Dear Shareholders,

The global economy has continued to witness a sustained growth due to growth in emerging economies led by China and India and also due to the additional stimulus in US and bailout packages in Europe. However, this had resulted in inflationary pressures which have forced many Central Banks, especially in China and India to raise interest rates.

Inspite of the volatile and challenging environment on raw material availability and pricing, the Company has delivered healthy growth in performance. It is a matter of pride and deep satisfaction that the Company has emerged triumphant out of the worst global financial crisis and extra-ordinary economic environment that we witnessed in the fiscal 2010-11. In the year ended March 31, 2011, the Company achieved a stupendous turnover of Rs. 658.79 Crores which is reflective of the Company's performance in the years ahead. As the economies of several nations return to normalcy, the demand for iron and steel-based goods will assume new growth levels. This is already starting to be evident in large construction activity and various infrastructure projects. Steel has been and will always be the basic requirement for India's growth story and will be the backbone of Indian industry for economic recovery. Keeping these in mind I am confident that the Company will scale new heights in the years ahead.

During the year your company has completed the construction work of factory at Valsad for manufacturing ferrous & non-ferrous metals products more particularly Lead Ingots and Billets. We will build on our consistent and well executed strategy to grow in the value added steel products, while being focused on allocation of captive mines for raw materials and captive power generation. Your company shall continue to create value and deliver sustainable growth while achieving best standards of safety, corporate governance, corporate social responsibility and investor communication.

The Company is looking forward to the opportunity of fulfilling its objective of being a viable and innovative manufacturer and stockiest in ferrous & non-ferrous metals in the years ahead.

RAJESH MEHTA
Chairman & Managing Director

Place : Mumbai
Date : 25th July, 2011

NOTICE TO THE MEMBERS

NOTICE is hereby given that the 34th Annual General Meeting of the members of KARMA INDUSTRIES LIMITED will be held on Friday, the 30th day of September, 2011 at 11.00 am at H – 131, Raj Arcade, Mahavir Nagar, Kandivali West, Mumbai – 400 067 to transact the following business:

MANAGEMENT DISCUSSION AND ANALYSIS**OVERVIEW****Global Economy**

The global economy has witnessed a sustained growth largely driven by the additional stimulus and bailout packages announced by various countries which has created liquidity and stimulated demand, leading to the recovery in the US and Europe. The Chinese and Indian economies have been the fastest economies. However, this has led to inflationary pressures which have forced central bank to raise interest rates.

The steel industry has also seen a reasonable growth in demand and increase in production volumes especially in China and India. However, this has once again put pressure on raw material availability and prices. The floods in Queensland, Australia have put further pressure on the prices of Coking Coal which has increased from USD 200 per MT levels to USD 300 per MT levels. Due to the volatility in Coking Coal prices over the last couple of years, there has been a shift in pricing mechanism for Coking Coal from annual to quarterly to partly monthly benchmark prices. This has resulted in volatility in prices of iron and steel products as well. China continues to drive the global steel industry with a production of approx. 630 million tons in 2010 which equates to approx. 45% of global Steel production.

Chinese Steel demand continues to be driven by large capital expenditure and government infrastructure projects across the country. However, it is expected that the production growth for steel in the current decade will slow down, which should reduce raw material prices.

The Indian Steel Industry

Though global crude steel production reached a new height during 2010 by 15% over 2009 and India's production also inched up by 6.4%, the Company could not reach the level of previous year's production in terms of quantity primarily due to increase in the prices of input raw materials during the period 2010-11. Further shortage in availability of raw material due to ban imposed in mining of iron ore in the State of Karnataka, from where major amount of iron ore is sourced by the Company, also added to lower production of its products.

However, the increase in cost of raw material and shortage of iron ore pushed the prices of finished products upwards resulting in higher turnover and profit for the year 2010-11.

The Indian economy grew at 8.6% in 2010-11 against 7.2% last year which shows a remarkable growth. The economy is likely to grow at over 8% over the next decade driven by the infrastructure (power, road, railways, ports etc.) and consumption (automobile, real estate etc.) sectors which will result in robust growth in demand for various iron and steel products.

The States of Orissa, Chhattisgarh and Jharkhand which account for majority of the iron ore and coal reserves in the country will remain the most attractive locations for setting up iron and steel manufacturing capacity in the coming years.

OPPORTUNITIES, THREATS, RISKS, CONCERNS AND OUTLOOK**Opportunities & Threats:**

The Company caters to construction, infrastructure, power, telecom and engineering industries. Though there are large no. steel factories across the length and breadth of the country, they are by and large concentrated in local level. Due to its reputation as traders of quality products and the company's plan to start manufacturing shortly, the Company has not only been able to retain its existing customers but is also adding new customers.

Though there is competition not only from local players but also from un-organised sector, the company is fully geared to meet these challenges and move towards achieving its set goals.

Three factors, however, will need to be watched carefully in order to ensure preparedness and to be able to take timely steps to manage risk are: a) Price Volatility b) Sourcing of key raw materials and c) cost of borrowing.

Nonetheless, the Board continues to believe that this year is yet another year of opportunity to focus on further growth and consolidation.

Risks and concerns:

The cost of power (including fuel) and its availability continues to be a major concern. High power tariffs and volatility in input prices may adversely affect the profitability of the Company. However, it is not significant considering the level of operations of the Company and normal correlation in the price of raw material and finished goods.

The economy continues to witness inflationary trends. The headline inflation has continued to be fuelled by high food inflation and rising prices of crude and commodities. The Reserve Bank of India's action to consistently raise interest rates and suck liquidity out of the system to tame inflation together with high commodity prices is likely to make new investment less attractive, contract demand and lead to slow down in the industry. This remains a serious concern. Management has already identified these risks and taking necessary steps to mitigate the risks such as exploring the possibilities to having captive power plant to become self sufficient, linkage to coal and iron ore mines for uninterrupted production and to reduce cost of borrowing by various means.

Outlook:

The Indian Steel Industry plays a significant role in the country's economic growth. The industry continues to remain in growth mode. It continues to hold a strong hold in the traditional sectors such as infrastructure & constructions, automobile, transportation and industrial application. With the Government's pro-active incentive plans to boost economic growth by injecting funds in various industries such as construction, infrastructure, automobile and power will drive the steel industry in future. Steel consumption in India is expected to grow significantly in the coming years as per capita finished steel consumption is far less than its regional counterparts.

PERFORMANCE OF THE COMPANY

The PAT of the Company has increased by 103% to Rs.20,264,196 during the year ended March 31, 2011, which shows an overall good performance of the Company. The current business of the company is trading in steel and iron products including C.R. Coils & Sheets, C.T.D. Bars, H.R. Sheets & Plates and Hot Rolled Steel Plates, Ingot irons M.S. Plates, Angles, Channels, Chequered Plates, Wires, T.M.T Bars, Rebars and Tor Steel, Stainless Steel and other Alloy Steels.

The Company has established a Factory at Valsad, Gujarat during the year for manufacturing of Iron & Steel Products which will be operational shortly. This will help the Company for sustaining in the long run in the competitive steel industry.

HUMAN RESOURCES

The Company recognizes the need for continuous growth and development of its employees in order to provide greater job satisfaction and also to equip them to meet growing organizational challenges.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY:

Internal Control Systems are designed to ensure the reliability of financial and other record and accountability of executive action to the management's authorization. The Statutory Auditors have evaluated the system of internal controls of the Company and have reported that the same are adequate and commensurate with the size of the Company and nature of its business.

The internal control systems are reviewed by the top Management and by the Audit Committee of the Board and proper follow up action ensured wherever required.

CAUTIONARY STATEMENT

Statement in the Management Discussion and Analysis describing the Company's objectives, expectations, estimates or predictions may be forward looking within the meaning of applicable securities laws and regulations. Actual results may differ materially from those expressed in the statement. Important factors that could influence the Company's operations include global and domestic supply and demand conditions affecting selling prices of finished goods, input availability and prices, changes in Government regulations, tax laws, economic developments within the country and other incidental factors. The Company assumes no responsibility to publicly amend, modify or revise any forward-looking statements, on the basis, of any subsequent developments, events or information.

REPORT ON CORPORATE GOVERNANCE

1] COMPANY'S PHILOSOPHY ON CORPORATE GOVERNANCE

The main object of Corporate Governance is to create transparency and full disclosure regarding the working of the Company. Corporate Governance's aim is to create long-term value for all stakeholders viz. investors, employees, creditors, customers, Government and society at large. It is crucial to the progress of every business enterprise as it builds confidence and trust, which eventually leads to a more stable and sustained resource flow and long-term partnership with its investors and other stakeholders. The Company firmly believes in and continues to practice good corporate Governance. The Company's essential character is shaped by the very values of transparency, professionalism and accountability. The Company continuously endeavors to improve on these aspects on an ongoing basis. The disclosures required by Clause 49 of the Listing Agreement are as under:
