Management Discussion and Analysis

Industrial Review :

The Indian IT Sector has identified its economic destiny during the recent years with great clarity along with the changing economic and business conditions, rapid technological innovation, proliferation of the internet and globalization, which are creating an increasingly competitive market environment that is driving corporations to transform the manner in which they operate. The industry has been performing at a staggering rate of growth of about 50 per cent every year and has sustained global competition. The most precious achievement is the contributions to the world of IT by gifting some of the leaders of the industry from Indian soil.

Consumers of products and services are increasingly demanding accelerated delivery times and lower prices. To adequately address these needs, we are focusing on our core competencies and are using outsourced technology service providers to help improve productivity, develop new products, conduct research and development activities, reduce business risk and manage operations more effectively. Government is also setting up Information Technology Investment Regions (ITIRs) with excellent infrastructure and would reap the benefits of co-sitting, networking and greater efficiency through use of common infrastructure and support services.

Financial Review :

During the year under review, the Company has achieved a total income of Rs.5.04 Lacs as against Rs.5.02 Lacs during the last year.

Opportunities and Threats :

The IT industry has great scope for people as it provides employment to technical and non-technical graduates and has the capability to generate huge foreign exchange inflow for India. Foreign countries get benefits in terms of labour costs and business processes. We are broadening the range of services being provided to the customers, which is resulting in more off shoring. Talent acquisition, development and retention initiatives taken by the company have brought down the employee attrition rates, thereby providing more stability to the employees and increasing their job commitment. Our Company has the ability to design, develop, implement and maintain advanced technology platform and solutions to address business and client needs has become a competitive advantage and a priority for corporations worldwide. Currently, the prevalence of multiple technology platforms and a greater emphasis on network security and redundancy have increased the complexity and cost of IT system, need for more dynamic technology solutions and the increased complexity, cost and risk associated with experience in leveraging technology to help improve efficiency and security.

There are various opportunities for the IT Companies as the Govt. has provided incentives including tax holiday and competitive duty structures by providing infrastructure support through organizations such as software technology parks. Again, the number of internet entities are also increasing at the faster rate.

As against there are certain threats from the Union Budget's proposal as an increase in the excise duty to 10 percent from the existing 8 percent which will raise the hardware prices and also components such as microprocessors, floppy disk drives, hard disk drive, flash drive, CD/DVD and combo drive meant for external use will now attract 4 per cent excise duty as a result prices go up for these too.

The budget proposes to raise the minimum alternative tax (MAT) rate from 15 per cent to 18 per cent as a result of which all IT companies now have to pay a minimum of 18 per cent tax irrespective of the fact that they operated under the Software Technology Parks of India or the Special Economic Zones or not.

Outlook:

The Indian information technology sector continues to be one of the sunshine sectors of the Indian economy showing rapid growth and promise. IT will bring about a drastic improvement in the quality of life as it impacts application domains and global competitiveness. Technologies that are emerging are Data Warehousing and Data Mining. They involve collecting data to find patterns and testing hypothesis in normal research. Software services that are being used in outsourcing will go a long way.

IT will continue to gain momentum. Indian information technology (IT) market is expected to grow at around 15.5 per cent, on the back of growing investor confidence and favorable initiatives taken by the government. The Company's Philosophy is based on customized services which are solely depended on individual customers requirement with the use of latest technology.

With its advance technology, competitive strength and cordial relationship, the company is expected to meet the growing demands of the industry.

Internal Control System and their adequacy:

The company has proper and adequate system of internal Control System to safeguard the assets of the company against the loss from unauthorized use and disposition. Company's internal control system also ensures that all transactions are recorded and reported properly.

The Management continuously reviews the internal control system. The review include overseeing adherence to management policy, safeguarding the assets of the company and the ensuring the preparation of timely and accurate financial information. The philosophy we have with regard to internal control systems and their adequacy has been formulation of effective systems and their strict implementation to ensure that assets and interests of the Company are safeguarded; checks and balances are in place to determine the accuracy and reliability of accounting data.

Our Company has designed the system of internal control to eliminate the risk of failure to achieve business objectives. The Board has reviewed the effectiveness of internal controls during the year.

There are policies and procedures for the reporting by employees and the resolution of suspected fraudulent activities. It is the policy of the Company to employ staff and management of high integrity, to train them appropriately to gain the latest information on the development in the IT sector.

Risk and Concerns :

The IT Industry in India has remained at the forefront of the outsourcing industry and actually has become an **enabler** for industry growth through expansion of Indian off shoring firms into other countries. Offshore service **centers are spawning** in the country due to operational excellence with low delivery cost, quality leadership, **abundant skilled** resources and a conducive business environment. The effective use of offshore technology **services offers a variety of benefits**, including lower cost of ownership of IT infrastructure, lower Labour costs, **improved quality and innovation**, faster delivery of technology solutions and more flexibility in scheduling.

The success of the organization is largely dependant upon highly skilled technology professionals and the **ability of our company to hire, attract, motivate, retain and train these personnel** which becomes very difficult as the corporations are reluctant to expand their internal IT departments and increase costs. These factors have increased corporations' reliance on their outsourced technology service providers and are expected to continue to drive future growth for outsourced technology services.

Human Resources Management and Industrial relations:

The thrust of your Company's human resource development efforts is to create a responsive and market-driven organization. In pursuit of your Company's strategy to create new engines of growth, human resource strategies continue to focus on the development of distributed leadership at all levels in the organization. We believe to create trust, transparency and teamwork improved employee productivity at all levels. Our commitment to harmonious industrial relations resulted in enhancing effectiveness of operations.

Cautionary Statement:

The information in this report includes forward-looking statements about our plans and future performance. Our expectations may change or not be realized, and you should not rely unduly on forward-looking statements. The forward-looking statements involve certain risks and uncertainties. The ability of the company to predict results or the actual effect of its plans and strategies is subject to inherent uncertainty. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on the results of operations or financial condition of the company. Company does not intend, and undertakes no obligation, to update these forward-looking statements.
