1. REVIEW OF OPERATIONS

The income from operation on during the year was Rs.35.49 Lakhs (Previous Year 60.84 Lakhs). The company's turnover has decreased by about 41.67% on largely due to less favourable performance in the 4th quarter of this financial year on account of difficult business conditions. The profits have decreased by 51.52% due to low level of operations.

2. OUTLOOK & PROSPECTS

This fiscal, the Global growth has remained moderate, with uneven prospects across the main countries and regions. According to World Economic Outlook (Update-April, 2015) the global economy is projected to grow at 3.5 percent in 2015. Although there have been signs of improvement in the growth rates in some of the advanced economies but the uncertainties largely loomed over the financial and capital markets due to the Eurozone crisis and possibility of fed interest rate hike. There has been a slower growth in emerging market and developing economies and concerns were raised in particular, about slow down in the Chinese Economy. In India, although the economy has registered a growth rate of about 7.3% in 2014-2015 but it is largely not reflected in some of the major indicators of growth giving rise to perceptions that probably a hike in the projected rate of growth might partially be attributable to changes in the method of computation brought about this year. For instance the Bank credit growth dropped to a 18-year low while deposit growth fell to a 19-year low in 2014-15 with fresh investment proposals from corporates drying up completely and projects announced in the past remaining stuck because of several issues. Credit growth would have been substantially lower had it not been for the smart pick-up in personal loans.

Also this fiscal a large number of corporate have showed up weak balance sheets, with an upsurge in gross as well as net NPAs creating stress upon the banking system, slow rate of growth in industrial production and massive fall in exports from India. Also, there have been dramatic declines in savings and investment ratios. The gross fixed capital formation declined from 33.6 percent in 2011-12 to 29.7 percent in 2013-14 while gross domestic savings declined from 33.9 percent to 30.6 percent. As per the Economic Survey 2015, "...The data show that private corporate investment increased robustly in 2013-14 which seems at odds with stressed balance sheets and the phenomenon of stalled projects"

However, the Indian economy has shown greater resilience to the euro-zone crisis due to looming uncertainties on account of possibility of Greek default. Also the financial markets and capital markets have shown greater degree of preparedness for the possible hike in federal interest rates in the USA.

According to the reports/data released by several international financial institutions and rating agencies, it has been estimated that India is poised to be the world's fastest growing economy outpacing China soon. Besides, the Indian Economy is going through a policy reform regime marked by several steps taken to streamline legal, taxation and economic and environmental policies/procedures. There are other factors such as drop in oil prices in the international market, decline in the inflation rates, fiscal consolidation and a more favourable balance of payments amongst others, which may help prepare a sound base for accelerated overall growth in India.

With the outlook for the economy improving, the Company sees growth opportunities for its business in the year ahead.
