Bhatia, managing director of Hindustan Tin Works, and son Atit Bhatia, president of Canvirement Week. Below left: receiving another prize at Interpack. Below right: Atit Bhatia receives his 10,000 euro cheque from Gordon Shade of Empac.

The pre-event activities will start in August, with the major events for Canvirement Week 2011 again taking place for a week ending on November 17. The used-can collection points will be re-installed, and various projects for children will take place including the creation from used cans of art, sculptures and music.

The rag picker communities will again benefit from the campaign, with the return of the health camps, the allocation of more health insurance schemes, and this year the addition of vocational training to help some of them move away from rag picking and into professional work.

Support from the worldwide canmaking industry will be increased, says Bhatia: "There is interest from several other members of the canmaking fraternity to join in this year," he says.

The campaign will also tap into two

key areas of Indian popular culture that "has a direct youth connection", says Bhatia: the Indian film industry of Bollywood and cricket. "Both Bollywood and cricket excite the youth and would be perfect to link up with Canvirement Week 2011 to spread the message more effectively."

"Canvirement Week 2011 will effectively spread the message of environmentally-friendly metal cans with the involvement of major industry stakeholders from around the world who will deliver a common message," says Bhatia.

"To work towards promoting the sustainability of metal cans, there's a strong need right now for the industry to change the message from business-to-business to business-to-consumer: to go directly to the consumers."
