CHAIRMAN'S STATEMENT

Dear Shareholders.

It is both my privilege and pleasure to present the 18th Annual Report and audited accounts of the Kalptaru Papers Limited for the year ended 31st March.2006.

The year saw mergers and acquisitions of Companies on a large scale to consolidate existing and related line of business. As our Country's economy being opened up it has become the last frontier for all transnational Companies next only to China. The overall macro-economic scenario in 2006-2007 would largely depend on the growth prospects in industrial and agriculture. A growth rate of over 8% in index of industrial production in 2005-06 heralds an impressive future prospect in the industrial sector as borne out by the impressive corporate results. The marketing war which was hitherto read in foreign books and magazines would be witnessed in our Country in the coming years. This means cut-throat competition, better bargaining power and better option for our consumers. The order of the day will be to **INNOVATE OR PERISH** for all the Companies in our Country.

The scenario of paper industry is gradually improving due to increased consumption on all fronts. Industry is subject to tough competition but our Company is positioned well because of its market leadership in manufacturing of Absorbent paper, Company rests on the solid foundation of innovation which includes constant upgradation of existing production facility and launching of new products, market related risk are being hedged by the Company by expansion and diversification.

During the year under review the Company has installed a 12 ton boiler with latest control system to cater to the increasing need of steam which will also bring down the overall cost of steam.

Further existing production facilities at Machine No.1 & 2 are being renovated/upgraded. This will results in to better quality, increased production with reduced cost of the existing products.

I am pleased to inform you that recently the Management have finalised purchase of two Soft Tissue paper manufacturing machines from China with a production capacity of 25 tons per day. This will further boost the turnover and profitability of the Company in the years ahead.

On financial front our Company has posted excellent results for the year ended 31st March.2006. The Sales of 2005-06 stood at Rs. 3613 lacs compared to Rs. 3155 lacs up by 15% over the previous year. The net profit for 2005-06 increased to Rs. 191.09 lacs from Rs. 123.14 lacs up by 55%. EPS on annualised basis stood at Rs. 4.28. Your Directors have recommended dividend @ 7.5% on the equity shares of the Company for the year ended 31.03.2006.

Kalptaru is a growth oriented Company and promises good financial prospects. The primary object of the Management is to offer satisfactory returns to shareholders and constantly build up increasing value of their investment. The Management is confident that present and future industrial expansion plans are right to accomplish our objective. In view of continued expansion and diversification plans, the Management is of the firm opinion that the best is yet to come. The latest developments of the Company will be communicated to you from time to time.

I look forward for your continued support.

Sincerely yours.

(J. K. Gupta)
Chairman

ANNUAL REPORT 2005-06

GROUND REALITY OF CORPORATE GOVERNANCE

Corporate Governance is the process whereby people in power direct, monitor and lead corporations, and thereby, either create, modify or destroy and structures and systems under which they operate. The term corporate governance can be stretched to include the entire network of formal and information relations involving the corporate sector and its consequence for the society in general. It includes the structure, process, cultures and systems that help in the successful operation of the organisation. It is about value orientation, ethical norms, social accomplishments, performance and practices. It is concerned with holding a balance between economic, social and individual goals. Its framework encourages the efficient use of resources and accountability of those resources. The aim is to align as nearly as possible the interest of individuals, corporations and society. The basic principle is to encourage corporate houses to adopt internationally accepted governance standards which strengthen the economy and discourage fraud and mis-management.

A review of the literature on corporate governance suggests that some of the pre-requisites for it are - a proper system consisting of clearly defined roles, authority and responsibility. It includes vision, principles and norms which promote development. It develops a proper system for guiding, monitoring, reporting and control. It should focus on work ethics based on transparency, accountability and responsibility.

A good corporate governance is considered vital from a medium and long term perspective to enable firms to complete in a sustained way internationally, and to make them flourish and grow. It is not only seen to provide employment, wealth and satisfaction, but also to improve the standard of living and enhance social cohesion. Strong corporate governance is thus indispensable to vibrant capital markets and is an important instrument for investor protection. It is almost a truism that the adequacy and the quality of corporate governance shapes the growth and future of any capital market and economy. In an age where capital flows worldwide, just as quickly as information does, a company that does not promote a culture of strong, independent overseeing, risks its very stability and future health.

4. KEEPING UP WITH THE TIMES

With opening up of Country's economy, demand for quality products with most competitive rates have increased. With a view to meet the requirements, one has to ponder over bringing down the cost on all possible fronts. The Management has taken the following steps:

- Installation of 12 ton Boiler with latest control system
- Upgradation/ renovation of Machine No.1 & 2

ANNUAL REPORT 2005-06

- Finalised purchase of two Soft Tissue paper manufacturing machines from China with a production capacity of 25 tons per day.

The Company has almost completed installation of Effluent Treatment Plant (ETP) having primary and secondary clarifiers. The manufacturing unit of your Company was already a Zero Discharge unit and there will not be discharge of water even after installation of ETP. ETP will help to improve the quality of the products because treated water is being used in the process.

The above measures will lead to better quality and improved production which will generate more profits. The Management is confident that with all these improvement, your Company will be able to keep pace with the coming times.
