Capacities.
Capabilities &
Consistency.

We have pursued technological innovations that allows us to produce best-in-class products for our end user industries, thus making us resilient.

We have strengthened our operational efficiencies and stand to further gain from the collaboration synergies.

We have our team, that endeavors to emphasise on working together by exploring new possibilities every day and moving ahead with zeal and enthusiasm

The Company is positioned to achieve the next levels of growth at an accelerated pace utilising its self-acquired business excellence.

Incorporated in the year 1988,

I G Petrochemicals Ltd. (IGPL) is one of the world's leading manufacturer and lowest cost producer of Phthalic Anhydride (PA).

Promoted by Dhanuka Group and headquartered in Mumbai, the Company has three international-standard, state-of-the-art manufacturing facilities in technical collaboration with Lurgi of Germany.

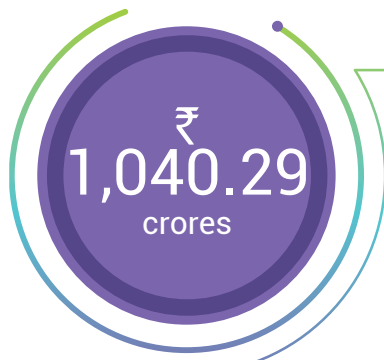

PA is a downstream product of orthoxylene that finds applications across variety of consumer and non-consumer durables.

Persistent focus on quality and capacity expansions has made the Company a reputed name in the domestic and international markets, successfully catering to the demands of the end-user segments.

Business Overview

Phthalic Anhydride

The Company's principal business revolves around the production of PA. It is a white crystalline solid at room temperature and transforms to colorless liquid upon heating. It is an important industrial chemical, especially to produce plasticizers for Plastics, Alkyd Resins, Unsaturated Polyester Resins & Copper Pthalocyanine. PA finds its usage by a variety of end users and applications.

Maleic Anhydride (MA)

As a part of strategic initiatives, IGPL has acquired MA business of Mysore Petro Chemicals Ltd. (MPCL) as a going concern on a "Slump Sale basis" at a lump sum consideration of ₹ 74.48 crores payable over 5 years.

MA is a chemical intermediary, used in practically every field of industrial chemistry.

-  Production of unsaturated polyester resin
-  Manufacture of coatings, pharmaceuticals and surfactants
-  Additive of plastics, lubricating oil additives and agricultural chemicals
-  Precursor to compounds used for water treatment detergents, insecticides and fungicides

MPCL is the only manufacturer of MA in India and IGPL is amongst the leading manufacturers of the raw material i.e. wash water required for production of MA. Moreover, both Plants of IGPL and MPCL are at a common location in Taloja. Therefore, this acquisition will yield greater synergy benefits for IGPL along with enhanced presence in the domestic market.
