Management Discussion and Analysis

Economic and Industry Overview

In FY 2013-14, the global economy showed signs of recovery with growth in demand from the developed countries in the second half of the year. The global economy in 2014 appears to be in a better shape than what it was in 2012-13. Over the past decade, the Indian economy has passed through phases of growth and slowdown. Multiple issues have plagued the economy, yet India Inc. has steered through and remains confident of an economic rebound. The decisive mandate by the people of India will pave the way for a conducive policy environment leading to the resurrection of growth in the economy over the next few years. The Government is expected to encourage foreign direct investment in the country which will help in the creation of job and asset generation and will introduce the long pending Goods and Services Tax that will help in creating a conducive environment for investment. The reformation of public distribution system and upliftment of Tier II cities with a well developed civic infrastructure will boost the economy.
