Forward-looking statement

In this Annual Report, we have disclosed forward-looking information to enable investors to comprehend our prospects and take investment decisions. This report and other statements - written and oral - that we periodically make, contain forward-looking statements that set out anticipated results based on the management's plans and assumptions. We have tried wherever possible to identify such statements by using words such as 'anticipate', 'estimate', 'expects', 'projects', 'intends', 'plans', 'believes' and words of similar substance in connection with any discussion of future performance.

We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in assumptions. The achievements of results are subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should keep this in mind. The information/disclosures made in this Annual Report are as on date of respective report and document and we undertake no obligation to publicly update any forward looking statements, whether as a result of new information, future events or otherwise.

Company's land bank and Company's project means the consolidated land bank and project of the Company as consolidated entity along with all its subsidiaries.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

ECONOMY

Global economic activity is making a hesitant and uneven recovery on the back of extraordinary policy responses by monetary, fiscal and regulatory authorities. Vaccine rollout in major world economies has raised hopes of higher economic growth. However, the bounce back will also be largely dependent on the control of pandemic in low-income and emerging market economies.

India implemented the strictest lockdown in the world from March 25, 2020, to control the spread of COVID-19 pandemic. As a result, the first quarter FY 2020-21 registered a 24.4% contraction in the Indian GDP, which was followed by a contraction of 7.3% in the second quarter. With economy opening up in the second half, Q3 and Q4 GDP saw a growth of 0.3% and 1.6% respectively. Overall, India saw GDP contraction of 7.3% in FY2020-21, its first ever since FY 1980-81.

The country received USD 81.72 Bn of FDI investment in FY 2020- 21, the highest ever in the backdrop of a series of steps taken to improve the ease of doing business and to attract investments into domestic manufacturing capacity and an ambitious infrastructure project pipeline. As a result, the country is likely to post a current account surplus after a gap of 17 years. India's foreign exchange reserves too reached an all-time high of USD 608.08 Bn on June 11, 2021.

REAL ESTATE SECTOR

Real estate developers, who were reeling under pressure due to various reasons in the first half of FY 2020-21 got some relief in the second half as the real estate sector showed resurgence across the country and across all price segments supported by favourable factors such as vastly increased affordability, government duty cuts, attractive prices offered by developers, lucrative payment plans, low interest rates and favourable state and central government initiatives. This period witnessed the highest ever sales traction in projects of most of the real estate developers leading to improvement in their cash flows.

1. Market-share gains for listed developers

Market share of top 9 listed developers further improved in FY 2020-2021 to 11.9% (+270 bps) and is now at an all-time high, and sales of these top 9 developers went up by 23% and highlights the performance differential.

Given the low absolute market share at 11.9% of Tier 1 city sales and 9.5% of pan-India sales, the market share accretion story has a long way to go. As an example, the top developer share in China is near 35%.

2. Buyer's preference towards Completed/ Near Completion Inventory

Sales patterns across developers show that nearly 40%-50% of sales came from inventory monetization and the balance from new launches, highlighting the importance of late stage inventory in the mix.

3. Recovery taking hold in the Residential market

Overall sector volumes, despite the gains, are still down 26% from peak 2010 levels. The residential down cycle that started in 2011 ended in 2017 are now well placed in the new up cycle. This cycle is backed by multi-year high affordability across major cities and mortgage rates that are now nearing a 'psychological' low 7% handle.

4. Consolidation in Residential Real Estate

Market consolidation continues to remain accelerated post COVID-19 and companies with a Brand name, historical project delivery track record, strong balance sheet, relatively easy access to capital and project presence across price points stand to immensely gain market share.

5. REIT

SEBI, via its board meeting on 29 June, cut the trading lot size in REIT / INVIT to 1 unit. We believe this is a positive development as it should improve liquidity of the instruments and attract higher interest from the retail sector where due to lot size constraint, liquidity was weak despite a good yield on offer.
