CHAIRMAN & MANAGING DIRECTOR LETTER

Dear Stakeholders,

It gives me immense pleasure to connect with you all for Kabra ExtrusionTechnik's (KET) 39th Annual Report for the financial year ended FY22.

India continues to be a bright spot amongst the global economy with 8.7% growth in 2021. The Indian economy is expected to register 7.4% growth in 2022 owing to non-conducive global macro-environment coupled with policy tightening. The Union Budget 2022-23 capex target surged by 35.4%, from ₹ 5.54 lakh crore to ₹ 7.50 lakh crore, with effective capex for FY23 breaching ₹ 10.7 lakh crore mark.

India's Atmanirbhar strategy, Production Linked Incentive (PLI) schemes and macro-economic trend of 'China Plus One' presents mammoth opportunity in the manufacturing sector propelling the economy to achieve US\$5 trillion landmark. The Government's PLI reward systems in 14 sectors with capital allocation of ₹ 30 lakh crore will spur 60 lakh new job creation in India.

I am happy to state Kabra ExtrusionTechnik achieved its highest ever top line in FY22 despite of a challenging macro-economic scenario. The Company revenues surged by 46.9% YoY to ₹ 406 crores led by growth in both Extrusion and Battrix Business. KET's Battrix vertical started to make meaningful contribution to the overall revenue. The revenue mix of Extrusion Business and Battery Division stood at 73:26 in FY22 vis-à-vis 99:1 in FY21. EBITDA grew by 34.2% YoY to ₹ 55 crores. EBITDA margin stood at 13.5% in FY22. KET's PAT surged by 23.3% YoY to ₹ 30 crores. PAT margin stood at 7.5% during FY22. KET rewarded its long-term stakeholders with a dividend of ₹ 3 per share (60% of Face Value of ₹ 5) in FY22.

The plastic extrusion machines industry is estimated at US\$ 6,793.9 million in 2022. It is likely to touch US\$ 10,754.4 million in 2032, growing at 4.70% CAGR during 2022-32 period. There has been an increase in consumer preference towards minimal carbon emission. The Government's allocation of ₹ 60,000 crore towards 'Jal se Nal Yojana' and ₹ 40,000 crore for 'Housing for All' in the Union Budget 2022-23 is likely to benefit the extrusion machine manufacturers.

India's oil bill stood at three years' high at US\$ 119.2 billion in FY22 from US\$ 62.2 billion in FY21 translating to 1.8% current account deficit of US\$ 43.81 billion in FY22. According to Council on Energy, Environment and Water (CEEW) research study, India would potentially trim its oil import bill by US\$14 billion provided EVs take 30% share in 2030.

EVs had mere 1% of total vehicle sales at 0.2 million units in CY21. EV sales are expected to swell to 39% at 9.1 million units of total automotive sales by CY27 with majority growth estimated from the travel segment.

The electric car costs ~2x than its Internal Combustion Engine (ICE) counterpart. The e-buses costs ~1.5-2x higher than the diesel variant. Electric two wheelers and Electric three wheelers cost are at par with their ICE model, thanks to the government policies and support. The Lithium-ion (Li-ion) powered EV battery cells are mainly imported. The soaring inflation plus adverse US\$/INR spread hurts the Indian Li-ion battery importers. Additionally, India's battery capacity stands at 736GWh in 2021, projected to surpass 1TWh in 2023.

India has framed progressive policies for promoting and implementing clean energy-based future. There is an EV policy in 20 states with draft or final level state policy. The Ministry of Housing and Urban Affairs (MoHUA) notified that the residential and commercial complexes will have to allot 20% of their parking space for EV charging facilities. The Ministry of Finance has rationalised the customs duty for all categories of vehicles, battery packs and cells in 2019. The GST rates on the purchase EVs has trimmed from 12% to 5%. The Union Budget 2022-23 battery swapping policy will boost the setting up of charging stations for electric vehicles through subsidies and incentives.

The Company has been setting new benchmarks in plastics extrusion industry through its latest R & D techniques. The Company has numerous processes catering the market requirements of low power consumption, high output, maintenance free and user friendly Plastics Extrusion plants and machineries. KET constantly makes proactive efforts for developing a wide range of extrusion lines and allied products. The Company is confident to implement its key strategies, thereby enabling to achieve long-term sustainable growth. KET focuses to invest in technology and increase its reach in the promising markets. The Company will navigate the short to medium term challenges with its robust product portfolio.

Battrix's state-of-the-art facility at Chakan, in Pune is home to highly-skilled and experienced R&D, validation and testing teams, driven by industry best practices. Currently, the Company is getting traction from e-two-wheelers OEMs. KET looks forward to leverage its expertise in two wheelers segment and foray into e-three-wheeler space. The Company targets to

achieve 100% localization levels in Battery Management System (BMS) and other auto-components. KET's R&D team is working on battery pack models for e-two-wheelers, e-three-wheelers, e-four-wheelers and electric bus.

KET plans to add 5 additional Cylindrical and 4 Prismatic battery pack production lines. It will enhance the annual production capacity from 100,000 battery packs to 700,000 battery packs by end of FY24. KET's business outlook for both the segments looks robust for the coming years.

I would like to extend my gratitude to all esteemed stakeholders of the Company namely shareholders, creditors, bankers, suppliers, customers and society. I am also grateful to our 'human capital' for their unwavering passion, innovation and continual support towards the Company's long-term goals and vision. I sincerely thank the Company's Board of Directors for their guidance and valuable inputs. I firmly believe that KET has just scratch the surface and our best performance will be delivered in the coming years.

Yours Truly,

(S.V. Kabra)

Chairman and Managing Director
