PERFORMANCE OF THE COMPANY

During the year ended 31.03.2012, the Company achieved an overall production of 229 lakh meters of fabrics against the previous year's production of 241 lakh meters. The revenue for the year was Rs.40007 lakhs as against sales of Rs.34359 lakhs during the previous year, representing an increase of 16 %. The company has three main product groups, Denim and Apparel Fabrics, Home Textiles and sales of Apparel. All the product groups are showing double digit growth levels and have contributed to the profitability of the company.

The Company has been able to improve its profitability on account of higher sales realization. The operating margins were maintained inspite of lower production and increasing power costs.

Our investments in the home textiles category have started paying off as we see large sales to well established retail houses abroad.

The recent depreciation of the rupee has helped our garment sales in export markets.

The Board of Directors recommends a dividend of 7.50 % (i.e. Rs.0.75) per equity share of the company for the year 2011-12. The Board further recommends payment of arrears of cumulative preference dividend to erstwhile preference shareholders at the rate of 10 % for the years 2005 to 2007 amounting to Rs.200 lakhs. The Dividend tax payable amounts to Rs.63 lakhs.

INDUSTRY STRUCTURE & DEVELOPMENT

The Indian denim industry continues to enjoy a high growth potential. The domestic as well as international demand is expected to grow.

The demand for the denim fabrics is increasing in the domestic market; our sales to both premier international brands operating in India and also to large exporters of readymade garments have increased. The recent financial crisis in Europe has affected our sales in that region. Our sales effort in the South American market has started to yield results, to balance the negative sentiment in Europe. We are seeing sales increase in North America as fashion has favoured our products.

OPPORTUNITIES AND THREATS

The Company is expecting higher volumes in denim sale. The Company will continue its focus on home textiles sales and is expected to do well in this segment in the next year. Apparel exports is expected to be maintained at current levels.

The Company is subjected to the risks of volatility in the prices of raw material. Denim sales is highly dependant on fashion. The previous year saw cotton prices reaching a peak of 200 cent/lb and then coming down to 100 cent/lb.

The higher interest rates and the volatility in exchange rates are serious concerns facing the Company. The Company is taking steps to mitigate the effects of cost increases by suitable product mix changes and also by actively managing the exchange risk.
