MANAGEMENT DISCUSSION AND ANALYSIS

Industry structure and developments

The country's real GDP is estimated to fall to 5.7% in 2012-13 on lower growth, troubles on the policy front and the high fiscal deficit and current account deficit. Supply constraints, particularly in the mining and the agricultural sector, slow implementation of investment projects and slowdown in consumption expenditure on discretionary items due to high interest rates and poor performance of the Indian stock market affected the growth. Besides, the global economic slowdown had also contributed to the deceleration in growth of the Indian economy.

The Indian benchmarks ended the financial year FY13 with over 7 per cent gains on the back of strong fund flows from foreign institutional investors (FIIs) on the hope of economic reforms. The S&P BSE Sensex rallied 8.3 per cent while the Nifty rose 7.4 per cent this fiscal as FIIs pumped in INR 1.4 lakh crore in Indian equities. The Indian markets underperformed many of its EM peers on concerns of macro-economic data and political restraints.

The beginning of the new fiscal year in April should see the return of government spending bringing back much-needed system liquidity, thereby likely easing bond yields, which was curtailed in 4QFY13 to meet the fiscal deficit targets. A visible pick-up is expected in ordering activity for rail, road and potentially port projects over the next six months, beginning 1QFY14

The movements of the stock markets impact your company being an Investment Company. India's inflation rates remain at an all-time high despite various economic and other measures been taken by the Government and RBI from time to time to curb the same. Crude oil prices are a constant threat with the potential for negative consequences for India's macro outlook.

Opportunities and Threats

Your Company being an investment Company seeks opportunities in the capital market. The volatility in the stock indices in the financial year under report represents both an opportunity and challenge for the Company.

The business of subsidiary company i.e. LKP Securities Ltd. is affected by the sentiments prevailing in the stock markets.

LKP Securities Ltd. is one of the reputed broking houses of the country, having a network of 1030 outlets across India. The company has put in place a new team to drive the retail business.

The Company is empanelled with most of the reputed domestic financial institutions including life and non insurance companies, mutual funds, foreign financial institutions and corporates, apart from having large number of HNI and retail clients. The likely increase in capital mobilisation from the primary market, increase in resource mobilisation by mutual funds and phenomenal growth in secondary market volumes provide significant business opportunities for the Company.

Capital market activities in which most of our activities depend on is also influenced by global events and hence there is an amount of uncertainty in the near term outlook of the market.

Segment-wise Performance

The Company being a holding Company is engaged in investment activities and other financial services during the year under review, hence the requirement of segment-wise reporting is considered irrelevant.

Outlook

The GDP of India is likely to rise to around 6.1% - 6.7% in FY14. Demand compression and easing of supply-side constraints should lead to lower inflation, such that RBI has room to lower interest rates to boost investments and growth. Improved global prospects, the easing inflation, and structural reforms is likely to push the growth.

Risks and Concerns

The stock broking industry has recently witnessed intense competition, falling brokerage rates and the entry of several big players. The Company's Subsidiary Company continues to achieve cost efficiencies through the application of technology. However with the availability of financial resources, we are hopeful that the said Company will be able to take the opportunities of the expanding business opportunities.

The Capital market industry in which your Company is operating is subject to extensive regulation. The Company evaluates the technological obsolescence and the associated risk and makes investment accordingly

Internal Control Systems and their adequacy

The Company has satisfactory internal control system.

LKP Securities Ltd. has an adequate system of internal controls to ensure accuracy of accounting records, compliance with all laws & regulations and compliance with all rules, procedures & guidelines prescribed by the management. An extensive internal audit is carried out by independent firms of Chartered Accountants. An internal team of inspection also regularly visits branches for ensuring regulatory compliance. Post audit reviews are also carried out to ensure follow up on the observations made.
