MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMY OVERVIEW

The Indian economy, which had managed to emerge out of the global turmoil in the year 2008-09 relatively unscathed, witnessed a quick rebound in the year 2009-10. The global growth momentum also saw a rise following the unprecedented boost of liquidity by Federal Governments across countries, especially in developed economies. Against a decline of -0.6% during the previous year, IMF projects world GDP to expand by -4.2% during CY10. This momentum saw a wide divergence- a moderate revival for the developed world, but a notch faster for the emerging economies. As per recent World Bank estimates, combined GDP in developing countries will grow -6.4% in CY10, after a modest -2.4% rise in CY09

While recovery in real economy remained in track, the return from the stock markets especially in Emerging Markets were much more. The rally in Emerging Markets was led by the revival in risk appetite and inflows from developed countries, especially the U.S. aided by a dollar funded carry trade. The synchronized measures introduced by the policy makers to restore stability and confidence in the markets were clearly achieving what they were intended to. However the ongoing spectre of sovereign default risks in Greece and parts of Southern Europe have recently started showing signs of cynicism. Whilst the Euro zone governments have come out with a massive bail-out programme

The emerging situation requires careful monitoring as it has the potential to cause a double dip recession in some economies

The growth story for India has always looked robust compared to its peers, given the long term dynamics in its favour. A lower export dependence and high domestic demand saw India emerge relatively unharmed from the global turbulence, India, along with China, was the only major economy to have registered a 5%+ growth in every quarter even during recession. As demand improved, India's economy saw a sharp surge in factory output, undeterred by poor monsoon. Growth estimates began getting revised upwards, mid of CY09 onwards. Stock markets started riding on a wave of exuberance on prospects of better growth and easy liquidity. Moreover, the mid year elections turned the tide for the Indian markets. A stellar rally set-in as the newly elected government gave a boost to growth expectations. The first two quarters of FY10 were good, however, the last two were challenging and saw a slowdown in markets.

During the phase of recovery, the challenge before India was striking the right balance between a host of macro issues; containing fiscal deficit, smooth roll back of stimulus programmes without affecting the growth momentum, yet maintaining adequate liquidity for enabling credit. All this, without growth leading to high inflation. Macro policies in India maneuvered the situation with precision. The RBI was quick and proactive in tackling inflation and inflation expectations. RBI increased the benchmark rates- one of the first major central banks to do so- but, only at a gradual and calibrated

pace so as to ensure that the process of growth recovery is not derailed either. Union budgets (in July 2009 and more so in February 2010) also kept boosting growth expectations as government policies succeeded in balancing the trade-off between stimulating growth and reducing deficits.

INDUSTRY OVERVIEW

INDIAN EQUITY MARKET

The Indian capital markets have performed better than most others during this financial year. But even as we buried the fears of a global slowdown, the markets went through some testing times during the second half. We see the year ahead of us as one of consolidation; we are likely to witness a lot of activity in all the verticals of the capital markets. At present, trading in Indian bourses is typically concentrated around equities and commodities. The penetration of asset classes like bonds and currencies remains low. However, as Indian investors become more sophisticated, they are bound to start branching out into various asset classes and this will boost the markets.

Also, markets will further develop with greater efficiency owing to the forward-looking policies of the regulators and the government. The projected growth of the Indian economy with the resultant growth in the capital' markets, compels us to identify the enabling factors and to work towards putting them in place, at the earliest.

The Primary Market

India Inc raised Rs 46,778 crore through the public equity offerings in the financial year 2009-10, 23 times higher than Rs 2,034 crore mopped up in the last fiscal. The public offerings dominated by the state-run firms, which raised Rs 30,942 crore or 66 per cent of the total amount. The mobilisation in the year could have been higher but due to the continuing volatility in the secondary market and poor post-IPO performance of some companies in the early part of the fiscal, fund-raising plans failed to breach the record level of Rs 52,219 crore raised in 2007-08. Nevertheless, the financial year 2009-10 amount is the second-highest ever and is almost double of each of the preceding years of 2004-05, 2005-06 and 2006-07. After several years, the mobilisation was almost equally shared by initial public offers (IPOs) and the follow-on public offers (FPOs). Fund raised by public sector undertakings was the highest ever amount mobilised by them. The last time when the PSUs had raised the biggest amount was in the 2003-04 at Rs 16,563 crore and the Rs 30,942 crore raised in the financial year 2009-10; Rs 21,162 crore was through divestments and Rs 9,780 crore through fresh capital. A total of six PSU companies entered the market in FY10, led by NMDC (Rs 9,791 crore) followed by NTPC (Rs 8,480 crore), NHPC (Rs 6,039 crore), REC (Rs 3,530 crore), Oil India (Rs 2,777 crore) and United Bank of India (Rs 325 crore).

The Secondary Market

The year 2009-10 for financial markets ended on a very promising note with the economy picking up and net capital
