KHANDWALA SECURITIES LIMITED**From the Managing Director's Desk –**

Dear Members,

I am filled with great optimism, belief and hope as I address my thoughts to you. These are exciting times for all of us. Never has our country been poised with advantage on a global scale with respect to being seen as one of the principal driver for the global economy and leading the world out of recession as a result of its sheer economic might and performance. This position has been attained as a combination of several factors – but the principal among them has been pleasant change in the political equation as result of a definitive mandate that supports stability, growth and ambition. This optimism arises out of the sheer will power of the country represented by its people and we are all fortunate to be part of this unfolding equation.

This year has been the year of great separation – a year that has separated the 'men' from the 'boys' – a year that has underwritten the value of a conservative business approach against unbridled and uncontrolled expansion. We have all witnessed and read about innumerable global businesses that were seemingly unshakable but today being consigned to the bins of history because of practices that evolved from excesses, and sometimes bordering on pure greed. There is a lesson in this for all of us – 'BIG' is not necessarily always good and that in the absence of proper systems and procedures sometimes being small helps in managing risks in a significantly better way – we have been able to prove this in KSL through our disciplined business operations and strong operational controls. I am proud that with your continued support, including the unstinted guidance of the leadership team, KSL has today emerged a much stronger, leaner and agile business.

Last year, we had committed ourselves to a path wherein we would undertake at least one strategic initiative every financial year and build the Group business in a concerted manner and on a firm footing. As part of that commitment we have setup up a separate initiative to spearhead our business operations in the retail sector under TruMonee Financial Limited (www.trumonee.com). I am proud to say that despite a challenging business environment and tough market conditions, TruMonee has successfully executed its business operations and it went live with its trading operations on January 1st, 2009. We have already setup branch presence in the cities of Surat and Bhavnagar and are confident that with growing business we would be able to establish a larger presence in the years to come.

Indian Corporate have been growing from strength to strength with every passing year and it is a matter of great pride for us that Indian companies are able to set ambitious growth targets, including reaching out to acquire global corporations that in some cases have been larger than our companies. This trend is likely to only increase in the coming years and would demand market access for these companies, including access to cost-effective capital. Clearly we see this as the right time and opportunity for our Group to start building an international presence and help serve our customers in a better way, including reaching out to new prospects. For the coming year, as part of our committed annual strategic initiative, our endeavour would be to add an international dimension to our Group's operation such that we are able to put in place a low-cost market access strategy that helps us create business traction from key identified markets. Steps are already under way to identify potential markets and we are sure that your company would make reasonable progress on this front in the coming months.

Complementing the implementation of the retail business, we have also undertaken extensive technology upgradation and process adaptation that significantly improves our risk management capability and also create multiple service platforms for institutions as well as the retail businesses. The key objectives driving the thinking at the Group are to achieve the following – "Expansion + Penetration + Control" to ensure greater access to our market and customers and at the same time putting in place adequate controls. We strongly believe our combination of systems, processes and technologies coupled with the extraordinary human talent that exists in the Group would build long term efficiencies and capabilities for the business. We have already commenced this journey and have seen encouraging results as a combination of several of these steps which we hope to strengthen with your active support and resolute assistance from our employees.

An organisation is made of its people and for a service industry, its people are its real assets. Our ability as a company to raise the performance bar and deliver outstanding value to our customers is a result of the unwavering support and cooperation of our employees, which is reflected in improvements in several performance metrics of our company across the board. We are adding to our already rich experience and caliber of people by drawing in a resource pool comprising talent from multiple markets, disciplines and geographies. We are confident that with the ever increasing improvement in our employee mix, KSL and the Group would scale of new heights in the years to come. I take this opportunity to sincerely express our gratitude and best wishes to our people and look forward to their support in all our engagements.

I wish to express our deep sense of commitment and gratitude to you, our Member, for continuing to believe in us and being an active supporter of our plans and initiatives. We seek your active cooperation as we move forward to build a robust, sustainable and scalable KSL Group.

Warm regards

Paresh J. Khandwala
Managing Director

SIXTEENTH ANNUAL REPORT 2009

Outstanding Corporate have one thing in common an absolute sense of mission

MANAGEMENT DISCUSSION AND ANALYSIS**ECONOMY OVERVIEW**

The world over look of financial markets is very different today from what they did a year ago. The disastrous events that shook the very foundations of the American financial system and subsequently the rest of the world have already been acknowledged as the worst financial crisis since the Great Depression. Several banks and financial institutions of great repute have gone into bankruptcy while many more barely survived, thanks to financial lifelines thrown to them by their Governments. In Europe, whole countries have gone bankrupt or come dangerously close to it. In the after effects of this unprecedented financial and economic meltdown, most of the world's major economies are faced with the spectre of zero growth, or worse still, negative growth. The sub-prime crisis which everyone saw coming pulled down institutions in the west which were considered unshakable till recently. Consequently the mood of optimism and exuberance that marked the recent past gave way to stark pessimism. The tide of abundant liquidity, which raised asset and commodity prices to new heights suddenly receded bringing down the valuations and causing heavy losses to investors across the world. There is a fear of deflation and recession in most of the developed world, which in turn affected the economic prospects of the developing world as well. Though India was not excluded from these happenings it is a matter of satisfaction that we are relatively affected less, thanks to regulatory prudence and foresight. The pain for India has been more in the Real Economy, with sector after sector experiencing steep contractions in demand.

Current estimates put GDP growth at 6.7% during 2008-09 as against 9% achieved during each of the three preceding years.

GDP to grow by 6.6% in 2009-10

Quarterly Real GDP growth (%)

But it was not all gloom and doom. There were some comforting signs too. Well-functioning financial markets, robust rural demand, lower headline inflation and robust foreign exchange reserves were all pointers to long term strength and resilience of Indian Economy. The timely fiscal stimulus packages announced by the Government, coupled with swift monetary easing and regulatory action by RBI, helped to arrest the slow down and keep the economy ticking.

INDUSTRY OVERVIEW**INDIAN EQUITY MARKET**

The economic scenario directly impacts the investment facilitation and advisory business in which your company is engaged. Indian stock markets are one of the worst to be affected when global investors liquidated investments for meeting liquidity demands and taking flight to safety. The benchmark index, sensx, witnessed low of 7697 from a peak of 21206 witnessed in January 2008. For most of the latter half of the financial year 2008-09 the index hovered below 10000, less than half of the peak achieved in 2008. A direct consequence to the industry is a significantly lower trade volume and off take of investment products such as mutual funds, PMS, ULIPs etc. The total volumes in NSE were down by 17% from previous year's levels. The market capitalization of equity shares traded in the NSE reduced by nearly 40% during the year. There were only 21 IPOs against 92 IPOs last year and the money raised by Indian corporates from primary market through public and right issues was lower by 81% compared to last year. NAV losses kept investor sentiments at a low level. The revenue from your company's business was affected on account of these factors.

The Secondary Market

In the secondary market segment, the activity began on a bullish note with BSE and NSE indices scaling new peaks of 20,873 and 6,287 on January 8, 2008. However, this momentum did not sustained and the indices recorded significant downtrend in line with the decline in all the major international indices. Intraday fall of 1,968 points in BSE Sensex on January 21, 2008 was the highest recorded fall in the history of Sensex. The market sentiment turned cautions on account of increase in international crude oil prices, downwards trend in major international equity markets, increasing domestic inflation, widening of trade deficit and depreciation of the rupee. On a point-to-point basis, BSE Sensex and Nifty indices declined by 51.8% and 52.4% respectively during 2008. Market capitalisation to GDP ratio declined from 109.5% by end March 2008 to 49.7% at the end of March 2009.

Even after the sharp correction in the valuation of Indian stocks, the year-end valuation of stocks in terms of P/E ratio of Indian indices at 12.4 – 12.9 at end December 2008 was the highest amongst select emerging market economies such as South Korea, Thailand, Malaysia and Taiwan.

DEBT MARKET:

Growth in corporate debt market was stunted during the second half of FY09 by a severe liquidity crunch, higher interest rates and counter party fears. However 2,177 deals with a volume of Rs. 2,617 billion during FY09 compares well with the total number of 2,269 deals worth Rs. 2,109 billion in FY08.

The Corporates as yet do not seem to view the debt markets as a credible alternative to equity capital market in raising capital. But as the government and the regulators seem inclined to taking steps to develop the corporate bond market in India with an objective of reducing the cost of raising debt capital, we believe this segment will grow faster than other segments in the future and gradually become a major source of capital required by corporates, supplementing traditional bank credits.

FII & MF Activity in Equity Markets:

FY09 was the first fiscal in India's history when FIIs were net sellers in Indian equities; secondary market FII

outflows for the year were Rs. 479 billion. Interestingly, FY08 was the year of record net FII inflows of Rs. 517 billion. However, mutual funds continued to be net buyers for the sixth consecutive year. In FY09, mutual funds were net buyers to the tune of Rs. 66 billion, which is a 52% drop from Rs. 137 billion of net buying in FY08.

FII Net Inflows/ (Outflows) in Rs. billion
