At present, Company's Faridabad plant is spread in an area admeasuring approximately 9 acres. In addition to this, Company is having vacant land adjacent to the Factory in the Delhi state.

After careful scrutiny of total manufacturing operations involved, it was felt that Company can operate effectively in a much smaller space.

Considering the above, the Board of Directors at its meeting held on July 31, 2001 has passed a resolution to transfer the entire manufacturing operations of the Company to a much smaller place than the existing one. This would streamline activities and achieve cost effectiveness of operations.

Similarly, the excess land and building owned by the Company, which is idle at present can be disposed off at the best market price and the long term debts of the

Company can be prepaid. This would reduce the interest burden and increase the profitability.

This would be achieved without affecting the manufacturing operations of the Company.

None of the Directors of the Company is concerned or interested in this resolution.

The approval of shareholders is solicited for the resolution at item 5 of the notice.

The Company is also in the process of introducing technologically advanced products in the market. With these measures coupled with strict cost reduction strategies, the company would strive to maintain the turnover and improve profitability.
