MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMY OVERVIEW

After almost two years of end of the great recession, it remains unclear what the financial crisis has done to GDP growth of advanced economies. However, emerging markets continue to show resilient growth. The year 2010-11 has been a year of steady performance for the Indian Economy. The gross domestic product for the financial year 2010-11 is expected to grow by 8.6%, up from 7.2% in the previous year.

This sustained growth performance has attributed India as one of the most promising economies today. A recent report by Citi goes on to name India as a global growth generator in the years to come. The report comments on the sustainability of this high growth performance, stating that India has generations of catch-up growth yet to be witnessed. As per recent World Bank estimates, combined GDP in developing countries will grow by 6.0% and 6.1% in CY11 and CY12 respectively, after a 7.0% rise in CY10. According to the IMF, world GDP (measured at PPP US dollars) amounted to \$73trn in 2010. According to their forecasts, world GDP will more than double to \$180 Tn by 2030, measured in comparable units, i.e. constant 2010 PPP US dollars, and then more than double again to \$378 Tn by 2050. The economic center of gravity has already started shifting eastwards where India & China are expected to be its focal point by 2050.

The announcement of Union Budget 2012 also allayed concerns over a burgeoning fiscal deficit. The policy may not have been the best for the corporate players, but sure took care of issues of common man and paved way towards long term stability.

INDUSTRY OVERVIEW

INDIAN EQUITY MARKET

The Indian capital markets have performed better than most others during this financial year. With recessionary concerns left behind and positive economic data, investors both foreign and domestic joined the Indian growth story.

However, the major negative against the markets this year have been political & corporate governance issues and inflation. The outburst of political and corporate scams only exacerbated the problem. Both in May 2010 and January 2011, indices were pulled down due to these factors. Till March 2011, there had been no conclusive action on 2G and Common Wealth Games scams. Rising crude oil prices, a major component of inflation indices, kept inflation higher and RBI on its toes. However, strong performance from India Inc. and economic data suggesting healthy growth raised investor confidence in November 2010.

The penetration of asset classes like bonds and currencies remains low. However, as Indian investors become more sophisticated, they are bound to start branching out into various asset classes and this will boost the markets.

Also, markets will further develop with greater efficiency

owing to the forward-looking policies of the regulators and the government. The projected growth of the Indian economy with the resultant growth in the capital markets, compels us to identify the enabling factors and to work towards putting them in place, at the earliest.

The Primary Market

India Inc raised Rs 46,627 crore through the public equity offerings in the financial year 2010-11, 3.7% higher than Rs 47,302 crore mopped up in the last fiscal. The public offerings dominated by the state-run firms, which raised Rs 27,537 crore or 56 per cent of the total amount.

The figure for the year could have been higher but due to the continuing volatility in the secondary market and poor post-IPO performance of some companies in the early part of the fiscal, fund-raising plans failed to breach the record level of Rs 52,219 crore raised in 2007-08. Nevertheless, the financial year's figure is the second-highest ever and is almost double of each of the preceding years of 2004-05, 2005-06 and 2006-07.

The last time when the PSUs had raised the biggest amount was in the previous year – Rs 30,942 crore. This year they raised Rs 27,537 crore, of which Rs 22,763 crore was through divestments and Rs 9,780 crore through fresh capital. A total of seven PSU companies entered the market in FY11, led by the country's largest-ever initial public offering (IPO) of Coal India at Rs 15,199 crore, which accounted for 33 per cent of the year's mobilization. The other IPOs were from MOIL, SJVN, and Punjab and Sind Bank. The rest three were follow-on public offers – Power Grid, Shipping Corporation and Engineers India.

The Secondary Market

Encouraged by the strong growth performance exhibited by the economy, the equity markets saw a surge by the end of 2H 2010-11. With the debt worries in the Euro zone and slowly recuperating US economy, investors increased their focus towards Indian equities. The investment by foreign institutions for the year was around US\$ 24.47 Bn, maintaining last year's level and even growing. Though the YoY performance may not seem attractive, markets were very volatile and gave huge returns for value-investors. The year started weak with investors getting cautious of political concerns and rising crude oil prices. They rebounded from its trough in May 2010 to an all time high in November 2010. However, they witnessed a downswing again in the new calendar year, initially driven by political concerns and later by inflationary.

The Benchmark BSE SENSEX, which had dipped to 15,960 in May 2010, rebounded to 21108 in November 2010. The index closed at 19445.22 as on March 31 2011; an increase of 9.91% in FY11 and increase of 21.84% its trough. As a result, valuations that are beginning to emerge as a key concern in India, coupled with the ongoing developments in the Euro zone, have the potential to cause a correction.

The key benchmark indices, BSE Sensex and NSE Nifty both ended with approximately 11% growth over the year. Even, the shares of small and mid-cap companies outperformed the key indices during the same period due to expectation of higher returns and revival in investor confidence. FII's invested more than \$24.47 billion in equities.

During the financial year 2010-11 there was a fall in the aggregate secondary market turnover both on NSE and BSE. The average daily turnover on NSE and BSE decreased by 16% and 30% respectively to Rs 11,623 crore and Rs 3,293 crore.

Over the financial year, Central Government and RBI took some firm decisions to control a stubborn inflation. The government also withdrew certain stimulus measures. RBI started exiting from its accommodative stance beginning April 2010. During this financial year, RBI has increased REPO & reverse REPO rate by 175 bps and 225 bps respectively.

After mid-March 2011, the Indian currency appreciated to trade in the Rs. 44-45 per dollar range. Earlier, it was trading in the range of Rs. 45-46 per dollar range. Reports attribute the appreciation more to the weakening the dollar in the international markets and to the improvement in the capital inflows in to the country. The dollar is said to have depreciated against Euro following signals of rate hikes in the Euro zone. The rupee did depreciate and breached Rs. 47.5 per dollar mark in May, but over the year just showed a gain of mere 0.7%.

EMERGING MARKETS

Emerging-market equity markets attracted more money this year, putting them on course for a record year as Europe's debt worries diverted cash away from developed-market. Although 2010 produced mostly positive returns, a few markets such as Japan and a number of heavily-indebted European markets closed in loss-making territory. In the wake of these conditions, emerging markets proved better investment destinations.

Notwithstanding a period of underperformance during the fourth quarter, the MSCI Emerging Markets Index rose by 11% for the 2010-11, enough earlier in the year to outperform

the MSCI World Index by a wide margin for the year as a whole. The following chart gives a picture of the index over FY 2010-11.

DEBT MARKET:

The corporate debt markets which witnessed a lackluster FY09 following the global credit crisis and liquidity crunch, failed to improve the levels of activity. Primarily, this happened because most corporate houses preferred to follow the equity route for their investment plans. Traditionally, the debt penetration in India has been low compared to the developed countries. In addition, the debt markets in India are by simple, plain vanilla loans. Do not seem to view the debt markets as a credible alternative to equity capital markets, yet. Moreover, the Indian market: is crowded by Government bonds, which find buyers in many Commercial Banks in view of the high reserve requirements; in the country. The corporate debt markets, therefore, continue to be shallow in spite of having great potential.

However, the advent of Interest Rates Futures and the, likely introduction of corporate bonds reputability and credit default swaps coupled with other reforms is expected to turn the debt markets around. This would help in making bonds a cheaper and more efficient alternative for raising resources compared to the traditional commercial loans from banks. We are hopeful that the government and the regulators will bring out the necessary reforms in order to make the debt market a vibrant one.

Performance

Indian fixed income market witnessed subdued activity from the investors' fraternity during the financial year 2010-11. Factors such as high WPI inflation, rising interest rates, extreme tight liquidity in the banking system, high fiscal deficit, government borrowing and spending and geo political issues influenced and resulted in inching up of the yields on debt securities.

Government securities market observed yields hardened over the course of the financial year and the 10 yr benchmark security reached a high of 8.23% before closing the year at 7.98% (vs last year's year end yield of 7.85%).

The Reserve bank of India (RBI) increased policy rates – Repo and Reverse Repo rates by 175 and 200 basis points respectively during the FY 2010-11.
