Dear Shareholder's

Your Directors have pleasure in presenting their Report together with the Audited Accounts for the financial year ended March 31, 2007.

The performance highlights of the Company for the year are summarised below.

Financial Performance

(Rs. in Lacs)

Particulars	2006-2007	2005-2006
Profit/(Loss) before Interest and Depreciation	2,536.76	3,164.07
Interest	84.49	1.89
Depreciation	448.13	654.76
Profit/(Loss) Before Exceptional items	2,004.15	2,507.42
Exceptional Item – Relief as per AAIFR order	6.14	0.56
Profit/(Loss) before Tax	2,010.29	2,507.98
Tax Adjustments	225.75	—
Fringe Benefit Tax	16.47	16.84
Profit / (Loss) after Tax	1,768.07	2,491.14
Transfer to Debenture Redemption Reserve	75.00	75.00
Profit / (Loss) after Appropriation	1,693.07	2,416.14
Balance brought forward from previous year	(2,561.01)	(4,977.15)
Balance carried to the Balance Sheet	(867.94)	(2,561.01)

Your Directors are pleased to report that the company has made profit after tax of Rs.1,768.07 Lacs.

Implementation of the Rehabilitation Scheme sanctioned by BIFR

The Company is implementing the Rehabilitation Scheme as sanctioned.

Operations and Performance

Performance

The Company achieved a turnover of Rs.23,974.93 Lacs for the year ended 31st March, 2007 and profit after tax of Rs.1,768.07 Lacs compared to the previous year amounting to Rs.2,491.14 Lacs.

a. Sugar

India, the second largest producer of Sugar, produced 195 Lacs MT during the season 2006-07 and estimates to record 300 Lacs MT Sugar during the current season.

The price of the Sugar showed an up-trend for a brief period, and now has nose dived to Rs.12,000/- from Rs.20,000/- per quintal in the domestic market. The price in the Export Market also has come down heavily due to the bumper sugar production in Brazil. The excess produce of 'Sugar' created a glut situation in the world Sugar market.

The export incentives announced by the Government for White and Raw Sugar are not significant to match with low price realisation in export.

The Plant at Kattur has crushed 7,82,788 MT in 2006-07 as against 7,28,780 MT in 2005-06 with a recovery of 9.83%. The leased unit at Pandavapura has crushed 4,78,560 MT with a recovery of 8.74%. The Company is in the process of expanding its capacity by setting up additional facilities for crushing in Sugar season 2007-08 and all the steps have been taken up to develop required cane. With this the total Sugar crushing capacity of the Company is expected to be around 10,000 TCD.

Your Company is initiating measures to improve the efficiency of these units for better recovery. The company has also undertaken studies for implementing mechanical cane harvesting, which would support the farmers for reducing to cost of manual harvesting.

We have sold 26,947 MT of Bagasse as against 18,503 MT in the previous year.

b. Cogeneration

Your Company is in the process of expanding the present installed capacity from 11 MW to 35 MW and we expect to start the commercial production for the additional capacity in the year 2007-08.

Total power exported was 30,526 MWH during 2006-07 as against 22,798 MWH in 2005-06, this substantial increase was due to extended plant operations and capacity utilisation.

c. Distillery

Alcohol production during the year 2006-07 was 13,800 KL as against 9,457 KL in 2005-06, this increase was due to extended sugar crushing with molasses purchased from other sources.

Dividend

The Directors do not recommend a dividend for this year, in view of accumulated losses.

Future Business

Your Company is currently augmenting its capacity at 6,400 TCD across its manufacturing locations and focusing on optimising the crushing period by increasing the throughput, improving the process efficiencies, for enhanced sugar recoveries and minimum utilisation of power. The efficiency norms are set at par with international standards to ensure that these manufacturing units become low cost producers.

Your Company is in the process of availing "Carbon Credits" for its manufacturing unit in the coming years and the sale of Carbon Credits is expected to become another stream of revenue.

Directors

Dr.P.S.Mani Sundaram, director is retiring by rotation at the ensuing Annual General Meeting and being eligible offers himself for re-appointment.

Directors' Responsibility Statement

The Directors confirm :

1. that in the preparation of the annual accounts, the applicable accounting standards have been followed along with proper explanation relating to material departures;
2. that they have selected such accounting policies and applied them consistently and made judgements and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the company at the end of the financial year and profit of the company for that period;
3. that they have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of this Act for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities;
4. that they have prepared the Annual Accounts on a going concern basis.

Corporate Governance

The report of the Corporate Governance together with the Auditor's Certificate were attached hereto as Annexures.

Public Deposits

The Company has not accepted any public deposit during the year and there was no outstanding public deposit anytime during the year.

Re-appointment of Auditors

The Auditors, M/s.R.Subramanian and Company, Chartered Accountants, Chennai, retire at the ensuing Annual General Meeting and have confirmed their eligibility to accept Office, if re-appointed.

Cost Auditor

The Company's Cost records with respect to product 'Sugar' are being audited by Mr.L.S.Sathiamurthi, Cost Auditor, appointed by the Board.

Disclosure under Section 217(2A) and 217(1)(e) of the Companies Act, 1956

As required under the provision of sub-section (2A) of the Section 217 of the Companies Act, 1956 read with the Companies (Particulars of Employees) Rules, 1975 as amended, particulars of employees are required to be set out in the annexure to the Directors' Report. However, as per provision of Section 219(1)(b)(iv) of the Companies Act, 1956, the report and the accounts are being sent to all the shareholders excluding the aforesaid information. Any shareholder desirous of obtaining the same may write to the Company Secretary. Information required under Section 217(1)(e) of the Companies Act, 1956 is appended.

Subsidiary Companies

Pursuant to the order issued by the Ministry of Corporate Affairs, New Delhi, attaching the Balance Sheets of the Subsidiary Companies, Kothari International Trading Limited & Kothari Biotech Limited is exempted.

Acknowledgement

Your Directors thank the Banks, Customers, Debenture holders, Farmers, Financial Institutions, Government Authorities, Suppliers and Shareholders for their continued support. Your directors also place on record their appreciation for the committed services by the employees of the Company.

DIRECTORS REPORT

ANNUAL REPORT 2006 - 2007

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW

The company operates in various product segments namely Sugar, Power & Alcohol.

Industrial Structure and Development

Sugar	Power	Distillery
In the global as well as Indian scenario, supply has grown faster than demand and this has placed downward pressure on Sugar prices in 2006 – 07. The domestic market of Sugar is dominated by the bulk users to the extent of 70% and 30% are the consumers. The industry placed this fact before the Government for exempting of Sugar from the purview of Essential Commodity. The adhoc and frequent changes in Export policies by the Government also impairs the reputation, as a Sugar Exporter.	The Sugar Industry is a key contributor towards renewable energy. The Ministry of Renewable Energy plans to achieve 80,000 MW of power generation thro renewable energy within a decade. The 'Bagasse' has been used as input fuel for the Co-gen power plant in the Sugar Industry. The Co-Gen plants are in line with Clean Development Mechanism and adopt Kyoto Protocols, which enable the Industry to avail the benefits of Carbon Credits.	The manufacturing of Alcohol an ancillary product of Sugar includes Ethanol too. As per the existing regulatory norms the Industry is focused on manufacturing of Extra Neutral Alcohol, Rectified Spirit, Anhydrous Alcohol & Denatured Spirit. The constant price increase in fossil fuel, global warming, environmental pressure necessitate towards renewable energy i.e. usage of Ethanol blended fossil fuels. It is expected, that a change in the Policy and the norms with respect to manufacturing of Ethanol, would emerge.

Opportunities and threats

Sugar	Power	Distillery
The Sugar Industry, experienced bumper cane crop and increase in cane prices which has resulted in substantial surplus of Cane for the Sugar Season 2006 – 07. Presently the Sugar prices in domestic and export market is very low.	Tamilnadu Electricity Regulatory Commission (TNERC) has initiated reforms in the power sector within the State and these reforms provide an opportunity to conserve energy and maximize our sale of Power.	The State Government of Tamilnadu has allotted 60,000 tons of molasses for utilisation and to produce 135 Lacs litres Alcohol. It is expected that the market for alcohol would pick up due to increase in usage of IMFL Industry and petroleum prices.

Performance during Financial Year 2006-07

Sugar	12,61,348 MT of Sugar cane was crushed, resulted an average recovery of 9.29%
Power	30,526 MWH power was exported
Distillery	13,800 KL Alcohol was produced

OUTLOOK SUMMARY

Sugar

Indian Sugar Industry is going through a very critical phase, where within a short span of time the market turned from "short supply and high prices" to "excess supply and low prices". This is a result of bumper cane produce and Government interventions.

Many State Governments have given waiver of purchase tax and granted export subsidy etc., to the Sugar manufactures to reduce the impact of the deteriorating price realisation of Sugar.

Distillery

Alcohol Industry in general is encouraging; but now is at cross roads, due to conflict of interest amongst the State and Central Government, to formalise a uniform policy and regulatory procedures towards Alcohol & Ethanol manufacturing.

**RISKS AND CONCERNS**

The Agro based Sugar Industry has a specific set of risk characteristics, which at KSCL, are carefully evaluated, managed and mitigated. The major risks are classified as under

Raw material risk

Sugarcane is the raw material and any disturbance on its timely availability will have a substantial impact on operational cost. This risk may be caused by climatic conditions influenced by the monsoon and local weather conditions over the crop cycle, which could affect both the quantity and quality of cane. The profitability of alternative crops will influence the area of cane planting. Pests, disease and availability of farm labour impact the cost incurred by the cane grower.

Risk Mitigation

The Company has always maintained cordial relationship with its farmers and taken up appropriate steps to mitigate their hardships by timely payment, cane development schemes through Bank loans, promotion of cane variety etc. The long planting period and crushing prevailing in the State paves way for profitable operation.

Regulatory Risk

The cane price is controlled by both Central and State Government; Cane Area Reservation policy of the State; Release Mechanism to regulate Free Sugar Trade; State Policies on usage / utilisation of Molasses; Further, the Policies of the Government on exports, imports, pricing and usage of molasses, alcohol, ethanol etc., are the impediments faced by this Industry. The Sugar is classified as an essential commodity and its price is dynamic according to the prevailing market condition and regulatory norms.

Risk Mitigation

The Company adopts appropriate procedures through internal control systems to minimise these risk.

Competition Risk

The prospect for growth in the Industry drives the Company to face tough competition from other companies and also from the new entrants.

Risk Mitigation

The company maintains relationship with its customers for stabilizing the domestic and international markets through efficient production and best product delivery.

Internal Control Systems and their adequacy

The Company has established a system of internal control across all of its business operations and safeguarding of Assets. The Board, Audit Committee and the Management ensure that the internal control system operates effectively within the organisation. Internal Audit team supported by external experts as and when required, review the adequacy of internal control systems and suggests necessary checks and balances to increase the effectiveness of the system. Clear policies have been laid down for approval and control of expenditure. Investment decisions involving capital expenditure are subject to detailed appraisal and review. Capital and revenue expenditure are monitored and controlled with reference to approved budgets.

Human Resources / Industrial Relations

The Company has always focused on building a team with complementary skill-set to achieve business goals year on year and provides opportunities to work across multiple functions and disciplines. The total number of employees as on March 31, 2007 is 992.

Personnel development programs are being conducted periodically for Staff and Executives of the Company. The relationship between the management and employees is cordial.
