The last quarter of 2011-12 has been encouraging and the Company has achieved the profit during the said quarter due to stability in price of cotton yarn. Your Directors expect to continue the same in the coming year given the favourable market conditions.

### Dividend

On account of accumulated losses your Directors are unable to recommend dividend.

### Fixed Deposits

The Company has not accepted any fixed deposits and hence there are no unclaimed deposits as on 31.03.2012.

## MANAGEMENT DISCUSSION AND ANALYSIS REPORT

### Industry Conditions

The demand for cotton yarn during the year was on downward trend and uncertain. The cotton price had come down steeply due to global price pressure and reduced domestic demand. Consequently, yarn prices have also dropped considerably and became a major concern for textile industry.

During the period, domestic and international cotton prices fell steadily from the peak levels seen during March 2011. As a result of this, the prices of cotton stocks held by the Company were higher than the market prices. This trend remained till December 2011, which had adversely affected the operating margins of industry as a whole and the Company in specific.

### Opportunities and Threats

The Textile industry is much dependent upon the availability of quality raw materials such as hybrid cotton and traditional cotton. There is lot of fluctuations in the price of raw materials, which influence the profitability of the Company. Power shortage and labour shortage also affects the operations of the Company. There is high labour demand in the Company.

### Segment or Product-wise performance

The entire operations of the Company relate to only one segment viz Textiles. Therefore, segment/product-wise details are not applicable.

### Company Outlook

During the current year there is an improvement in the demand for the Company's products. The forthcoming monsoon season shows hope for higher production of cotton and consequently lower price. Therefore, there is an encouraging climate for the business of the Company in the coming year.

### Risks and Concerns

The machines in the Company are more than 18 years old on an average, which needs replacement. The yarn produced by the Company is mainly supplied to hank market for handloom purpose.

### Cautionary Statement

Statements in the Management Discussion and Analysis are purely forward looking statements based on certain assumptions, projections, estimates and expectations. Actual results may vary due to various external factors, which are directly not under the control of the Company.

### Erosion of Network

As on 31st March 2012 your Company had a negative net worth of Rs.138.50 lakhs. Your Directors believe that the Company's network could be positive if the favourable business trend continues for few years. Therefore, the sickness status has not been referred to BIFR.

### Directors

Sri CSK Prabhu, Director of the Company retires by rotation and being eligible offers himself for re-appointment.

### Auditors

M/s S.Murali Dharan & Co, the Auditors of the Company retire at the ensuing Annual General Meeting and have given their consent for reappointment.

### Cost Auditors
