OPERATIONS

The rising interest rates in Vehicle Financing and increasing inflation coupled with the steep hike in fuel prices led to a downtrend in the Vehicle Industry from the beginning of the financial year in terms of reduced vehicle offtake in all segments except the passenger car segment. This disturbing factor has had its impact on the auto component industry, already suffering under the pressure of dwindling margins and increase in the cost of inputs.

The Orbital Cold Forming (OCF) Division, which started with manufacture of Synchrocones and Differential Gears, experienced initial teething problems, common to all new projects and some lead time for Technology Assimilation was required for commercial production to commence.

However, the Polewheel a new product taken up, as reported last year, was successfully developed during the end of last year, and has now been commercialized. The product has undergone a series of tests and we are glad to report that it has been validated and has been received well by leading customers.

The Company has reached a turnover of Rs.62.75 Crores, as against Rs.58.03 Crores in the previous year.

The Profit for the year after Tax was Rs.250.42 lakhs as against Rs.388.70 lakhs in the previous year.

OUTLOOK

The volatility in the oil prices in international markets, increasing interest rates, credit squeeze by Banks and the galloping inflation rate, all have considerably dampened the economy, leading to persistent slow-down in the industry.

Your Company however continues to maintain its strong presence with OEMs and is making a determined effort to increase its share in the After Market.

The Company is confident that the success achieved by the OCF Division would help it make a substantial contribution to the turnover and profits of the Company in the coming year.

The Company is well positioned to respond quickly to the requirements that may emerge in the Vehicle industry, upon its achieving a turn around.
