“Upgrading our products with new technologies has been our most potent DNA”

Dear Shareholders,

Warm Greetings!

The year 2013-14 has been a challenging year for the Economy as a whole and the Indian Electrical Industry in particular. The uncertainties spread all over the globe added to the economic unrest and consequently its downfall globally.

From the Indian perspective, despite this difficult environment but with visible emergence of governance, the economic environment within our country and around us has started looking warm and positive.

Sound Government at the Centre with massive majority mandate has provided India with the opportunity to look at the wider aspect of world economic operations in a practical and holistic manner.

It appeared difficult initially but we are now getting confident of the great potential of growth revival in Economy and in manufacturing activities.

We stayed true to our core philosophy of innovation in products. We have paid total attention to the interest of users of our products and technology and focused on delivering efficiency and cost effectiveness without compromising quality.

We also believe that having a global attitude supported with world-class technology will help in development of the country and its people. It will help provide growth opportunities which in turn will bring about modernization, technological initiative and upgradation. Ever increasing environmental concerns, for which we have employed the best resources and minds to conceive new designs for manufacturing energy saving products including LED Lights. Use of Lithium Ion Batteries is no longer limited to the Mobile Phones but now, in view of their outstanding qualities of quick charge and deep discharge, their demand is growing fast not only for emergency lights for homes, offices and institutional operations but also for ATMs, Telecommunication Towers, and for storing solar energy as acquired from Solar Cells. Above all Lithium Ion Batteries are in for an important role for a variety of critical needs of our Nation including use in Defense equipment and projects.

Thus, EON looks forward to consistent growth in coming years. We will continue to consolidate and build ever higher standards of customer delight through creative innovation. We aim to grow faster to scale new heights and to set new milestones.

I am grateful to our Board of Directors and our committed Engineers, Executives and employees for their unwavering support and guidance. I take this opportunity to thank all our stakeholders including our customers, shareholders and above all our Bankers, who have reposed full trust and confidence in us and have always extended their consistent support. I look forward to their continued patronage and support.

With kind and cordial regards,

Management Discussion & Analysis

COMPANY OVERVIEW

Eon Electric Limited(hereinafter “the Company”) is engaged in the business of manufacturing and marketing of electrical equipments such as Wires & Cables, Lighting products, LED Lights, Energy Efficient Fans, Water Heaters, Lithium ion Batteries and Mobile Phone Accessories.

The company continues to be committed towards making best of quality products at affordable prices through technological innovation and up gradation, modernisation, adoption of best practices, global benchmarking, value proposition, and deep commitment to customer satisfaction besides ensuring human as well as environmental safety, thus enhancing the value addition for the investors and for the society as a whole. No doubt, we will establish our capabilities beyond the Indian borders and enable our clients, enjoy the value of our products and services globally.

Industry Structure & Development, Opportunity & threats

The Indian Power Sector is a core component of the Indian infrastructure and its expansion is essential for the success of economic liberalisation of India. This is evident from ever increasing power demand of the country's vibrant economy leading to a widening gap between the supply and demand. The Government of India has recognised the pivotal role of electric power in economic development and also the urgent and critical need to invest heavily to reduce the growing gap in power demand and supply. The massive addition in generation capacity would also bring along with it a much bigger demand for electrical equipments.

The Cable & Wires industry has shown positive trends for the past five years due to the increased activity in power sector, improved industrial climate and industry initiatives to explore export markets. The outlook of cables & wires industry continue to remain positive on the back of demand expected to be generated as per estimation in various sectors like power, real estate etc.

Today's global lighting industry is responsible for approximately 19% of electricity use and 6% of greenhouse gas emissions . In this context, LED technology has the potential to be a game changer for the industry, with well-publicized environmental and technological advantages compared to conventional lighting (e.g., 50-70% lower energy consumption, no mercury content, and significantly longer life spans).

The Indian government has developed policies to stimulate the adoption of LED lighting in the country, and is funding a number of pilot LED street-lighting projects.

The increased emphasis on power generation and new fast developing consciousness for conservation of power and energy efficiency has hastened the process of growth of demand for the Company's existing as well as innovative products like LED Lights, Energy efficient Fans, Water Heater, Lithium ion batteries etc.

Since power sector and infrastructure/real estate sector are main consumers of Company's products, any slowdown in these sectors can largely impact the demand for Company's products. Further most of the Company's products are highly competitive and also face challenge from unorganised sector which are providing cheap products with inferior quality. Hence the pricing across our business is also under risk due to competition. We have been providing and offering value added services and benefits to the customers to retain them. We are also investing towards brand building and awareness programme across our businesses to ensure adequate quality product differentiation.

Financial Performance

Financial performance of the Company for the year 2013 – 14 as compared to the previous year is furnished in detail in the Directors' Report.

Segment-wise performance:**Cables & Wires**

Electrical cables & wires market is growing at a steady pace as the government is investing heavily in the infrastructure development and Power Sector.

Our Cables & Wires segment recorded a turnover of ₹ 83.25 Crores for the financial year ended 31st March, 2014 as against ₹ 111.53 Crores for the financial year ended 31st March 2013. Our focussed efforts in brand building, awareness creation for acceptance of products and market penetration through a fast growing network of channel partners has helped us to become a household name amongst its user segment.

Lighting

The Lighting Segment achieved a turnover of ₹ 29.26 Crores for the financial year ended 31st March 2014 as against ₹ 15.26 Crores for the year ended 31st March 2013. The Company is working on new innovative strategic plans and pursuing new creative opportunities in the areas of advance LED based energy efficient and eco- friendly lighting systems which will further augment the growth of this segment during the coming years.

Others

Other products i.e Electrical Fans, Water Heater, Lithium ion batteries and mobile phone accessories and switches contributed a turnover of ₹ 24.20 Crores for the financial year ended 31st March 2014 as against ₹ 29.34 Crores for the year ended 31st March 2013.

Human Resource Development

The Company continues to provide a platform for individual opportunities and for growth in knowledge and skills of its people. The relationship with all the employees continues to be cordial. The management acknowledges the contribution of its employees and the spirit of commitment demonstrated by them in realising the company's vision. The company has started a number of new initiatives which will further enhance the company's ability to attract and retain high caliber employees for faster growth of the Company's business.

Research and Development

Your company continues its efforts to integrate the R&D activities with the business needs of the company to offer safe, energy efficient, value added products and services to its customers.

Internal control systems and their adequacy

The Company's internal control systems are commensurate with the nature of its business and the size and complexity of its operations. These are routinely tested and certified by Statutory as well as Internal Auditors and cover all offices, factories and key areas of business. Significant audit observations and follow up actions thereon are reported to the Audit Committee. The Audit Committee reviews adequacy and effectiveness of the Company's internal control environment and monitors the implementation of audit recommendations including those relating to strengthening of the Company's risk management policies and systems.

Risks & Concern

The Company has an elaborate process for Risk Management. The Company's Risk Management Policy is backed by strong internal control systems. The risk management framework consists of policies and procedures designed to provide reasonable assurance that objectives are met by integrating management control into the daily operations, by ensuring compliance with legal requirements and by safeguarding the integrity of the Company's financial reporting and its related disclosures. Major risks identified by the businesses and functions are systematically addressed through mitigating actions on a continuing basis. These are discussed with both Management and Audit Committee. Some of the risks relate to competitive intensity and cost volatility.

Domestic Electricals Market has very intense competition. Presence of multinational companies and import from China is increasing market competition which has resulted in price pressure in the market for all range of products. Your company has accordingly established itself as an innovative Company with a lean and efficient manufacturing and marketing network which manages your Company's supply chain. Accordingly, your Company proposes to address these risks by continuous product development, focused efforts to reduce costs, increase market share by diversifying existing product range and customer base with the addition of new strategic customers and strengthening the existing relationships.

Cautionary Statement

The statements in this report, particularly which relate to Management Discussion and Analysis Report describing the Company's objectives, plans, projections, estimates and expectations may constitute "forward looking statements" within the meaning of applicable laws and regulations. Actual results may differ materially from those expressed or implied in the statement depending on the circumstances.
