## SARLA GEMS LIMITED

**MANAGEMENT DISCUSSION & ANALYSIS****Industry structure and development :-**

The year under review continued to witness world wide recession and adverse market situation to our existing line of production of costume jewelry and gold/precious jewelry. Though in the last year, the company's net worth turned positive and the company's profit amounting to Rs.146.27 lacs but market situation became worse and resulted in accumulation of huge losses.

**Opportunities and threats :-**

In the over all context of global jewelry scenario, the domestic segment also witnessed a significant change. Latest trend and fashion in the costume jewelry experienced a rapid change. Similarly in the Indian market of gold and precious jewelry, introduction of Italian style and Chinese jewelry became a real threat to the existing Indian producers.

**Outlook of the company:-**

The current situation has arisen because of the international prices goes up. The demand for cheap Chinese products have picked up substantially and the scenario witnesses the inflow of material from China. Because of earlier sluggish situation we had taken a decision to curtail our activities and for us to revive and come up to original capacity would take time.

There is undoubtedly an air of expectation that the world recession is nearing its end and demand boost is round the corner. The outlook of the company for the coming year is buoyant.

**Discussion on financial performance with respect to operation performance :-**

	31-03-2003	31-03-2002
Sales	917862	2103320
Other income	953467	14606023
Total Expenditure	2517630	2080548
Profit before depreciation	960061	16238153
Depreciation	1606362	1609358
Profit/ Loss) before Tax	(646301)	14628795

The total income for the year declined by 88.80% in comparison to the previous year due to dull market conditions. The total expenditure for the year have gone up by 21%.

**Internal control system and their adequacy :-**

The company's endeavor to have a self compliant internal control system has paid good dividends.

The system adequacy audits and periodic internal/management audits have enabled the processes to be robust. A detailed functional audit is undertaken with more accent on business processes rather than transaction orientation and is subject to review at the divisional head level as well as the top management level.
