INDUSTRY OUTLOOK AND OPPORTUNITIES

Honeywell Automation India Limited (HAIL) operating results are driven by Industrial production, Capital Spending on Process and Building Automation, Commercial & Infrastructure Construction, Commodity and Foreign Exchange variations, Environment, Security and Safety concerns and regulations. Some of the important market conditions were :

- Tailwinds in exports volume from Honeywell and Non Honeywell customers due to favourable order mix and further compelling needs to leverage emerging regions for delivery of global projects.
- Continued Government spending on key infrastructure projects like Roads, Airports, Mass Transit systems, Energy Conservation initiatives and Electronic Security spending helping volume growth opportunities in Buildings Segment.
- Investment upcycle in Power, Transmission and distribution, Oil Exploration projects off set headwinds due to delayed decisions in Oil Marketing and distribution investments and private investments in Chemicals, Paper and other Small and Medium Enterprises (SME) process Industries.
- Firming demand in last quarter of 2009 in Automobile segment, Tier 2 and 3 cities in Construction segment and some improvement in Credit availability to SME are reversing trends of volume shrinkage which persisted through most of 2009.

Honeywell Process Solutions (HPS):

Solutions offered include Field Instruments, PLC's, Distributed Control Systems, Emergency Shut down Systems (ESD), Quality Controls Systems (QCS), Advanced Software Solutions and various value added services. Overall the business performed very well in 2009 and won several new contracts from customers across various vertical markets that your Company addresses.

Process Solutions offers its Solutions & Products in 4 modes .Each of the mode i.e New Construction, Advance Solutions, Life Cycle Services (LCS) & Field Solutions did very well & order booking in 2009 grew substantially over 2008.

The major wins included two large Power Projects from NTPC in addition to large orders from Essar, Tata Steel, Reliance Power, General Electric, Reliance Industries, RCF, etc to name a few of our esteemed customers. The business won many Operator Training Simulator projects in Power & Refinery segments & has established its leadership position in advance applications within Industrial customers. Honeywell Field Instruments (HFS) won few large projects & launched wireless Products in India. HFS won a large deal from British gas for off shore application. Life Cycle Services (LCS) division also did very well & helped many customers with its value added services like Operator driven Reliability & Migration services.

2010 will be a challenging year for HPS due to increased competition in the market. However, given the vast diversity of Products and Solutions portfolio & market reach, we will strive to sustain our good performance of 2009 in 2010 as well. We shall rely heavily on continuous investments made in our country in Refining, Power and Gas sectors. Your Company has a strong position in each of these Industries and with the available opportunities; we expect to win a fair share of the demand.

HPS has also launched Industrial Security & Energy Management portfolio in 2009. Renewed higher threat perception and focus of energy conservation will lead to growth potential in these applications & your Company has a strong Product/ Solution portfolio.

HPS globally continues to invest in technology even in recession time & these continued investments in new Products will help HPS to make its competitive position much stronger in 2010.

Honeywell Building Solutions (HBS):

HBS provides intelligent buildings that are operationally & energy efficient. As part of its intelligent buildings suite, HBS provides Building Management Systems (HVAC, Lighting and Utilities Monitoring & Control), Fire Detection & Alarm Systems, Access Control Systems, Video Surveillance Systems, Integrated Security Systems and Integrated Building Management Systems leveraging Honeywell's Enterprise Buildings Integrator™ or EBI. As part of its operational efficiency promise, HBS provides After Market Services for all Control Systems as well as comprehensive Utilities Operations & Maintenance Services for all Mechanical and Electrical Systems in a building and as part of its energy efficiency promise, HBS provides Energy Management Services, Energy Retrofits and Energy Performance Contracts.

This business performed well in 2009 and won several contracts in each of the three focus areas. In the intelligent buildings space your Company won several major project wins such as ICICI Bank, Delhi Metro, HCL Technologies, Tata Consultancy Services, Bharti Airtel and many others. In the area of operational efficiency your Company won major After Market Services Contracts from ICICI Bank, TCS, TTSL and Hyderabad Airport, to name a few and Utilities Operations & Maintenance Contracts from Bharti Airtel. Finally in the area of Energy Efficiency your Company won major Energy Contracts from the Renaissance (leveraging the Clinton Climate Initiative), Titan, Thermax, Rahejas, TATA Steel and SKF.

With a credible track record, an ability to innovate and solid systems and processes for execution and Life Cycle Management, this business is poised for sustained profitable growth in 2010.

Environment and Combustion Control (ECC):

ECC witnessed a flat year in a challenging environment with the continued effect of soft economy in Real Estate & Commercial Construction. The Building Management System (BMS) business, though adversely affected by decrease in number of projects in market, was successful in winning major orders from ITC Grand Chola, Marriot & some orders for stadiums built for the Commonwealth Games 2010. The Industrial Combustion Control business saw some positive trends with revival of industrial demand in the last quarter. Solar water heater launched in early in 2009 registered good business from residential sales and is expected to show strong growth in 2010 driven by rising energy cost and implementation of Government policies in leveraging Renewable Energy Solutions.

Revival of Construction and Real Estate Segment would drive growth of the diversified product portfolio for the business in 2010.

Sensing & Control (S&C):

Sensing & Control (S&C) – Sensing and Control improved business performance over 2008 inspite of very low demand in the Transportation segment and reduced OEM off-take by improving the business mix and reduced dependence on the Automotive segment. The expanded Test & Measurement line of business has contributed substantially to the growth with focused penetration in Military and Aeronautical industries, Educational & Research Institutions.

To improve market penetration and enhance customer contact, Sensing & Control has re-aligned the sales and marketing teams in key verticals viz. Industrial, Military/Aeronautical and Transportation and this is providing the desired results. The business is also investing to increase its local manufacturing.

Firming demand in automobile segments and diversification in other verticals and applications will help the business to pursue growth in 2010.

Exports Business Group (EBG):

EBG business offers product manufacturing, solutions and services to overseas requirements of Honeywell and other customers continues to show strong growth due to increased flow of work from Honeywell which is further helped substantially by favourable exchange rate. The Engineering Services business export, which are part of total exports, grew by 30% in 2009. The expansion was driven by project execution upcycle of large global projects in the backlog. Honeywell Operating System (HOS) represents holistic approach to operational excellence and the business continued to drive Cost and Engineering Productivity under this framework. Service expansion to other Honeywell Companies has diversified the business. This has also resulted in skill expansion within the team and multi-tasking. Knowledge Management is a focus area. An initiative towards increased product ownership for global support has resulted in transfer of engineering skills to HAIL. Product Localization and Value Engineering aimed at optimizing product cost has been initiated on a variety of products.

The Global Supply Chain rationalization initiative stabilized in early part of 2009; however global volumes saw considerable shrinkage driven by demand contraction in the Field Solution Products. The business made earnest efforts to sustain profitability in reducing global volumes, which continue to be strained in the immediate future. The Company's manufacturing facility continued to get accreditation for Manufacturing Excellence by Frost & Sullivan India.
