MANAGEMENT DISCUSSION AND ANALYSIS REPORT

OVERVIEW

Performance of the Company has been adversely affected due to continuously rising input costs for raw material and power. Shortage of working capital restricted optimum procurement of raw materials. Recessionary conditions in earlier part of the year affected Yarn demand and prices, putting pressure on the margins. In the second half of the year Yarn demand and prices improved substantially restricting the quantum of losses. The current year has started on a strong note with strong demand for yarn and improved realisations.

- Industry Outlook :** Outlook for the Industry has turned cautiously optimistic. Raw-material prices continued to rule high throughout the year on account of global shortage and large quantity booked for exports. The Government's effort to control cotton prices through a ban on exports has had little impact on prices. Yarn prices across all counts have moved up on account of strong demand. In view of this the Spinners have been able to pass on the increased input costs to the buyers. The Government has withdrawn specific export incentives available to Yarn spinners in the form of Duty Entitlement Passbook (DEPB) / Duty Drawback. This is expected to have a negative impact on the Industries earnings and export competitiveness.
- Opportunities :** Domestic as well as export demand is expected to remain strong. Cotton area under cultivation is expected to increase in India. It is expected that Indian cotton crop will show an increase, whereas world cotton crop may stagnate or decline. This may put Indian producers at competitive advantage.
- Challenges :** Shortage of skilled labour, withdrawal of export incentives and high raw material prices will pose a serious challenge to the industry's performance. The economic crisis in Europe may negatively effect demand.
- Business Analysis & Review :**

	Units	2009-10	2008-09	% Change
Production of Cotton Yarn/Fabrics	Kgs	63,72,101	49,46,513	28.82%
Sales of Cotton Yarn/Fabrics	Kgs	65,41,650	50,95,823	28.37%
Average Realisation	Rs./Kg	127.40	117.83	8.12%
Average Cost of Cotton	Rs./Ton	67,680	64,247	5.34%
Profit / (Loss) Before Interest but after Depreciation	Rs. in Lacs	(379.40)	(628.23)	(53.47%)

Review of Operations : Gradual improvement in market scenario enabled better capacity utilization. Production increased by 28.82% and Sales in volume terms increased by 28.37%. Though still a matter of concern, losses were reduced to a great extent. With strong demand for Yarn and better realisations, further improvement is expected in the current year.

Company Outlook : The immediate outlook is optimistic and encouraging. Yarn prices have maintained parity with cotton prices which is a welcome development. The withdrawal of Export incentives will impact bottom line of exporters and hurt their export competitiveness. The division is focusing on productivity, quality and exercising tight control on manufacturing and finance costs for improving performance.

Risks & Concerns : The steep increase in cotton MSP effected last year has eroded the Industry's competitiveness. The European debt crisis and recessionary conditions in Europe will negatively impact overall demand.

INTERNAL CONTROL SYSTEM AND ADEQUACY

The Company has adequate system of internal controls and necessary checks and balances are introduced/ strengthened so as to ensure :

- that its assets are safeguarded.

- that accounting records are properly maintained and its financial statements are reliable.

The significant findings, if any, are placed before the Audit Committee of the Board and corrective measures are recommended for implementation.
