MANAGEMENT DISCUSSION AND ANALYSIS

This Management Discussion and Analysis Report forms part of this Annual Report and includes discussion on various matters specified under Clause 49(IV)(F) of the listing agreement.

For last couple of years global scene of textile industry is under going substantial changes resulting in relocation of manufacturing facilities across the globe and restructuring of industry. Asian countries like China, India, Pakistan, Bangladesh, Sri Lanka and some East European nations are witnessing rapid growth of textile industry.

Of course, China leads the growth and has emerged the largest global textile player with 20% of world textile trade. India contributes to about 4% of the world trade.

India has been one of the biggest beneficiaries of the abolition of quotas on textile imports by the US and EU after the Agreement on Textiles & Clothing expired on January 1, 2005. Global retailers are now consolidating their sourcing activities for textile products on twin considerations of cost and lead times and India has a good opportunity to capture overseas markets due to availability of full range of textiles in the country.

The Indian domestic textile market is witnessing strong growth led by a young consuming population, its fast growing economy and rising household income levels. The growth of organized retailing is also adding to the demand for textiles.

To keep pace with global changes in textile trade, Govt. of India introduced TUF scheme in 1999 for increased investment for modernization and expansion of textile industry. This has given a fillip to investment and the consequent growth of industry. Your Company has also taken steps to launch expansion and forward integration project under the TUF scheme. The implementation is going on and this will enable the Company to improve its value realizations and consequent betterment of shareholders' value.

OUTLOOK ON OPPORTUNITIES & FUTURE PROSPECTS

The fundamental growth drivers remain strong in India and free movement of textile products would offer better opportunities in the international market. Domestic market is likely to witness improved demand due to growing per capita income, population and strong retail push.

Your Company's expansion project is going ahead in full swing. The civil work for the same is in an advanced stage of completion. Orders for most of the machinery and other equipments have already been placed and it is expected that the weaving facilities would commence production by Oct./Nov. 07 and the Ring yarn production would follow. This would help your Company in improving value realization of its products and contribute for better margins.

SHARE CAPITAL & IPO

The Authorised Share Capital of the Company has been increased from Rs. 1500 lac to Rs. 1800 lac vide resolution passed in the Extra ordinary General Meeting of the Company held on 25th August, 2006.

To part finance proposed expansion and forward integration investment, the Company came out with Initial Public Offering of 81 lac shares of Rs. 10 each at a premium of Rs. 15 per share. The issue was over subscribed and allotment completed on 8th March, 2007. Part of the proceeds from IPO have been utilized for paying advances for machinery and civil work. The balance amount has been kept as Fixed Deposit with the Bank.

MANAGEMENT PERCEPTION OF RISK & CONCERN

Like all businesses, your Company's business is also susceptible to various risks. You are aware raw material cost is the single largest component of total cost for your Company and any abnormal variation in its price affects the profitability of your Company. Our main raw material is cotton and the same being an agricultural produce is affected by a variety of factors. Moreover commodity prices are cyclical in nature. As a result they exert significant impact on profitability. For last couple of years Govt has allowed introduction of BT cotton and the results thereof are visible on our crop size which has substantially increased. Another factor which has a bearing on your business is value of Indian Rupee vis a vis US Dollar. The rapid strengthening of rupee against dollar has adversely affected export of textile products from India and has consequently affected the rate realization of textile products. Domestic monetary and tax policies also affect your company's business. Your management is taking all possible steps to mitigate the adverse impact of above factors. Finally the Company has chalked out a major expansion cum forward integration plan. The successful installation and stabilization of operations is subject to project execution risk. However, your Company is fully prepared to meet this challenge and execute the project keeping the down side risk to a minimum.
