29th Annual Report 1998-99

Chairman's Word

Dear Shareholders,

1998 has been an important year for your company, a year in which several new initiatives have been taken by your company, some of which have given us good result in this year itself and some of which will yield strong results in the coming years. Round the corner is the new millennium, with its own opportunities and challenges. With economic progress of the country's middle class, the two wheeler industry should be in a good position to grow at a healthy rate in the coming decade. At this juncture, let me share with you what will be your company's focus for this exciting future.

New Product Range

A wide range of innovative, economical and environmentally friendly products are at the heart of our success strategy in the coming years. Starting with Luna, today we have expanded our product portfolio to include the Safari V2, a high powered moped and this year, we have entered the motorcycle market with our 4 stroke step through motorcycle the K4-100. K4 100 is India's first indigenously developed 4 stroke bike and has been widely acclaimed to be also India's most fuel-efficient vehicle. This year, your company has completed investment into a new world class motorcycle plant at Koregaon Bhima near Pune and we are all set to introduce a range of attractive motorcycles in the market. Motorcycles are a fast growing segment of the market and we are confident to achieve good growth in the coming years by entry into this segment.

By the end of the current financial year, your company will be offering a complete range of attractive models, from mopeds to step thru to 4 stroke motorcycles.

Growth Opportunities through Acquisitions

During the year under review, your company has invested in purchasing shares held by Honda Motor Company Ltd. of Japan, in Kinetic Motor Company Limited (KMCL), erstwhile Kinetic Honda Motor Company Ltd. Through KMCL, your company is now in a position to also offer world-class scooters to its customers in addition to the range of mopeds, step-thru and motorcycles planned. This means we will be covering the entire spectrum of two wheeler products from low end to premium segment. This acquisition also boosts your company's distribution network, which will result in higher sales for the entire product range.

Focus on Emissions

By reducing emissions through introduction of 4 stroke engine technology and better two stroke vehicles, Kinetic has reinforced its commitment to creating a clean environment. Kinetic has been the first company to indigenously develop and introduce a 4 stroke motorcycle which complies with the year 2000 norms. In April 2000 when the world's most exacting emission standards will be introduced in India, our entire product range will meet these norms through use of advanced 4-stroke technology on motorcycles and step-thru range and use of catalytic converters on our mopeds.

With your company's plans to expand its range from mopeds to a full range of two wheelers, building on synergies with the scooters company and investments into new technologies, I feel confident that your company will effectively tap the new opportunities in the coming millennium.

With best wishes,

Arun H. Fiordia
