Whole time Director**

Annexure 'I' to the Directors' Report

Management's Discussion and Analysis

The management of Hit Kit Global Solutions Limited presents the analysis of the performance of the company for the year 2007-08 and its outlook for the future. This outlook is based on an assessment of the current business environment. It may vary due to future economy and other developments both in India and Abroad.

While there has been a mild slowdown in the last quarter, India still continues to follow a high growth path. With advance estimates, from the Central Statistical Organization (CSO) suggesting an annual real GDP growth of 8.7% in 2007-08, the Indian economy has sustained the 8.7% Compound Annual Growth Rate (CAGR) witnessed in the four preceding years.

The highlights of the company's performance in 2007-08 are

- Increase in sales from operations from Rs.559.13 Lacs in 2006-07 to Rs.815.43 Lacs in 2007-08.
- Growth in Profit after tax from Rs.(354.98) Lacs in 2006-07 to Rs.231.05 Lacs 2007-08.

Although economy has been growing rapidly over the last few years including the retail sector, there were several complex challenges facing this sector. Despite of the challenges your company has remained resilient against adversities and has leveraged opportunities to deliver superior results.

Retail Business

During the year, company has entered into the organized retail Market in India which includes Contract farming and selling of speciality Ayurvedic herbal produce. Having established in emerging ayurvedic herbal produce, in India, the Company has drawn out elaborate plans to expand its operations.

The focus will be to strengthen distribution and to establish brand equity for the specialized ayurvedic herbal produce sold by the company. Ayurvedic and herbal products sold by your company, has enabled the Company to gain acceptance in the Retail Business of Ayurvedic herbal produce .

The commercial potential of Ayurveda can also be gauged from the fact that the global market for herbal health care is estimated at \$62 billion. In India, the estimated size of herbal health and personal care market is in the range of Rs 2,500 crore to Rs 3,000 crore and it is growing at a growth rate of 15 to 20 per cent per annum.

The global consumer and medical fraternity is fast realising the limitations of the present mainstream health care system. Medical practitioners and consumers who earlier looked at the herbal system as an "alternative", are now beginning to integrate it into mainstream health care system as complementary.

"Yes, the future for the Ayurvedic and herbal industry in serving the health care needs of consumers across the world looks bright and promising".

Software Business

Changing Economic and business conditions, rapid technological innovations are driving corporate all across the globe to render high quality products and services at lower prices. Corporate all over the world are now focusing on their core competencies. The Indian IT Industry still remains a premier destination for cost – competitive global procurement source, especially for software and technical skills. Despite of relatively tough market environment, the software industry has witnessed growth due to its intrinsic strength.

With the growth in the Indian economy and the corresponding rise in per capita income, the growth rate for the Software industry is expected to remain high. In continuation with last year's trend, your company foresees a higher than market growth rate in the current year.

Rising demand for the Software development in the overseas market will provide more impetus and opportunities for the growth of the Software industry.

As regarding threats, the company foresees volatility in dollar-rupee price movement as one of the critical factors for the sustainability of the industry. To mitigate this risk, company enters into regular forward contracts and take views from market experts above the movement of dollar-rupee price. Though this year there were no exports during the year, this can affect the health of overall software sector. The other threats being availability of skilled workforce at competitive cost and increase in interest rates can act as hurdle to the growth of industry. To mitigate this risk company tries to retain its current employees by upgrading their skills through regular training programmes.
