OPERATIONS

During the year your Company has achieved the highest ever production. The production of paper during the year under review was 1,07,632 metric tonnes, as against 99,550 metric tonnes in the previous year. The quantitative figure for the sale of paper was 1,07,834 metric tonnes this year, leaving a closing stock of 197 metric tonnes, as against the sale of 99,189 metric tonnes in the previous year.

The figures given in the Financial Highlights for the current year under review show the following trends over the previous year:

For the year under review, the company has recorded satisfactory performance in its working results even in the midst of adverse circumstances emerging from import of paper and subdued sales prices. This performance is due to the improved operational efficiencies, productivity, quality and higher volumes of premium quality paper products like copier and surface sized paper, and despite the increase in input prices of agri- materials. The high volatility in US \$ and consequent high depreciation in the Indian currency and high interest costs have led to the higher costs of imported pulp and other materials which has led to the squeezed margins.

The Company recorded gross sales turnover and other income at Rs. 55,463.55 lacs, up by 4.48%; operating profit at Rs. 6,558.45 lacs, marginally up by 1.20%, Profit before Tax at Rs. 3,287.35 lacs, up by 3.72%. Net profit after tax is marginally down by 2.08% and stands at Rs. 2,451.68 lacs.

In spite of the markets remaining subdued during the year, the initiatives taken by your Company in the recent years in improving productivity and efficiency have led to achieving of the above operational performance. The Company has taken up projects in focused areas for improvement under "KITE" scheme - Improvement Projects (Kquantum, Innovate, Think & Execute) and this has led to improved operational efficiencies, productivity, reduction in operational costs and sizeable savings thereby maintaining the bottom-line.

The results of cost reduction initiatives and operational efficiencies will be more visible in the current financial year 2016-17 as your Company has continued the initiatives to optimize capacity utilization, cost reduction, new products, optimizing production of better margin products and is further undertaking modification and up-gradation of the paper machines and other equipments for improving the product quality and cost reductions.

These initiatives have made your Company not only one of the most cost competitive paper mills, but also as one of the large paper player in the writing and printing segment. Furthermore, continuous research & development have enabled the company to manufacture papers of distinctive prime quality, which is competing with the premium quality of other large paper mills.

Writing & printing paper segment have witnessed optimum capacity utilizations levels over the past few years due to steady demand growth. This led to large capacity additions in recent years and demand is taking its time to absorb these capacity accretions, which is leading to the sluggish sales realizations. Despite this trend, your Company has been able to operate at higher optimum levels of production and sale, and has been able to offset the associated negatives to a large extent. As per CRISIL report, over the next 5 years, the demand growth will slightly outpace the capacity growth, driving up utilization rates slightly.

As per CRISIL Research, in 2015-16, the paper demand increased between 5.5 to 6%. However, CRISIL expects demand to grow by 6.0 to 6.5% in 2016-17 as the industrial activity improves, corporate bills on office stationery increases and a rise in the advertisements due to better economic recovery. Over the long run, CRISIL Research expects demand for paper to grow at about 6.2% CAGR to 18.2 million tonnes in 2019-20. The demand will be driven and supported by greater Government spending on education initiatives, corporate spending on stationery and healthy growth in services sector.

On the supply front, capacity additions are expected to post a steady 5.2% CAGR over the next 5 years compared to 5.4% in the last 5 years. CRISIL expects greater capacity additions that in the coming years in the premium varieties such as coated paper and boards which will account for a major proportion. CRISIL Research further expects profitability of W&P paper and paperboard players to improve in 2016-17 on account of lower raw material cost and improving demand scenario. Further CRISIL expects sales prices to increase marginally in 2016-17 as the paper demand inches up.

As per CRISIL research, demand for W&P paper is projected to grow at a CAGR of about 4.3% in the next 5 years; the segment wise growth is detailed below:

- Within the W&P paper variants, demand for copier paper is expected to grow the fastest, at a 9.5% CAGR as corporate spending on stationery rises.
- demand growth for coated paper is expected to remain healthy at 7.0% CAGR led by an increase in circulation of magazines coupled with increasing use of higher quality paper in print media.
- Demand for creamwove and maplitho paper, which is linked to growth in the education sector, is expected to grow at a steady pace of about 1.8% CAGR in the next 5 years as more new educational institutions are likely to come up in the country, as an outcome of the Indian Government's Right to Education (RTE) initiative. Creamwove continues to be the largest contributor to the W&P paper demand. Additionally, initiatives like Rashtriya Madhyamik Shiksha Abhiyan and Sarva Shiksha Abhiyan will continue to boost the paper demand.

The detailed performance of Company's operations for the year ended 31 March 2016 has been stated in the Management Discussion & Analysis, which appears as a separate statement in the Annual Report.
