PROJECT & FINANCE

The project of 1000 TPD Soya processing plant has been started commercial production during the year.

During the year, the company has got corporate loan of Rs. 2000 Lacs from Banks to augment the long term resources for increase need of working capital.

The company is taking action for following projects in the current year:

- Greenfield integrated Single Super Phosphate plant in Andhra Pradesh.
- Value added products of soybeans.
- Wind Energy.

The total capital outgo is estimated around Rs.7000 Lacs

PERFORMANCE & FUTURE PLAN

In spite of good monsoon and resulting good crop the crushing margins remain negligible throughout the year as in previous year, due to very low international price of Edible Oil and Soya meal.

The production of Single Super Phosphate restricted to the extent of availability of indigenous Rock Phosphate from M/s Rajasthan State Mines & Minerals Ltd. and thus under utilisation of capacity. The much awaited hike in adhoc subsidy has been effected w.e.f. September, 2005, but further rise in Rock Phosphate prices & logistic cost put the industry under tremendous pressure.

The company hopes that, sooner or later the Government of India shall consider rational basis of subsidy i.e. nutrient basis.

Your directors are of the firm opinion that, in spite of all odds, your company shall perform better in its both the segments due to its basic strength and shall like to be remain leader in both segments.

KHAITAN CHEMICALS & FERTILIZERS LIMITED

MERGER OF MAHADEO FERTILIZERS LTD.

During the year the company along with Group Company has acquired majority stake in Mahadeo Fertilizers Ltd. (MFL), a BIFR Company. The one time settlement (OTS) proposal submitted by MFL on the strength of Khaitan Chemicals & Fertilizers Ltd. (KCFL) had been accepted by Financial Institutions. The MFL has paid full & final payment to OTS and Banks. After OTS & acquiring of Majority stake the company has submitted merger proposal to the BIFR to revive the MFL.

The BIFR has sanctioned the scheme of amalgamation of MFL with KCFL w.e.f. 01.04.2005. The KCFL's shareholder approved the scheme of merger in their extra-ordinary general meeting held on 10.05.2006. Accordingly the Accounts of KCFL for the year 2005-06 includes the operation of erstwhile Mahadeo Fertilizers Ltd.

The plant of MFL is having installed capacity to produce 1,15,500 TPA SSP, 49,500 TPA Sulphuric Acid and 10000 TPA Oleum. Your directors would like to emphasize that, during the very first year of its operation, the unit of erstwhile MFL has added to the bottom line of the company.

DIRECTORS

Shri J.L. Jajoo retire by rotation and being eligible offer himself for re-appointment. Particulars of the retiring Director is given in the notes forming part of the notice for the ensuing Annual General Meeting.

During the year under review Shri Anil Agrawal, Director of your company has resigned from the board. The Board noted the same. The Board place on record its sincere appreciation for valuable service rendered and contribution made by Shri Anil Agrawal.

Further Board also place on record its sincere appreciation and gratitude towards the Board of Directors of Erstwhile Mahadeo Fertilizers Ltd. (Since merged with the company).

FIXED DEPOSITS

During the year under review Company has not accepted any deposits from the public, pursuant to the provisions of Section 58A of the Companies Act, 1956 and the Deposit Rules.

AUDITORS & AUDIT REPORT

M/s. S. S. Kothari Mehta & Co., Chartered Accountants, New Delhi, Auditors of the Company hold office till the conclusion of ensuing Annual General Meeting and being eligible offer themselves for re-appointment.

Regarding qualification remark under para VI of the Auditor Reports, the management is of the views that there is no material liability in case of leave pay whereas there is no dues and receivable on account of land revenue and capital subsidy respectively. All other notes on accounts referred to and the Auditors' Report are self-explanatory and therefore do not call for any explanatory note.

M/s. M. P. Turakhia & Associates, Cost Accountants were appointed as Cost Auditors to conduct cost audit of the accounts maintained by the Company in respect of its Fertilizers and Sulphuric Acid products for the financial year 2006-2007.

GENERATION OF ENERGY AND TECHNOLOGY ABSORPTION

Information as specified U/S 217 (1) (e) of the Companies Act, 1956 is given in Annexure A in Form-A.

Your Directors are of the opinion that the Company has already opted for latest technology for producing Single Super Phosphate, Sulphuric Acid, Seed Processing & Oil Refinery. Hence, information specified to be given in Form-B is not applicable.

FOREIGN EXCHANGE EARNING AND OUTGO

The Company has earned Rs. NIL on export of goods (Previous year Rs. 83.30 lacs) and incurred Rs. 1612.17 lacs (Previous year Rs. 1396.14 lacs) on import of Raw Materials, Fees & Subscription and Interest on Foreign Currency Loan.

DIRECTORS' RESPONSIBILITY STATEMENT

Pursuant to the provisions of Section 217 (2AA) of the Companies (Amendment) Act, 2000, your Directors confirm that:

1. in the preparation of the annual accounts, the applicable accounting standards have been followed along with proper explanation relating to material departures;

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management of the Company is pleased to present its analysis report covering segment-wise performance and outlook. The report contains expectations of the Company's businesses based on the current environment. Many unforeseen and uncontrollable external factors could alter these expectations.

BUSINESS ORGANISATION

The Company is mainly engaged in the manufacturing of Single Super Phosphate (Fertilizer) and Edible Oil. It has four plants of Single Super Phosphate situated at Nimrani (Madhya Pradesh), Goaramachia and Malwan (Uttar Pradesh) and Nimbahera (Rajasthan), and a plant of Edible oil (Solvent Extraction / Refinery) situated at Ratlam. (Madhya Pradesh). The Company has an extensive marketing network to support its business activities.

1. INDUSTRY STRUCTURE AND DEVELOPMENTS**Fertilizer Division:**

India is the second largest populous country in the world. To feed the total population of 1.10 billion, there is need for adequate food grains production in sustained manner. As the population grows we need to harness in the area of food grain production to match the growing population which has been made possible by scientific approach in agriculture, maintaining the idle N.P.K.S ratio in order to get desired result.

India is the third largest producer and consumer of fertilizer in the world, as it is predominantly an agricultural country. The Government of India has already decontrolled the Phosphatic & Potashic Fertilizers (including SSP) except allowing some adhoc subsidy.

The Govt. is well aware that the higher subsidy to Urea has led to imbalanced use of fertilizers, which need to be corrected. Thus the further reduction in subsidy to fertilizer industry, which should inter-alia aims to encourage balanced use of fertilizers, shall increase the consumption of phosphatic fertilizers including SSP. However the indifferent policy of the central Government with regards to subsidy on the Single Super Phosphate as compared to the Urea and DAP is a matter of concern.

SSP fertilizer is the cheapest source of phosphatic fertilizer with other inputs i.e. Sulphur, Calcium etc. and is poor man's fertilizer and will remain popular among farmers community. The management feels that due to its lower economical value with high distribution cost, there should be no impact of "WTO" as well as "No Subsidy Era".

The gradual reduction of subsidy shall not affect the demand of SSP provided, there is simultaneous reduction of subsidy in other segment of fertilizer. The total subsidy outgo on SSP sector is marginal.

Soya Division

Your Company is engaged in the business of edible oil mainly Soya oil. The Indian Soya Industry is growing at an average rate of 14.5 % over the past five years. Global players are now entering the Indian Soya industry.

Different crude edible oils are imported like palm oil etc every year for blending and refining with other edible oil based products. Soya oil shall remain to be an import substitute commodity for many years to come.

Local and global demand of Doc is growing day by day, with increasing shift from Non-veg to Veg cattle feed etc. It has increased by five times from 4.06 lac MT in 1992-93 to 22.99 lac MT in 2003-04 constituting 46 % of the total Doc production.

Soya growing is also gaining popularity in states like Maharashtra and Rajasthan.

Exports of Soya meal have a big potential. For about 75% of production of Soymeal, there is a ready market available in countries like Indonesia, China, Japan, Korea, Pakistan, Nepal, Bangladesh, Middle east and to a lesser extent some European Nations.

India has price advantage, as Indian Soya Meal is still cheaper when compared with the American or Brazilian Soya Meal. Indian Soy meal contains high protein content of around 48%. Moreover, it is not genetically modified (GM). Only India supplies Non-GM Soy meal while the U.S., Argentina and Brazil manufacture only/ mainly GM Soy meal.

With first forecasting of the normal monsoon in the current year, the acreage and production of soybean are expected to increase in the current year as the Soybean still remains the profitable as well the most liquid crop for the farmers.

For last two three years, the NCDEX, NBOT and MCX (the future commodity & derivatives exchanges) have appeared as major market force in the edible oil sector. Your company also deals in the same to hedge its oil inventory to counter the high volatility in the Oil prices and also take position in the oilseeds to overcome the slow arrival of the soyseed in the market. This has benefited to the company by way of satisfactory capacity utilization.

2. OPPORTUNITIES AND THREATS**Fertilizer Division**

India rank 111rd in fertilizer consumption (16.10%) as against china (39.60%) and USA (19.30%) Average consumption of plant nutrient in India is 100 Kg /hectare in the arable land as against 278 kg uses in china and as high as 569 kg in New Zealand.

KHAITAN CHEMICALS & FERTILIZERS LIMITED

To get the higher yields of our Agriculture produce, maintaining the idle N.P.K.S. ratio is must. Out of the N.P.K.S., the P & S. are supplied by SSP. SSP supplies three nutrients Phosphate, Sulphur and Calcium. The Single Super Phosphate fertilizer is the only efficient means of supply of Sulphur nutrient

Due to imbalance use of fertilizers, Government is promoting the use of Phosphatic fertilizers. The deficiencies of Sulphur across India is another area which is endorsed by the eminent organisation and thus Sulphur carrying fertilizers has to be encouraged

SSP belongs to partial decontrolled segment and low cost fertilizer with other additional nutrients (i.e. Sulphur and Calcium) and present imbalanced use of fertilizers in favour of highly subsidized urea should lead to growth in SSP in coming years.

The good monsoon has resulted in good demand of fertilizer but due to lack of proper policy at the center particularly with reference to Single Super Phosphate Fertilizer and non-availability of indigenous Rock Phosphate has lead to pressures on margin and consequent under utilization of capacity in spite of good demand.

The company hopes that, sooner or later the Government of India shall consider rational basis of subsidy i.e. Nutrient basis.

Soya Division

The capacity utilization remain low during the year across the industry due to negligible crushing margins throughout the year as in previous year, because of very low International price of Edible Oil and Soya meal.

But the future outlook of the Soya Industry remain good as the country is still deficient in oil seed production to meet out the country's requirement. The company hopes that with the availability of additional crushing capacity of 1000 TPD from the day one of the current year, company would be able to grab the opportunity of higher crushing in the period of high parity besides the benefits of low overheads and higher efficiency in the operations.

3. SEGMENT-WISE BUSINESS REVEIW

The Company has two business segments viz. Fertilizer and Soya. Segment-wise details of the business are given in the foregoing paragraphs:

Fertilizer Division:

The Company has largest SSP manufacturing facilities in India with installed capacity of 845500 MT and having manufacturing facility of Sulphuric Acid, Oleum and Liquid So3 also.

The summarized performance of Fertilizer Division is as under:

	2005-2006	2004-2005
Sales	13883.26	10708.84
PBIDT	1603.53	989.67

Soya Division:

The summarized performance of Soya Division is as under:

	2005-2006	2004-2005
Sales	10579.25	7708.87
PBIDT	592.71	650.46

4. FUTURE OUTLOOK:

Fertilizers Division

Future outlook for Fertilizer Industry is linked with Government's strategic approach to self-sufficiency in Agro products. Additional production of food grain will have to come from increased productivity in the farming sector, resulting in higher demand for fertilizers and other Agri-inputs. The Company is of strong conviction that the resurgence of the Indian Economy can be sustained only upon the modernization and revival of the Agricultural sector.

The Company would like to become leader in the areas of its operation i.e. Madhya Pradesh, Rajasthan and Uttar Pradesh. It would also like to increase its presence in more areas of the state of Chhattishgarh and Maharashtra. The Company is also seeing the opportunity to have its presence in the Southern and Eastern states by way of putting up a new plant or acquisition of existing unit.

The performance of the company shall be better in coming year considering its basic strength.

Soya Division

The oil seed production for the current year 2006-07 is expected to be better due to forecast of normal rainfall. The higher crushing capacity shall present a good opportunity for crushing of larger tonnage in peak season.

5. RISKS AND CONCERNS

The Industry is Agro based and therefore its performance shall always be dependent on vagaries of monsoon. We hope to have normal monsoon in the current year and onwards.

We are continuously repositioning ourselves according to changing market scenario and strengthen our competitive position.

6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY:

The Company has well-establish internal control systems at all levels. Boards take major decisions in all aspects of business. There is an elaborate internal audit system, which is catered to by Krishan Rakesh & Co. They are employing
