OPERATIONS :

During the year operating profits earned by the Company are marginally lower than last year, despite there being significant increase both in turnover and production of all the 3 products manufactured by the Company. Production of both Ossein & Di-Calcium Phosphate (DCP) have increased by about 35% and Gelatine by about 11% over last year.

Steep rise in the procurement cost of crushed bones, one of the major raw materials consumed by your Company, coupled with a sharp fall in the sale realization of DCP as well as stagnation in the sale values both of Ossein & Gelatine have neutralized the gain realized through increased production. The fall in the sale realization of DCP and sharp increase in prices of crushed bones by themselves affected the margins of the Company by a sum of around Rs.4.35 crores. This has been marginally offset by the reduction in the prices of Hydrochloric acid. Strengthening of Indian rupee against the US dollar also affected the export realizations.

All these factors arrested a corresponding increase in net profits commensurate to the increase in production and turnover.

The Gelatine industry world over is still passing through a difficult situation. The continued impact of "Mad-Cow" disease and corresponding stricter norms applied by international markets have adversely affected the overall demand of Gelatine meant for human consumption. The scare created by the disease still has its effects on the sentiments of consumers in various markets resulting in development of alternative cources of Gelatine. Rapid advances in the field of development of digital photography over conventional products have resulted in overall reduction in the demand for Photographic Gelatine.

The outbreak of "AVIAN INFLUENZA" in East Asian Countries has further resulted in low realization of DCP and its overall offtake.

DIVIDEND :

Even though profits of the Company are not adequate, your directors recommend the payment of dividend @ 5% on the paid up share capital of the Company. The board appreciates the continued support of the shareholders, through this difficult time.

TAXATION:

The Company has made a provision of Rs.40 lacs as current year's tax. Gain arising for the year in Deferred Tax amounting to Rs.12.15 lacs has been adequately dealt with in Profit & Loss Account.

YEAR IN PROSPECT :

The Company's captive power plant has already been commissioned in the middle of May 2004. As a result thereof reduction in cost of power will be achieved during the current year. The technical upgradation programme is under implementation and the Company has been able to stabilize the quality of gelatine. The management has taken a decision to increase the installed capacity from 1320 Mt. To 1600 Mt per annum by adding certain balancing equipments. Further to achieve optimum level of production various technical aspects are currently under study.

Although market conditions remain tough, it is hoped that, other concurrent measures taken by the management to explore additional markets for the export of Ossein & Gelatine and achieve overall reduction in costs of production coupled with the installation of capitive power plant, will make it possible, for the Company to meet - growing challenges both in the international and domestic market.

FINANCE :

The Company has availed External Commercial Borrowing (ECB) facility of US\$. 1 Million from Sumitomo Mitsui Banking Corporation, Hongkong at a very competitive rate mainly to finance captive power plant. The Company continued to get requisite assistance and co-operation from its bankers as & when needed.

INDUSTRIAL RELATIONS :

Industrial relations continued to be cordial and satisfactory.

ANNEXURE TO DIRECTORS' REPORT

Information under section 217 (1) (e) of the Companies Act, 1956 read with the Companies (Disclosure of Particulars in the Report of Board of Directors) Rules – 1988 in respect of Conservation of Energy Technology Absorption and Foreign Exchange Earnings and Outgo.

A) CONSERVATION OF ENERGY

- a) Energy conservation measures taken : Energy efficient Air Classifying System is installed for impurity removal from raw material. Super decanter is installed for better separation of solids from sludge.
- b) Additional investments and proposals : Installation of 1465 KW Gen set captive power plant based on furnace oil was under advance stage of installation and commissioned in 1st quarter of this year. This will help company to keep its power cost in control against rising GEB power tariffs.

Company had already purchased Energy Efficient Burner for boiler from M/s. Max Weishaupt – GmBH and the same is commissioned in the first quarter of this year.

2003-04

83.84.800

1 10 10 921

- c) Impact of measures in (a) and (b) above : On implementation of the above, the Company expects saving of about 5% in energy consumption.
- d) Total energy consumption and energy consumption per unit of production. FORM – A
