PROJECT & FINANCE

The SSP Industry is facing a severe crises on account of mis-match between enhanced cost of production and distribution on the one hand and comparatively low realisation from adhoc subsidy fixed by the Central Government and MRP fixed by the State Government on the other hand.

The Project 'Green field integrated' Single Super Phosphate Plant in Andhra Pradesh has been delayed due to delay in allotment of land at proper location by APIDC. Though we expects the land may be allotted during the current year but the indecisive approach of the Central Government towards Fertilizer sector may cause further delay in implementation of the project.

The Company has put up the Lecithin plant at Ratlam as a forward integration to use the by-product of refinery. The Company is also taking necessary action to produce value added product of Soya meal.

1.25 M.W. Wind Energy plant has been put up at Nandurbar in the state of Maharashtra.

The Company has availed Rs. 1600 Lacs as Corporates Loan which inter-alia includes for advance to M/s. Shobhan Enterprises Private Ltd. having 800 TPD Solvent Extraction plant and 100 TPD Refinery plant with an agreement for long term processing arrangement. The Company has started soybean processing at the plant of M/s. Shobhan Enterprises Private Ltd. during the current year.

PERFORMANCE & FUTURE PLAN

The good crop of Soybean in consecutive second year with availability of higher capacity as leads to highest ever crushing in the year.

KHAITAN CHEMICALS & FERTILIZERS LIMITED

The production of Single Super Phosphates has been again restricted due to availability of indigenous Rock Phosphate from Rajasthan State Mines & Minerals Ltd. consequently leading and lead to under utilisation of capacity. The Government indecisiveness approach towards Fertilizer industry in general and SSP industry in particular forced the management to 'GO SLOW' and 'Wait & Watch' policy for further expansion.

The SSP industry is also facing huge problem due to the quality determination system adopted by the Government Agencies.

The cost escalation of raw material as well as logistic cost has eroded a large portion of margin in fertilizer segment.

Your Directors reiterate that considering the basic strength of its manufacturing facilities, the performance of the Company shall be comparable and better than industry average. The Company also hopes that the Government of India shall re-look on the basis of subsidy on various fertilizers

DIRECTORS

Shri O.P. Bagla & Dr. P. Goyal retires by rotation and being eligible offer themselves for re-appointment. Particulars of the retiring Directors are given in the notes forming part of the notice for the ensuing Annual General Meeting.

FIXED DEPOSITS

During the year under review the Company has not accepted any deposits from the public, pursuant to the provisions of Section 58A of the Companies Act, 1956 and the Deposit Rules.

AUDITORS & AUDIT REPORT

M/s. S. S. Kothari Mehta & Co., Chartered Accountants, New Delhi, Auditors of the Company hold office till the conclusion of ensuing Annual General Meeting and being eligible offer themselves for re-appointment.

Regarding qualification remark under para VI of the Auditors reports the management is of the views that there is no material liability in case of leave pay whereas there is no dues and receiveable on account of land revenue and capital subsidy respectively. All other notes on accounts referred to and the Auditors' Report are self-explanatory and therefore do not call for any explanatory note.

M/s. M. P. Turakhia & Associates, Cost Accountants were appointed as Cost Auditors to conduct cost audit of the accounts maintained by the Company in respect of its Fertilizers and Sulphuric Acid products for the financial year 2007-2008.

CONSERVATION OF ENERGY AND TECHNOLOGY ABSORPTION

Information as specified U/S 217 (1) (e) of the Companies Act, 1956 is given in **Annexure A** in Form-A.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

CAUTIONARY STATMENT

Some of the statements in the report may be forward looking and are stated as required by applicable laws & regulations. Many factors may affect the actual results, which could be different from what the Directors envisage in terms of future performance and outlook.

BUSINESS OVERVIEW:

The Company is mainly engaged in the manufacturing of Single Super Phosphate (Fertilizer) and Edible Oil. Both the segments are related to Agriculture and dependent on monsoon.

The Government of India has so far not able to take decision on how to deal with mounting subsidy on fertilizer, which is continuously bleeding the fertilizer industry in general and SSP industry in particular.

Our Country is deficient in oil seeds and the Government of India has shown concern to encourage the production of oil seed crop, so as to reduce its dependence on large import, which is becoming dearer day by day due to increase use of Edible Oil as bio-fuel.

1. INDUSTRY STRUCTURE AND OPPORTUNITIES & THREATS

Fertilizer Division:

India is the second largest populous country in the world. To feed the total population of 1.10 billion, there is need for adequate food grains production in sustained manner. As the population grows we need to harness in the area of food grain production to match the growing population which has been made possible by scientific approach in agriculture, maintaining the idle N.P.K.S ratio in order to get desired result.

India is the third largest producer and consumer of fertilizer in the world, as it is predominantly an agricultural country. The Government of India has already decontrolled the Phosphatic & Potashic Fertilizers (including SSP) except allowing some adhoc subsidy.

The Govt. is well aware that the higher subsidy to Urea has led to imbalanced use of fertilizers, which need to be corrected. Thus the further reduction in subsidy to fertilizer industry, which should inter-alia aims to encourage balanced use of fertilizers, shall increase the consumption of phosphatic fertilizers including SSP. However the indifferent policy of the Central Government with regards to subsidy on the Single Super Phosphate as compared to the Urea and DAP is a matter of concern.

SSP fertilizer is the cheapest source of phosphatic fertilizer with other inputs i.e. Sulphur, Calcium etc. and is poor man's fertilizer and will remain popular among farmers community. The management feels that due to its lower economical value with high distribution cost, there should be no impact of "WTO" as well as "No Subsidy Era".

To get the higher yields of our Agriculture produce, maintaining the idle N.P.K.S. ratio is must. Out of the N.P.K.S., the P & S. are supplied by SSP. SSP supplies three nutrients i.e. Phosphate, Sulphur and Calcium. The Single Super Phosphate fertilizer is the only efficient means of supply of Sulphur nutrient. The deficiencies of Sulphur across India is another area which is endorsed by the eminent organisation and thus sulphur carrying fertilizers has to be encouraged.

SSP belongs to partial decontrolled segment and low cost fertilizer with other additional nutrients (i.e. Sulphur and Calcium) and present imbalanced use of fertilizers in favour of highly subsidized urea should lead to growth in SSP after rationalization of subsidy.

However government's indecisiveness towards mounting cost of fertilizer viz a viz price charges from the farmer, leading to heavy subsidy burden or un-recovered cost is cause of concern for the Government and industry. Though the total subsidy outgo on SSP sector is marginal, the SSP industry is the most suffering industry amongst the fertilizer industries. The SSP industry is also continuously fighting for its credential amongst farmers due to the existence of short-term player in the industry.

Soya Division

Your Company is engaged in the business of edible oil mainly Soya oil. Different crude edible oils are imported like palm oil etc every year for blending and refining with other edible oil based products. Soya oil shall remain to be an import substitute commodity for many years to come.

Local demand of Soymeal is growing day by day, with increasing shift from Non-veg to Veg cattle feed etc. It is expected that local demands of Soymeal, shall increase to a considerable extent, which shall de-link the pricing with USA/South American countries.

KHAITAN CHEMICALS & FERTILIZERS LIMITED

Better quality (Non GMO) and high protein contents makes the Indian Soymeal preferred buy and thus have a ready market for Soymeal, in countries like Indonesia, China, Japan, Korea, Pakistan, Nepal, Bangladesh and Middle East. But increasing local demand alongwith higher cost of production and appreciation of rupees may be detains to export of Soymeal.

With first forecasting of the about normal monsoon in the current year, the acreage and production of soybean are expected to stable in the current year as the Soybean still remains the profitable as well the most liquid crop for the farmers. Soya growing is also gaining popularity in states like Maharashtra and Rajasthan.

For last four years, the NCDEX, NBOT and MCX (the future commodity & derivatives exchanges) have appeared as major market force in the edible oil sector. Your company also deals in the same to hedge its oil inventory to counter the high volatility in the Oil prices and also take position in the oilseeds to overcome the slow arrival of the soyseed in the market. This has benefited to the company by way of satisfactory capacity utilization.

The crushing of Soybean has been increased during the year after installation of 1000 TPD Plant. The Company would be able to grab the opportunity of higher crushing in the period of high parity besides the benefits of low overheads and higher efficiency in the operations.

2. SEGMENT-WISE BUSINESS REVIEW AND OPERATIONAL AND FINANCIAL PERFORMANCE:

The Company has two business segments viz. Fertilizer and Soya. Segment-wise details of the business are given in the foregoing paragraphs:

The summarized performance in terms of production and Sales for last 5 years is as under:

Particular	Unit	2006-07	2005-06	2004-05	2003-04	2002-03
Production:						
SSP	MT	327308	299739	262571	267926	221751

Oleum/Liquid So3	MT	4945	5938	4722	6170	9369
Seed Crushing	MT	149493	70501	44529	59731	27386
Refined Oil	MT	23478	12778	6464	10027	5049
Sales:						
SSP	MT	307776	294834	262081	256956	222477
Sulphuric Acid	MT	53143	89648	54451	39139	47919
Soya Oil	MT	24479	13141	8254	10046	5312
De-Oiled Cake	MT	125365	58467	36840	48398	22797

The summarized financial performance for last 5 years is as under:

(Rs. In Lacs)

Particular	2006-07	2005-06	2004-05	2003-04	2002-03
Sales:					
Fertilizer	14493.64	13883.26	10708.84	9512.08	8022.85
Soya	23023.51	10579.25	7708.87	9828.85	4617.66
PBIDT:					
Fertilizer	994.56	1603.53	989.67	1045.76	926.39
Soya	1801.12	592.71	650.46	1049.53	158.52

From the above it is very clear that the Company is strengthening its position in both the segment.

The performance of Fertilizer division is largely depends upon availability of Rock Phosphate clubbed with rational policy of subsidy by Government of India. At present the Company don't envisages problem of marketing due to its existing strong marketing network.

The performance of Soya division shall be depends upon timely monsoon as well as international price of edible oil and Soymeal.

Soya division comprises two products i.e. De-Oiled cake (DOC) and Edible Oil (Oil). DOC is mostly exported either directly or through merchant Exporter and being sent to port on Rake Load basis. No distributor is involved in this process and it is sold directly to the bulk purchaser. Edible oil is mass consumption item and is sold directly to the re-packers/ vanaspati manufacturers and other retailers on ex factory basis in tanker load in bulk. Hence no distributor/dealer is involved in this process as well.
